**WARNING – USER RESPONSIBILITY**

**FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.**

- This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.
- The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.
- To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

## The global leader in motion and control technologies and systems

### Global Partnerships Global Support

Parker is committed to helping make our customers more productive and more profitable through our global offering of motion and control products and systems. In an increasingly competitive global economy, we seek to develop customer relationships as technology partnerships. Working closely with our customers, we can ensure the best selection of technologies to suit the needs of our customers' applications.

### Electromechanical Technologies for High Dynamic Performance and Precision Motion

Parker electromechanical technologies form an important part of Parker's global motion and control offering. Electromechanical systems combine high performance speed and position control with the flexibility to adapt the systems to the rapidly changing needs of the industries we serve.

### Parker Hannifin Corporation

With annual sales exceeding \$13 billion in fiscal year 2012, Parker Hannifin is the world's leading diversified manufacturer of motion and control technologies and systems, providing precision-engineered solutions for a wide variety of mobile, industrial and aerospace markets. The company employs approximately 60 000 people in 48 countries around the world.

Parker has increased its annual dividends paid to shareholders for 56 consecutive fiscal years, among the top five longest-running dividend-increase records in the S&P 500 index. For more information, visit the company's website at [www.parker.com](http://www.parker.com), or its investor information website at [www.phstock.com](http://www.phstock.com).

# Parker Hannifin

## The global leader in motion and control technologies

### A world class player on a local stage

#### Global Product Design

Parker Hannifin has more than 40 years experience in the design and manufacturing of drives, controls, motors and mechanical products. With dedicated global product development teams, Parker draws on industry-leading technological leadership and experience from engineering teams in Europe, North America and Asia.

#### Local Application Expertise

Parker has local engineering resources committed to adapting and applying our current products and technologies to best fit our customers' needs.

#### Manufacturing to Meet Our Customers' Needs

Parker is committed to meeting the increasing service demands that our customers require to succeed in the global industrial market. Parker's manufacturing teams seek continuous improvement through the implementation of lean manufacturing methods throughout the process. We measure ourselves on meeting our customers' expectations of quality and delivery, not just our own. In order to meet these expectations, Parker operates and continues to invest in our manufacturing facilities in Europe, North America and Asia.

#### Electromechanical Worldwide Manufacturing Locations

##### Europe

Littlehampton, United Kingdom  
Dijon, France

# Solutions to Improve Productivity, Increase Flexibility and Save Energy

## Process Productivity and Reliability

Parker brings together the technology and experience required for continuous process applications across many industries. Electromechanical and drive products combine application specific functionality to ensure precise speed control and reliable performance. Parker combines more than 30 years of application experience with a global sales and support network that help you increase your machine availability.

## Energy Efficiency and Clean Power

Parker has developed the technology to maximize the efficient use of energy in industrial, mobile and infrastructure environments.

### Hybrid Vehicle Technology

Parker has adapted its electric drive technologies for use in hybrid electric vehicles, including utility vehicles and passenger vehicles. Examples include inverters and motor drives, as well as electric drive motors.

### Energy-savings for pumps, fans and compressors

Parker has the drive technology to help you make significant energy savings in the operation of pumps, fans and compressors in both industrial and infrastructure applications, including:

- Commercial refrigeration
- Water and wastewater treatment
- Building automation
- Industrial processes
- Hydraulic systems

### Power Generation and Conversion

Using proven inverter technology, Parker has developed numerous solutions for the conversion of energy for commercial use from a variety of sources, including wind, wave and energy storage devices.

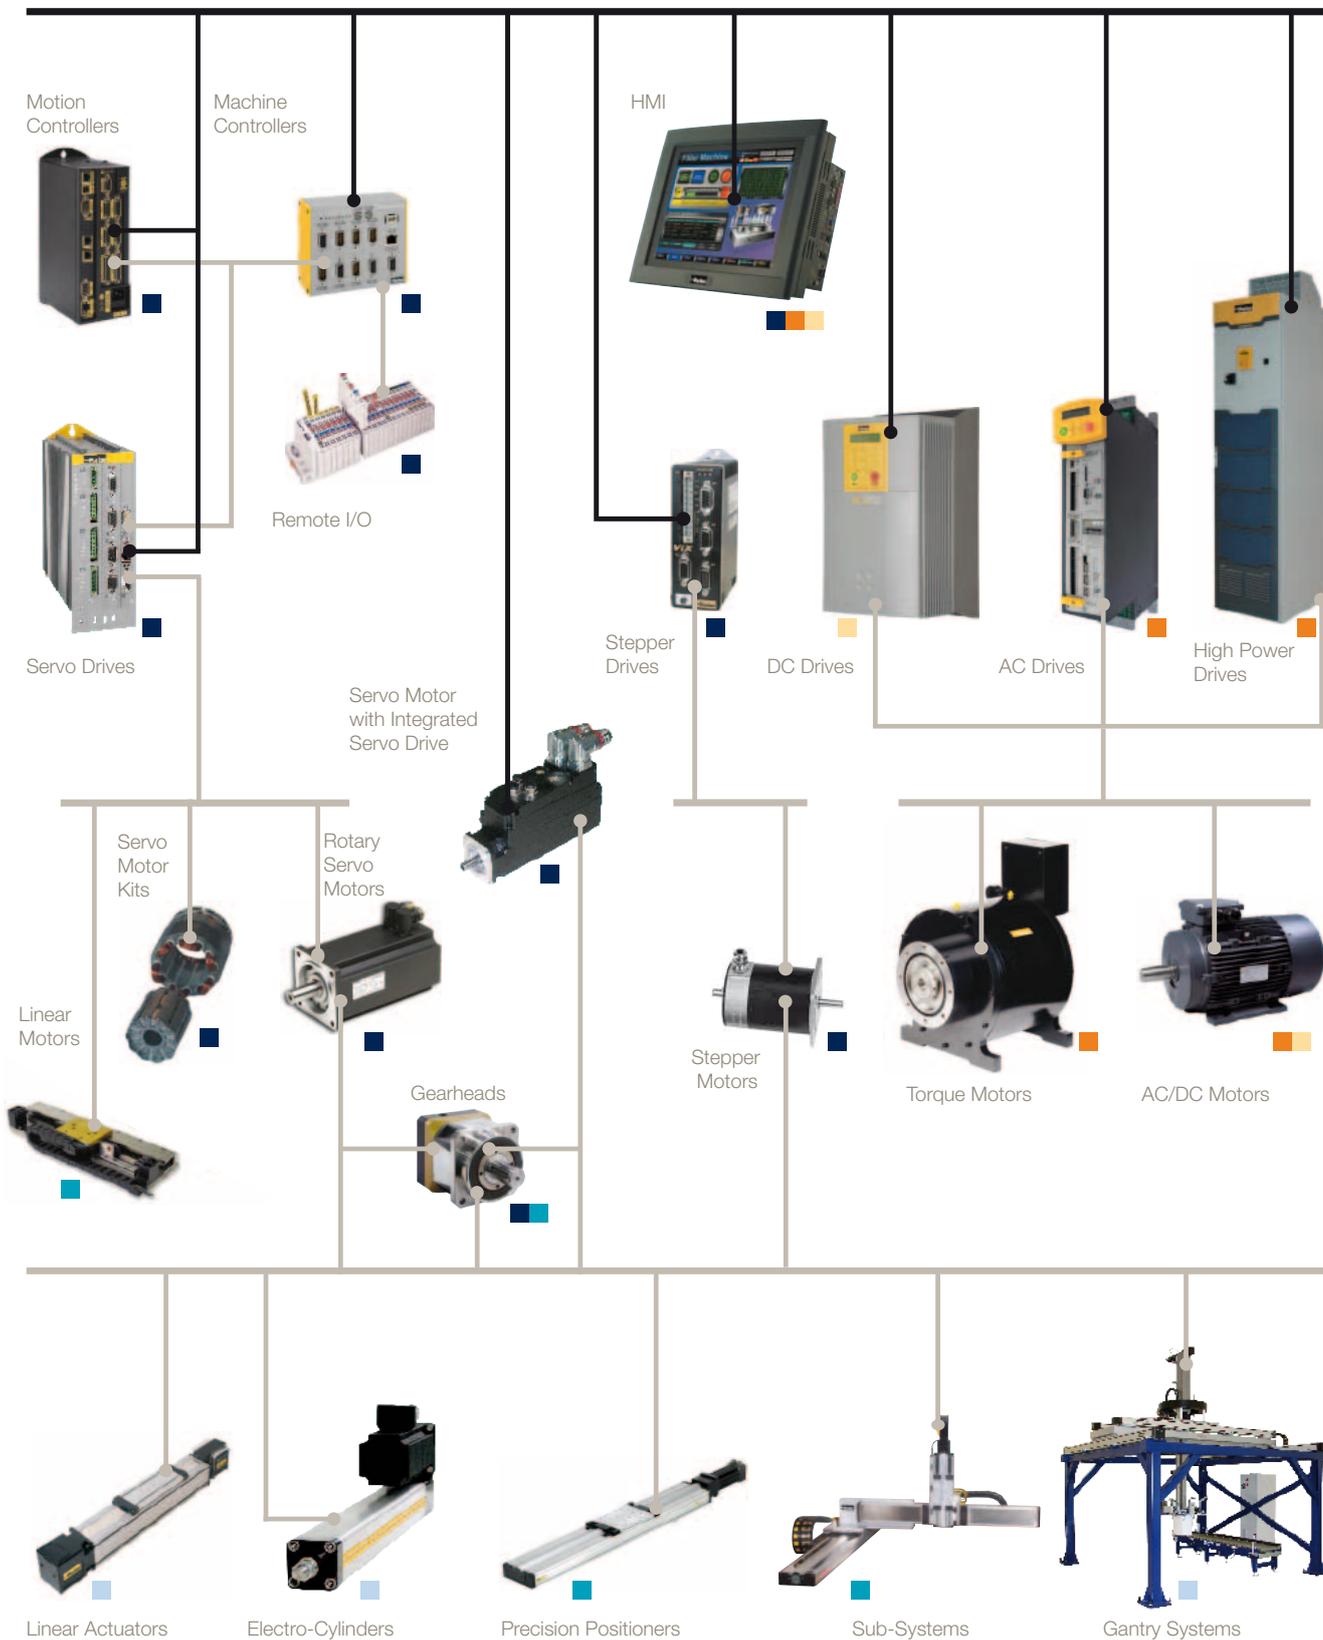

# Motion Control Systems for Total Production Flexibility

Parker's electromechanical automation customers enjoy total production flexibility in their general and precision motion control applications. Complete packaged linear positioning systems, coupled to servo and stepper drives and controls, enable our customers to develop a complete motion solution with one partner. Parker provides the products for a wide range of motion needs- power, speed, travel, force-with easy to use controls designed to work on multiple control and communication platforms. Additionally, Parker's products can be easily customized to suit specific applications.

## Value Added Services

In addition to providing products and systems, Parker also provides a number of value added services to our customers:

- **Programming and commissioning services**
- **Power quality and energy surveys**
- **24-hour support and service**
- **Product repairs**
- **Product training**

## Customization

Many automation applications cannot be solved with off the shelf products. Parker's products are designed to be versatile as well as easy to configure for the most of industrial and process applications. Some customers require solutions that can't be found in a catalogue, and Parker has the resources and expertise available to provide solutions:

- **Custom motor designs**
- **Customized mechanical positioning systems**
- **Customized control functionality**
- **Customized communication solutions**

## System Solutions

Parker offers system design and manufacturing in two main categories:

### Drive Systems

Complete AC and DC drive systems across a wide power range, from less than 1 kW to more than 2 MW. Systems typically include electrical enclosure, ancillary electronic equipment and full documentation. Commissioning and support services are standard.

### Mechanical Systems

Parker has more than 20 years of experience in providing a variety of multiple axis mechanical positioning systems, complete with motors, drives and controls. Typical applications include material transfer and pick and place gantry systems. Additionally, Parker designs and builds custom precision (micron and submicron level) positioning systems, integrating precision bearing, feedback and drive systems, including Parker's range of linear servo motors. Each system ships complete with motors, drives and controls, and can include the programming and commissioning.

# Intelligent Servo Drive Compax3

## Overview

### Description

Compax3 is Parker Hannifin's global servo drive. The drive series includes single and multi axis drives as well as hydraulic controllers. It features a power range from 1 to 110 kVA.

The servo drives are completely developed and manufactured in Germany. An additional Compax3 production site was established in the US. As a global servo drive controller, Compax3 is of course available all over the world. Service and support sites are located in the vicinity of all major industry locations - worldwide. The "Parker Authorised Distribution Partners" do play an important role in this context - well-trained and experienced application and support specialists will provide the necessary professional support in any situation.

### Features

#### Hardware

- Power range from 1 to 110 kW
- 1 encoder output / 1 encoder input
- 8 digital inputs / 4 digital outputs
- 2 analog inputs (14 Bit)
- 2 analog outputs (8 Bit)
- Multiple fieldbus options
- Extensive safety technology

#### Technology Functions

- I10T10: Drive control via: velocity/torque control, step/direction input, encoder input
- I12T11: Positioning via digital I/Os, RS232/RS485, absolute/incremental positioning, registration mark related positioning, electronic gearbox, dynamic positioning
- T30: Programming based on IEC61131-3 with CoDeSys
  - PLCOpen function modules
  - IEC61131-3 - standard modules
  - C3-specific function modules
- T40: T30 functionality + cam function
- Technology controller with integrated Motion PLC  
Compax3 powerPLmC-C20

### Technical Characteristics - Overview

Device:	Current [A]		Supply voltage	Power [kVA]
	I <sub>cont.</sub>	I <sub>peak</sub> (<5 s)		
Compax3				
S025V2	2.5	5.5	1 *	1.0

## Control Technology

### Real-time signal processing

- Reduction of the quantization noise
- Increase of the signal resolution
  - Due to oversampling of the speed and current signals
- Online feedback error compensation of offset and gain errors
- 14 Bit resolution increase (Increase of the resolution of the scale graduation of up to 14 Bit)
  - By interpolation of sine-cosine feedback signals
- Determination of the speed by the observer technique
- Doubling of the controller bandwidth
  - By load torque observer principle

### Jerk-limited setpoint generation, resulting in:

- Gentle handling of the moved goods
- Increased service life of mechanical components
- Overshoot free positioning
- Reduced excitation for mechanical resonance frequencies

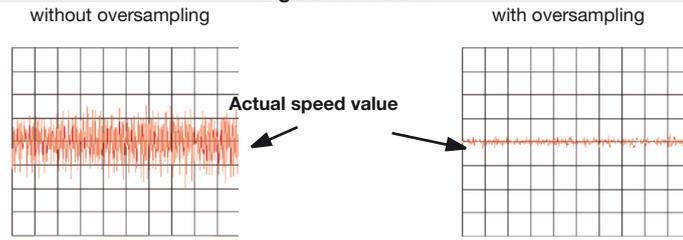

### Control:

- Controller in the feedback path helps avoid differentiating components in the numerator of the transmission function (which will result in a significant overshoot of the actual value)
- Automatic and robust controller design
  - User-oriented optimization parameters "damping" and "stiffness"
- Optimization of the response behavior
- Minimization of the following error
  - Due to feedforward of speed, acceleration, motor current and jerk
- Dual Loop Option
  - The load control can be activated via an additional feedback system for the acquisition of the actual position of the load.

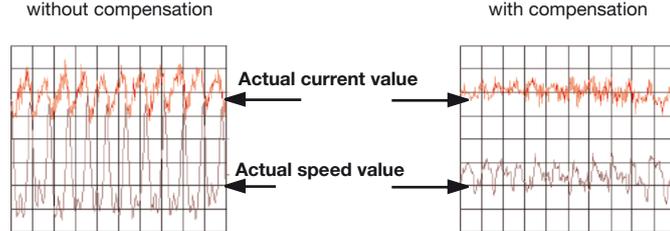

### Commissioning / controller optimization

- Automatic determination of the load moment of inertia
- Compax3 MotorManager for determining the motor characteristics and the motor position feedback
- Optimization with integrated oscilloscope function

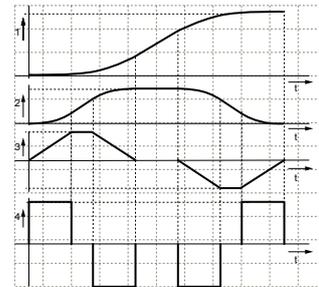

### Signal resolution

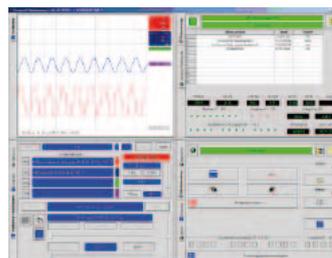

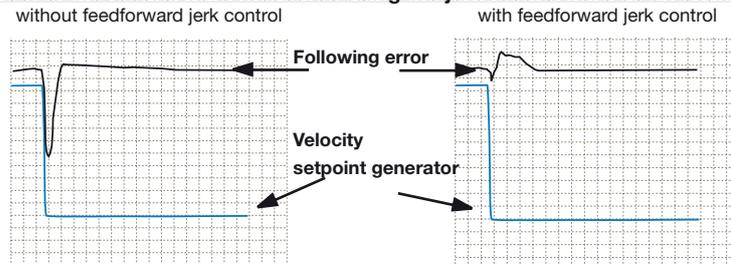

### Online feedback error compensation

- 1: Position
- 2: Speed
- 3: Acceleration
- 4: Jerk

### Effect of the feedforward measures using the jerk feedforward as an example

## Safety Technology

The Compax3M and Compax3S drive controllers support the "safe torque off" (STO) safety function in the sense of the "Safe Stop", with protection against unexpected startup according to the requirements EN ISO 13849-1 Category 3, EN ISO 13849-1 PL=d/e (Compax3S), PL=e (Compax3M) and EN 1037.

Together with the external safety control device, the "safe stop 1" (SS1) safety function according to the requirements of EN ISO 13849-1 category 3 can be used.

Switching off the motor torque must be effected by the machine controller. According to a risk analysis which must be carried out according to the machine standard 89/392/EWG or EN 292; EN 954, EN ISO 13849-1 and EN 1050, the machine manufacturer must project the safety system for the entire machine including all integrated components. This does also include the electrical drives.

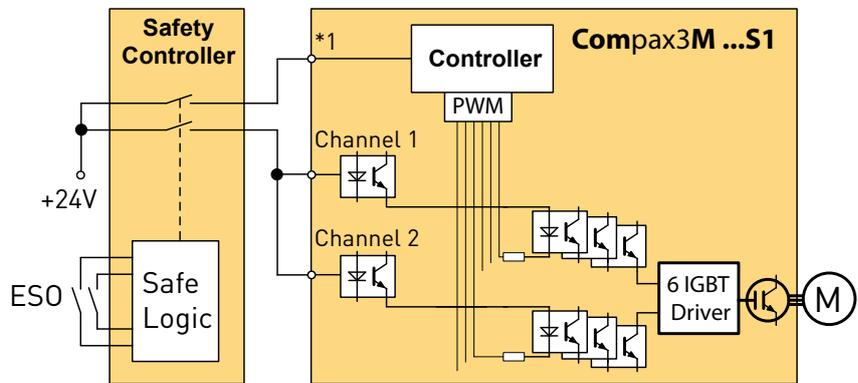

### Compax3 with "Safe Torque Off" - STO

The STO safety function or The "safe torque off" safety function was differently implemented for the Compax3S and Compax3M families. In the Compax3S, the feedback paths of the 2 channel switch-off must be integrated into the external connection for monitoring. For the Compax3M, a protocol describing the orderly function of the safety function must be established upon setup and after defined maintenance intervals. The safety function in the Compax3M was implemented entirely without wear-prone relay technology. The Compax3H does not feature any safety function.

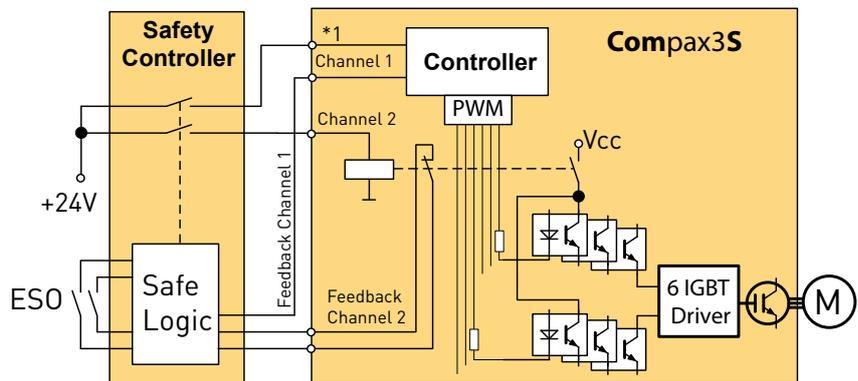

### Safety functions with Compax3M

- SS1 - Safe Stop 1
  - SS2 - Safe Stop 2
  - SOS - safe operating stop
  - SLS – Safely Limited Speed
  - SLP - Safely Limited Position
  - SLI – Safely Limited Increment
  - SDI – Safe Direction
  - SSM - Safe Speed Monitor (Diagnostics output for SLS)
- The safety functions correspond to the standard in accordance with EN13849-1 PL=e.

### STO function on the Compax3M

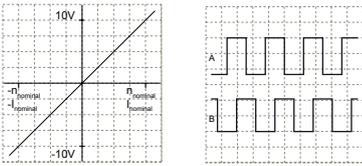

### STO function on the Compax3S

ESO = Emergency switch off  
\*1 Deceleration Input

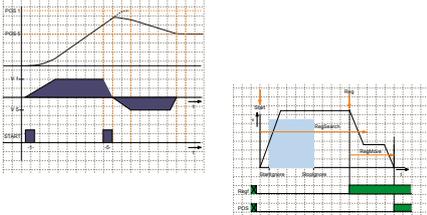

## Device Technologies

### Compax3 I10T10: Step/Direction and Analog Command Input

- ±10 V Input
- Step/Direction Command Input
- Encoder Input

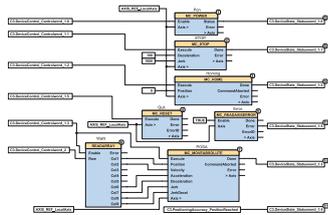

### Compax3 T11: Positioning

Due to its high functionality, the Positioning version of Compax3 forms an ideal basis for many applications in high-performance motion automation.

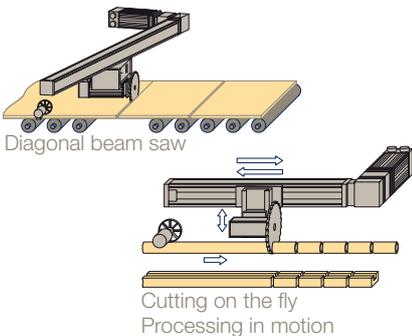

- Up to 31 motion profiles can be created with the help of the PC software
- Motion profiles can be selected via field bus or digital inputs/outputs
- Wide choice of machine zero modes simple setup / adjustable jerk limitation
- Optional extension of the digital I/Os

### Compax3 T30: IIEC 61131-3 Positioning with function modules based on PLCOpen

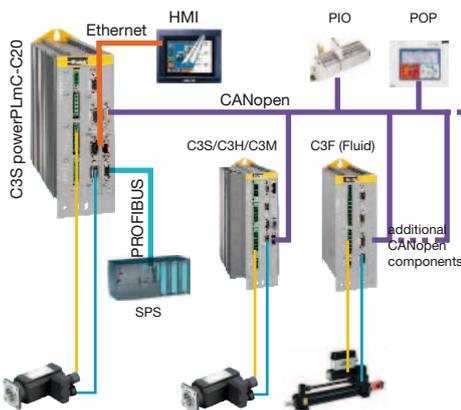

- Programming in accordance with IEC 61131-3 with CoDeSys
- up to 6000 instructions
- 650 16Bit variables / 200 32bits variables / recipe array 32 x 9
- 3 16-bit retain variables / 3 32-bit retain variables
- IEC 61131-3 standard modules/ Device specific function modules
- PLCOpen function modules

### Compax3 T40: IEC 61131-3 positioning with cam function modules

- T30 Technology Functions completely integrated and available
- Master position acquisition
- Reg synchronization
- Cam switching mechanism
- Coupling and decoupling functions
- Cam profiles
- Cam memory
- Cam creation with the CamDesigner

### Compax3 powerPLmC-C20: Technology controller with integrated Motion PLC

Main fields of application

- More than two axes for motion automation
- High degree of system integration (e.g. via Ethernet)
- Integration of complex devices for machine visualization and operation
- Connection to a wide number of digital and analog inputs
- Integration of pneumatic and hydraulic automation devices

## Compax3F: Hydraulics Controller

The Compax3F hydraulics controller is another member of the Compax3 family based on the well-known Compax3 digital drive. Thus, all advantages offered by the Compax3 family are now also available in servo- and proportional hydraulics. The hydraulics controller is available with the following technologies:

### Technology Functions

- T11: Positioning
- T30: Motion control programmable in accordance with IEC 61131-3
- T40: Electronic cam

### Communication

PROFIBUS and PROFINET are registered trademarks of PROFIBUS & PROFINET International (PI). EtherCAT® is a registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany.

### Your Advantages:

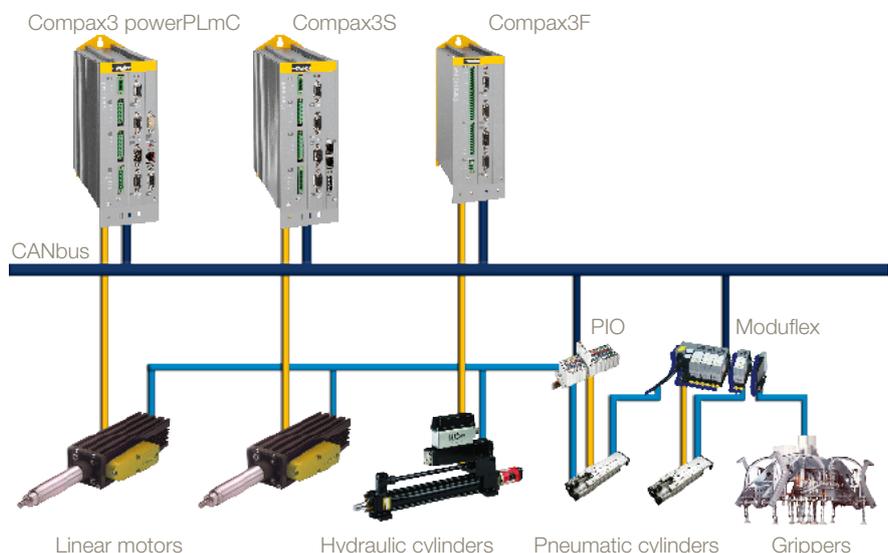

- It is no longer necessary to distinct between the motion of a hydraulic or an electromechanical axis on the control technology level .
- Common software tools for electromechanics and hydraulics supporting the design of hybrid machines.

Especially the combination with the highly dynamic DFplus valve can be used to efficiently increase your machine performance.

Device:	Compax3 F001 D2 F12 lxx Txx Mxx
<b>Voltage supply</b>	
Voltage range	21-27 VDC
<b>Inputs and outputs</b>	
8 control inputs	24 VDC / 10 kOhm
4 control outputs	Active HIGH / short-circuit proof / 24 V / 100 mA
4 analog current inputs	14 Bits
2 analog voltage inputs	14 Bits
4 analog outputs	16 Bits, current or voltage
2 analog monitor outputs	8 bits
<b>Communication</b>	
RS232	115200 Bauds
RS485 (2 or 4-wire)	9600, 19200, 38400, 57600 or 115200 Bauds
...	
<b>Feedback</b>	
	1 V <sub>PP</sub> SineCosine (max. 400 Hz) RS422 Encoder (max. 5 MHz, or Step/Direction) SSI (RS422) Start/Stop (Time of Flight, RS422) EnDat2.1
<b>Size / Weight</b>	
H x W x D [mm]	199 x 80 x 130
Weight [kg]	2.0
Housing / protection class	Enclosed metal housing, IP20

### Example: System Layout

# Technical Characteristics

## Technical Data

### Compax3S

Type Compax3...		S025V2	S063V2	S100V2	S150V2	S015V4	S038V4	S075V4	S150V4	S300V4 <sup>(1)</sup>
	Unit									
<b>Supply voltage and device currents</b>										
Supply voltage	[V]	1*230/240 VAC (80...253 VAC) / 50...60 Hz		3*230/240 VAC (80...253 VAC) / 50...60 Hz		3*400/480 VAC (80...528 VAC) / 50...60 Hz				
Output nominal current (rms)	[A]	2.5	6.3	10	15	1.5	3.8	7.5	15	30
Peak current (<5 s)	[A]	5.5	12.6	20.0	30.0	4.5	9.0	15.0	30.0	60.0
Power rating	[kVA]	1.0	2.5	4.0	6.0	1.25	3.1	6.2	11.5	25.0
Control Voltage	[V]	24 VDC ±10 %, ripple <1 Vpp								
Electric current drain	[A]	0.8 A (Compax3) (+ digital outputs 0.1 A each + motor brake up to 1.6 A)								
<b>Regenerative braking</b>										
Capacity	[µF]	560	1120	780	1170	235	235	470	690	1100
Storable energy	[Ws]	15 @230 V	30 @230 V	21 @230 V	31 @230 V	37@400 V 21@480 V	37@400 V 21@480 V	75@400 V 42@480 V	110@400 V 61@480 V	176@400 V 98@480 V

<sup>(1)</sup> Operation with condenser module C4.

### Compax3H

Models Compax3		H050V4	H090V4	H125V4	H155V4
	Unit				
<b>Supply voltage and device currents</b>					
Supply voltage	[V]	3*400/480 VAC (350...528 VAC) / 50...60 Hz			
Output nominal current (rms)	[A]	50.0	90.0	125.0	155.0
Peak current (<5 s)	[A]	75.0	135.0	187.5	232.5
Power rating	[kVA]	35.0	70.0	91.0	109.0
Control Voltage	[V]	24 VDC ±10 %, ripple <1 Vpp			
Electric current drain	[A]	0.8 A (Compax3) (+ digital outputs 0.1 A each + motor brake up to 1.6 A)			
<b>Regenerative braking</b>					
Capacity	[µF]	2600	3150	5000	5000

Storable energy	[Ws]	18@400 V 10@480 V	37@400 V 21@480 V	37@400 V 21@480 V	74@400 V 42@480 V

## Mains module PSUP

### Mains supply:

Power Supply Model	Unit	PSUP10			PSUP20			PSUP30 <sup>(1)</sup>		
Supply voltage		*230...480 VAC ±10 % 50...60 Hz (Rated voltage 3*400 VAC)								
Output voltage		325...680 VDC ±10 %								
Supply voltage	[VAC]	230	400	480	230	400	480	230	400	480
Output power	[kVA]	6	10	10	12	20	20	18	30	30
Pulse power (<5 s)	[kVA]	12	20	20	24	40	40	34	60	60
Control Voltage		24 VDC ±10 %								
Maximum ripple		<1 Vpp								
Electric current drain	[A]	0.2 A			0.3 A			0.3 A		
	[A]	C3M050D6: 0.85 A		C3M100D6: 0.85 A		C3M150D6: 0.85 A		C3M300D6: 1.0 A		
		(+ total load of the digital outputs + current for motor holding brake up to 1.6 A)								

<sup>(1)</sup> Operation of the PSUP30 only with mains choke

## Positioning

### Positioning on the motor shaft

- Resolver (option F10)
    - Resolution: 16 Bit (= 0.005°)
    - Absolute accuracy: +/-0.167°
  - SinCos® (Option F11)
    - Position resolution: 13.5Bit/Encoder sine period => 0.03107°/encoder resolution
  - Direct drives (F12)
    - Maximum position resolution:
      - Linear: 24 Bits per motor magnet spacing
      - Rotary: 24 bits per motor revolution
    - For 1 Vpp sine-cosine encoders (e.g. EnDat): 13.5 bits / graduation of the encoder scale. For RS422 encoders: 4x encoder resolution / encoder bypass possible Accuracy of the feedback zero pulse acquisition = accuracy of the feedback resolution. For analog hall sensors with 1Vpp signal: 13.5 bits / motor magnet spacing
- The accuracy of the position signal is above all determined by the type and exactitude of the feedback system used.

### Setpoint generator

- Jerk-limited ramps
- Travel data in increments, mm, inch or variable by scale factor
- Specification of speed, acceleration, deceleration and jerk

### Monitoring functions

- Power/auxiliary supply range
- Motor power stage temperature/stall protection
- Following error monitoring

## Supported Motor and Feedback Systems

Motors	
	<ul style="list-style-type: none"> <li>• Sinusoidally commutated synchronous motors                             <ul style="list-style-type: none"> <li>• Maximum electrical turning frequency: 1000 Hz</li> <li>• Maximum velocity at 8 pole motors: 15 000 min<sup>-1</sup></li> <li>• Maximum speed: 60*1000/number of pole pairs in min<sup>-1</sup></li> </ul> </li> <li>• Sinusoidal commutated asynchronous motors                             <ul style="list-style-type: none"> <li>• Maximum electrical turning frequency: 1000 Hz</li> <li>• Maximum speed: 60*1000/number of pole pairs - slip in min<sup>-1</sup></li> </ul> </li> <li>• 3 phase synchronous direct drives</li> </ul>

<b>Inputs and outputs</b>	<ul style="list-style-type: none"> <li>• 8 control inputs: 24 VDC / 10 kOhm</li> <li>• 4 control outputs: Active HIGH / short-circuit proof/ 24 V / 100 mA</li> <li>• 2 analog inputs (14 Bit)</li> <li>• 2 analog outputs (8 Bit)</li> </ul>
<b>Encoder simulation</b>	<ul style="list-style-type: none"> <li>• 4-16 384 increments per revolution</li> <li>• Limit frequency: 620 kHz</li> </ul>

## Safety Technology

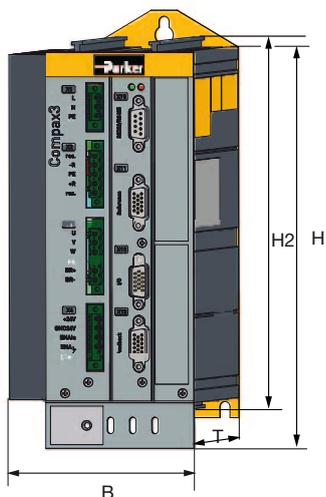

<b>Compax3S</b>	STO (Safe torque off) in accordance with EN ISO 13849:2008, category 3:PL=d/e. Certified: BG-PRÜFZERT
<b>Compax3M</b>	Optional state-of-the-art safety technology (EN ISO 13849-1:2007, category 3, PL=e)

## Standards and Conformance

<b>Insulation requirements</b>	<ul style="list-style-type: none"> <li>• Protection class in accordance with EN 60664-1</li> <li>• Protection against human contact with dangerous voltages: in accordance with EN 61800-5-1</li> <li>• Overvoltage: Voltage category III in accordance with EN 60664-1</li> <li>• Level of contamination 2 in accordance with EN 60664-1 and EN 61800-5-1</li> </ul>
<b>CE compliance</b>	<ul style="list-style-type: none"> <li>• Low voltage directive 2006/95/EC EN 61800-5-1, Standard for electric power drives with settable speed; requirements to electric safety EN 60664-1, isolation coordinates for electrical equipment in low-voltage systems EN 60204-1, Machinery norm, partly applied</li> <li>• EC-EMC-directive 2004/108/EC EN 61800-3, product standard for speed adjustable drives</li> </ul>
<b>UL certification</b>	<ul style="list-style-type: none"> <li>• UL conform according to UL508C <ul style="list-style-type: none"> <li>• Compax3S: Recognized Component Mark for Canada and the US</li> <li>• PSUP / Compax3M &amp; Compax3H: UL Listing</li> </ul> </li> </ul>
<b>RoHS compliance</b>	Available for Compax3S, Compax3M, Compax3F Complies with European Union Directive 2002/95/EC - Restriction of Hazardous Substances (RoHS)

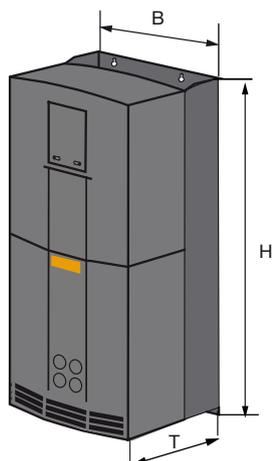

## Dimensions

### Compax3S

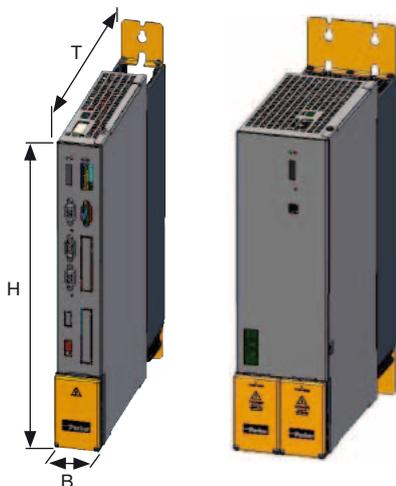

Device:	Dimensions [mm]				Weight [kg]
	H	B	T	H2	
<b>Compax3</b>					
S025V2	216	84	172	203	2.0
S063V2		100			2.5
S100V2		115			4.3
S150V2 / S150V4		158			6.8
S015V4	273	84	172	259	3.1
S038V4		100			3.5
S075V4		115			4.3
S300V4	380	175		391	10.9

### Compax3H

Device:	Dimensions [mm]			Weight [kg]
	H	B	T	
<b>Compax3</b>				
H050V4	453	252	245	17.4
H090V4	669	257	312	32.5
H125V4	720	257	355	41.0
H155V4	720	257	355	41.0

### PSUP & Compax3M

Device:	Dimensions [mm]			Weight [kg]
	H	B	T	
<b>Compax3</b>				
M050D6	360	50	263	3.5
M100D6	360	50	263	3.6
M150D6	360	50	263	3.6
M300D6	360	100	263	5.25
<b>Power module</b>				
PSUP10D6	360	50	263	3.95
PSUP20D6	360	100	263	6.3
PSUP30D6	360	100	263	6.3

### Housing

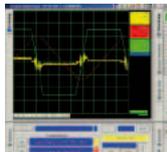

Insulation:  
VDE 0160 / Protection class IP20 in accordance with EN 60 529 (not for C3H1xxV4)

# Accessories and Options

## Software and Tools

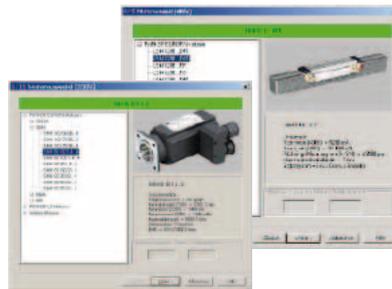

### C3 ServoManager

- Guided configuration
  - Automatic querying of all necessary entries
  - Graphical support
- Setup mode
  - Manual motion of individual axes
  - Predefined profiles
  - Convenient operation
  - Storage of defined profiles
  - Automatic determination of the moment of inertia
- integrated 4-channel oscilloscope
  - Signal tracking directly on the PC
  - Various modes (single/normal/auto/roll)
  - Zoom function
  - Export as image or table (for example to Excel)

### MotorManager

- Complete library for Parker motors
  - Integration of customer motors
  - Determination of motor characteristics and of the motor position feedback

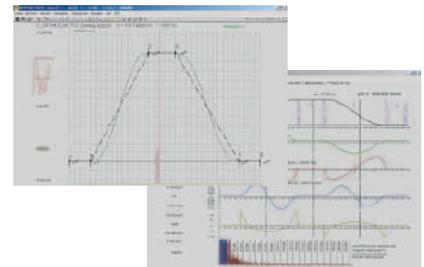

### HydraulicsManager

- Valve library for Parker valves
- Integration of customer valves

### CamDesigner

Cam creation tool

- Standard and expert mode
- Evaluation of the motion profiles
- Verification of the drive selection
- Transition laws from the VDI directive 2143

## Programming

### CoDeSys

CoDeSys is a development environment for programming that saves a significant amount of time as applications are created.

- Powerful developing environment, worldwide established
- Universal programming platform for various devices
- Complete offline simulation
- Visual elements
- Library management for user-defined applications
- Context-sensitive help wizard
- Data exchange between devices from different manufacturers
- Complete online functionality
- Sophisticated technological features
- Free of charge

### IEC 61131-3

IEC 61131-3 is the only company- and product independent programming language with world-wide support for industrial automation devices.

IEC 61131-3 includes graphical and textual programming languages:

- Instruction list
- Structured text
- Ladder diagram
- Sequential function chart
- Function block diagram
- Integrated standards offer:
  - a trusted programming environment
  - standardized programming
- Integrated standards reduce:
  - the overhead of development
  - maintenance costs
  - software upkeep
  - training overhead
- Integrated standards increase:
  - productivity
  - software quality
  - concentration on core competence

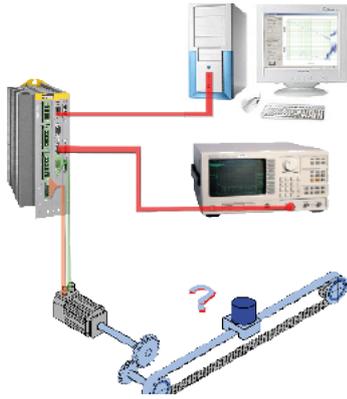

### PLCopen

PLCopen is an organization that plays a significant role in supporting the IEC 61131-3 programming language. It is independent of individual companies or products. Its specific tasks also include defining basic processes relevant to motion. The PLCopen organization consists of both users and manufacturers of automation components. Parker Hannifin is an active member of the "Motion Control" task force. This represents a great advantage to users of Parker drive technology, since they are constantly able to profit directly from the latest developments in PLCopen.

**Parker is a member of the "CoDeSys Automation Alliance"**

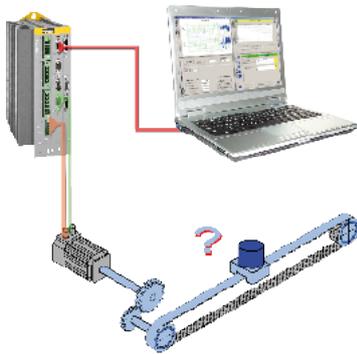

## Signal Analysis for the System Identification

### Formerly

#### Implementation prerequisites:

- Expensive and complex measurement technology required
- Special knowledge required
- Implementation only possible in an open control loop (=dangerous)

### Today

#### Implementation prerequisites:

- Implementation with a common PC
- Simple and safe operation with the Compax3 ServoManager Software
- No special knowledge required
- The safety functions implemented in the servo drive ensure safe measurement in a closed position control loop

## What purposes do the new functions serve?

### Analysis and optimization of the mechanical system

Transmission behavior of the mechanic system

- Simple measurement of the mechanic dynamic behavior, therefore:
  - Possibilities to improve the mechanic construction can be spotted.
  - Increased stiffness and precision of the entire system. (improved mechanic system = improved controller performance)

Modal analysis

- Vibration analysis of the mechanic construction by specification of a sinusoidal motor force with a defined frequency.
- It is often possible to work without additional excitation by electrodynamic shakers or pulse hammers.

### Analysis and optimization of the control

Transmission behavior of the mechanic system

- Better and faster controller optimization due to the knowledge of the transmission behavior of the control path.
- Specific suppression of disturbances at the mechanic resonance points with the aid of notch or low-pass filters.

Transmission behavior of the control

- Quality assessment of the control with respect to the response behavior:
  - In the time range by step response
  - In the frequency range by frequency response
  - Optimization of the control by application of stability criteria from the control theory (e.g. Nyquist criterion or Hurwitz criterion)
- Quality assessment of the control with respect to the disturbance behavior:
  - In the time range by the disturbance current - step response<sup>1</sup>
  - In the frequency range by measurement and analysis of the resilience - frequency response<sup>2</sup>

<sup>1</sup> Emulation of an external volatile change in the disturbance force.

<sup>2</sup> The compliance frequency response states the size of the control deviation caused by a disturbance force depending on it's frequency.

## Automation Operation and Monitoring

### Parker Operator Panel - Pop

We supplies operator panels for all text and graphical applications in industrial environments.

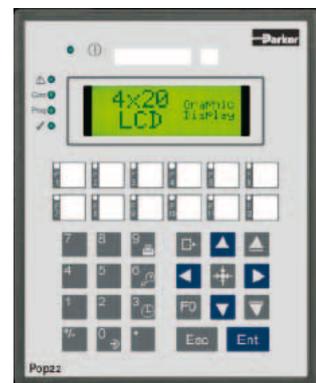

#### Text and graphics-oriented Operating Systems

- Pop12
  - 4 function keys with insertable labels
  - 5 user LEDs
  - Multi-lingual projects possible
  - Connection to various bus systems
  - RS232, RS422, RS485, CL20 mA, CANopen
  - 512 kB user program memory
  - Monochrome graphics display
  - 4 lines of 20 characters for text
  - Downloadable font
  - Scalable text

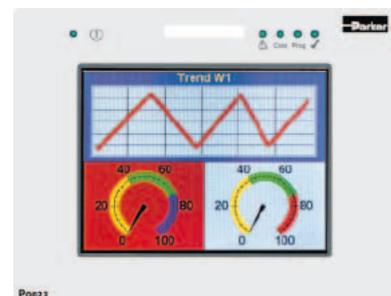

#### Operator panels with Graphics display

- Pop22
  - Monochrome graphics display
  - 4 lines of 20 characters for text
  - Downloadable font
  - 12 function keys with insertable labels
  - 13 user LEDs
  - Multi-lingual projects possible
  - RS232, RS422, RS485, CL20 mA, CANopen
  - 512 kB user program memory
  - 512 kB expanded memory
  - 32 kB recipe memory
  - Alarms, real-time clock, battery backup
- Pop23
  - 8 lines of 40 characters for text
  - 23 function keys
  - 24 user LEDs
  - Printer interface
  - 16 kB recipe memory
  - Alarms, real-time clock, battery backup

#### Visualisation with Touch-Screen

- Pop33
  - 1/4 VGA display (320x240 Pixel), 5.6" diagonal
  - 16 lines of 40 characters for text
  - Resistive touch screen
  - Can be connected to various bus systems
  - Multi-lingual projects possible
  - RS232, RS422, RS485, CL20 mA, CANopen
  - Printer interface
  - 32 kB recipe memory
  - Real-time clock, battery backup
  - Event list for alarms
  - Screensaver
  - LCD-Display STN Colour
  - 8 MB Flash memory on memory card

# Order Code

## Devices: Compax3

Order example	<b>C3</b>	<b>S</b>	<b>025 V2</b>	<b>F10</b>	<b>I10</b>	<b>T10</b>	<b>M00</b>	

### 1 Device family

**C3** Compax3

### 2 Device type

**S** Single axis  
**H** High power  
**M** Multi-axis device  
**F** Hydraulics controller (C3F001D2F12)

### 3 Device currents static/dynamic; supply voltage

#### Compax3S

**025 V2** 2.5 A / 5 A; 230 VAC (single phase)  
**063 V2** 6.3 A / 12.6 A; 230 VAC (single phase)  
**100 V2** 10 A / 20A; 230 VAC (3 phase)  
**150 V2** 15 A / 30 A; 230 VAC (3 phase)  
**015 V4** 1.5 A / 4.5 A; 400 VAC (3 phase)  
**038 V4** 3.8 A / 9 A; 400 VAC (3 phase)  
**075 V4** 7.5 A / 15.0 A; 400 VAC (3 phase)  
**150 V4** 15.0 A / 30.0 A; 400 VAC (3 phase)  
**300 V4** 30.0 A / 60.0 A; 400 VAC (3 phase) <sup>(1)</sup>

#### Compax3H

**050 V4** 50 A / 75 A; 400 VAC (3 phase)  
**090 V4** 90 A / 135 A; 400 VAC (3 phase)  
**125 V4** 125 A / 187.5 A; 400 VAC (3 phase) <sup>(2)</sup>  
**155 V4** 155 A / 232.5 A; 400 VAC (3 phase) <sup>(2)</sup>

#### Compax3M

**050 D6** 5.0 A / 10.0 A; 400 VAC (3 phase)  
**100 D6** 10 A / 20 A; 400 VAC (3 phase)  
**150 D6** 15 A / 30 A; 400 VAC (3 phase)  
**300 D6** 30 A / 60 A; 400 VAC (3 phase)

#### Compax3F

**001 D2** 24 VDC

### 4 Feedback

**F10** Resolver (not for C3F)  
**F11** SinCos© (Hiperface) (not for C3F)  
**F12** Encoder, Sine-cosine with/without hall

### 5 Interface

**I10** Step/direction / analog input (only I10T10)  
**I11** Positioning via inputs/outputs (only I11T11)  
**I12** Positioning via I/Os or RS232 / RS485 / USB  
**I20** PROFIBUS DP V0/V1/V2 (12 Mbaud)  
**I21** CANopen  
**I22** DeviceNet  
**I30** Ethernet Powerlink  
**I31** EtherCAT  
**I32** PROFINET  
**C20** C3 powerPLmC (Multi-axis control)

### 6 Technology function

**T10** Servo controller (only I10)  
**T11** Positioning  
**T30** Motion control programmable in accordance with IEC 61131-3  
**T40** Motion control programmable in accordance with IEC 61131-3 & electronic cam

### 7 Options

**M00** No additional supplement  
**M10** Extension by 12 digital I/Os & HEDA Motionbus (not for T10, T11, C20)  
**M11** HEDA Motionbus (not for T10, T11, C20)  
**M12** Extension by 12 digital I/Os (not for T10, T11, C20)

### 8 Optional safety technology for C3M

**S1** Safe torque off (furnished with the device)  
**S3** Extended safety technology

<sup>(1)</sup> Operation of the C3S300V4 with condenser module C4.

<sup>(2)</sup> external voltage supply for ventilator fan required. Available in two versions for single phase feed. Standard: 220/240 VAC: 140 W, on request: 110/120 VAC: 130 W

PROFIBUS and PROFINET are registered trademarks of PROFIBUS & PROFINET International (PI). EtherCAT® is a registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany.

## Accessories

### Power module: PSUP

	1	2	3	4	5	
Order example	<b>PSU</b>	<b>P</b>	<b>10</b>	<b>D6</b>	<b>USB</b>	<b>M00</b>

<b>1 Device family</b>	<b>PSU</b>	Power module
<b>2 Device type</b>	<b>P</b>	Power module
<b>3 Nominal power; supply voltage</b>	<b>10 D6</b>	10 kW; 400 VAC (3 phase)
	<b>20 D6</b>	20 kW; 400 VAC (3 phase)
	<b>30 D6</b>	30 kW; 400 VAC (3 phase) <sup>(1)</sup>
<b>4 Interface</b>	<b>USB</b>	USB connection
<b>5 Options</b>	<b>M00</b>	no additional supplement

<sup>(1)</sup> Operation of the PSUP30 only with mains choke  
Required line choke for the PSUP30: 0.45 mH / 55 A

**We offer the following mains chokes:**

**LCG-0055-0.45 mH**

(WxDxH: 180x140x157 mm; 10 kg)

**LCG-0055-0.45 mH-UL**

(with UL certification, WxDxH: 180x170x157 mm; 15 kg)

### Connection set for Compax3 and PSUP

Mating plug connector (furnished with the device)

	1
Order example	<b>ZBH02/02</b>

<b>1 Accessories</b>	<b>ZBH02/01</b>	for C3S0xxV2
	<b>ZBH02/02</b>	for C3S0xxV4 / S150V4 / S1xxV2
	<b>ZBH02/03</b>	for C3S300V4
	<b>ZBH02/04</b>	for C3F00xD2
	<b>ZBH04/01</b>	for C3M050D6, C3M100D6, C3M150D6
	<b>ZBH04/02</b>	for C3M300D6
	<b>ZBH04/03</b>	for PSUP10
	<b>ZBH04/04</b>	for PSUP20/PSUP030

### Display and diagnostics:

#### Operator control module BDM01/01

- Can be plugged in while in operation
- Supply via Compax3

### Operating Module

	1
Order example	<b>BDM01/01</b>

<b>1 Accessories</b>	<b>BDM01/01</b>	Operating module for Compax3S
----------------------	-----------------	-------------------------------

### Motor cable

	1	2
Order example	<b>MOK</b>	<b>55/02</b>

<b>1 Accessories</b>	<b>MOK</b>	Motor cable <sup>(2)</sup>
<b>2 Type</b>		for SMH / MH56 / MH70 / MH105 <sup>(3)</sup>
	<b>55/....<sup>(1)</sup></b>	(1.5 mm <sup>2</sup> ; to 13.8 A)
	<b>54/....<sup>(1)</sup></b>	1.5 mm <sup>2</sup> ; up to 13.8 A cable chain compatible
	<b>56/....<sup>(1)</sup></b>	(2.5 mm <sup>2</sup> ; to 18.9 A)
	<b>57/....<sup>(1)</sup></b>	2.5 mm <sup>2</sup> ; up to 18.9 A cable chain compatible
		for MH145 / MH205 <sup>(4)</sup>
	<b>60/....<sup>(1)</sup></b>	(1.5 mm <sup>2</sup> ; to 13.8 A)
	<b>63/....<sup>(1)</sup></b>	1.5 mm <sup>2</sup> ; up to 13.8 A cable chain compatible
	<b>59/....<sup>(1)</sup></b>	(2.5 mm <sup>2</sup> ; to 18.9 A)
	<b>64/....<sup>(1)</sup></b>	2.5 mm <sup>2</sup> ; up to 18.9 A cable chain compatible
	<b>61/....<sup>(1)</sup></b>	6 mm <sup>2</sup> ; up to 32.3 A cable chain compatible
	<b>62/....<sup>(1)</sup></b>	10 mm <sup>2</sup> ; up to 47.3 A cable chain compatible

MOK55 and MOK54 can also be used for linear motors LXR406, LXR412 and BLMA.

### Feedback cable

	1
Order example	<b>REK42/02</b>

<b>1 Accessories</b>		for MH/SMH motors
	<b>REK42/....<sup>(1)</sup></b>	Resolver cable <sup>(2)</sup>
	<b>REK41/....<sup>(1)</sup></b>	Resolver cable <sup>(2)</sup> cable chain compatible
	<b>GBK24/....<sup>(1)</sup></b>	SinCos© feedback cable <sup>(2)</sup> cable chain compatible
	<b>GBK38/....<sup>(1)</sup></b>	EnDat 2.1 feedback cable <sup>(2)</sup> cable chain compatible
	<b>GBK23/....<sup>(1)</sup></b>	Encoder cable <sup>(2)</sup>
		for linear motors
	<b>GBK33/....<sup>(1)</sup></b>	Feedback cable to LXR cable chain compatible
	<b>GBK32/....<sup>(1)</sup></b>	Feedback cable to BLMA cable chain compatible

<sup>(1)</sup> - <sup>(4)</sup> ... see page 34

**Order code for interface cables and connectors**

	1
Order example	<b>SSK01/01</b>

<b>1 Accessories</b>	
<b>SSK01/....</b> <sup>(1)</sup>	RS232 (PC-Compax3)
<b>SSK33/....</b> <sup>(1)</sup>	USB (PC-PSUP)
<b>SSK21/....</b> <sup>(1)</sup>	Ref / analog - with flying leads (X11, X13 @ C3F001D2)
<b>SSK22/....</b> <sup>(1)</sup>	Digital I/Os with flying leads (X12 / X22)
<b>SSK23/....</b> <sup>(1)</sup>	Ref /analog for I/O terminal block (X11)
<b>SSK24/....</b> <sup>(1)</sup>	Digital I/Os for I/O terminal block (X12, X22)
<b>SSK25/....</b> <sup>(1)</sup>	RS232 (PC-Pop)
<b>SSK27/./..</b> <sup>(6)</sup>	RS485 (C3-Pop for more than one C3H on request)
<b>SSK28/....</b> <sup>(5)</sup>	RJ45 crossover cable (C3 HEDA-HEDA, PC-C3 powerPLmC, C3M-C3M communication, PROFINET, EtherCAT, Ethernet Powerlink)
<b>SSK29/....</b> <sup>(1)</sup>	Encoder coupling of 2 axes (X11-X11)
<b>SSK31/....</b> <sup>(1)</sup>	Modem-Compax3 X10
<b>SSK32/20</b>	Adapter cable for C3H to SSK01 (15 cm furnished with the device)
<b>VBK17/01</b>	RS232 connection controller-programming interface (furnished with the device for C3H X10)
<b>BUS07/01</b>	Bus terminal connector (1st. and last C3 in the HEDA bus/or multi-axis system)
<b>SSL01</b>	PROFIBUS cable <sup>(2)</sup> not prefabricated (Length are pieces in metre)
<b>BUS08/01</b>	Profibus connector Plug with 2 cable inputs (1 arriving, 1 continuing PROFIBUS cable), as well as a switch for activating the terminal resistor.
<b>SSL02</b>	CAN Bus cable <sup>(2)</sup> not prefabricated; (Length are pieces in metre)
<b>BUS10/01</b>	CAN bus connector Plug with 2 cable inputs (1x arriving, 1x continuing CANbus cable), as well as a switch for activating the terminal resistor.

**DeviceNet**

A mating plug is included in the delivery. Additional information on DeviceNet wiring can be found under: [www.odva.org](http://www.odva.org).

**Length code for cables**

<sup>(1)</sup> Length code 1 (Example: SSK01/09 = length 25 m)

Length [m]	1.0	2.5	5.0	7.5	10.0	12.5	15.0	20.0	25.0	30.0	35.0	40.0	45.0	50.0
Order code	01	02	03	04	05	06	07	08	09	10	11	12	13	14

<sup>(2)</sup> Colors according to DESINA,

<sup>(3)</sup> With motor connector

<sup>(4)</sup> With cable eye for motor terminal box,

<sup>(5)</sup> Length code 2 for SSK28

Length [m]	0.17	0.25	0.5	1.0	3.0	5.0	10.0
Order code	23	20	21	01	22	03	05

<sup>(6)</sup> Order code: SSK27/nn/..

Length A (Pop - 1st. Compax3) variable (the last two numbers corresponding to the cable length code for example SSK27/nn/01)

Length B (1st. Compax3 - 2nd. Compax3 - ... nth. Compax3) fixed 50 cm (only if there is more than 1 Compax3, i.e. nn greater than 01)

Number n (the last two digits)

**Parker I/O System - PIO**

	1		2
Order example	<b>PIO</b>	-	<b>337</b>

<b>1 Series</b>	
<b>PIO</b>	Parker I/O system
<b>2 Fieldbus coupler</b>	
<b>337</b>	CANopen coupler
<b>347</b>	CANopen coupler ECO
<b>Bus terminals</b>	
<b>Digital inputs</b>	
<b>400</b>	2DI 24 VDC 3.0 ms
<b>402</b>	4DI 24 VDC 3.0 ms
<b>430</b>	8DI 24 VDC 3.0 ms
<b>Analog inputs</b>	
<b>456</b>	2AI ±10 VDC differential input
<b>468</b>	4AI 0-10 VDC S.E.
<b>480</b>	2AI 0-20 mA differential input
<b>Digital outputs</b>	
<b>501</b>	2DO 24 VDC 0.5 A
<b>504</b>	4DO 24 VDC 0.5 A
<b>530</b>	8DO 24 VDC 0.5 A
<b>Analog outputs</b>	
<b>550</b>	2AO 0-10 VDC
<b>552</b>	2AO 0-20 mA
<b>556</b>	2AO ±10 VDC
<b>System terminals</b>	
<b>600</b>	Bus terminal (required as terminal for each fieldbus node)
<b>602</b>	Power supply terminal 24 VDC
<b>Accessories</b>	
<b>PIO quick designation system</b> (designation indicators for manual labeling)	
501	White weiß
501 gelb	Yellow
501 rot	Red
501 blau	Blue
501	Grey grau
501	Orange orange
501	Light green hellgrün

## Braking resistors

	1	2
Order example	<b>BRM</b>	<b>05/01</b>

1 Accessories		
<b>BRM</b>	Braking resistor	
2 Type		
<b>05/01</b>	56 Ω / 0.18 kW <sub>cont.</sub> (for C3S063V2, C3S075V4)	
<b>05/02</b>	56 Ω / 0.57 kW <sub>cont.</sub> (for C3S075V4)	
<b>08/01</b>	100 Ω / 60 W <sub>cont.</sub> (for C3S025V2, C3S038V4)	
<b>10/01</b>	47 Ω / 0.57 kW <sub>cont.</sub> (for C3S150V4)	
<b>04/01</b>	15 Ω / 0.57 kW <sub>cont.</sub> (for C3S150V2, C3S300V4)	
<b>04/02</b>	15 Ω / 0.74 kW <sub>cont.</sub> (for C3S150V2, C3S300V4)	
<b>04/03</b>	15 Ω / 1.5 kW <sub>cont.</sub> (for C3S300V4)	
<b>09/01</b>	22 Ω / 0.45 kW <sub>cont.</sub> (for C3S100V2)	
<b>11/01</b>	27 Ω / 3.5 kW <sub>cont.</sub> (for C3H0xxV4)	
<b>13/01</b>	30 Ω / 0.5 kW <sub>cont.</sub> for PSUP10D6, for PSUP20D6 (2x30Ω parallel)	
<b>14/01</b>	15 Ω / 0.5 kW <sub>cont.</sub> for PSUP10D6 (2 x 15 Ω in series) for PSUP20, PSUP30	
<b>12/01</b>	18 Ω / 4.5 kW <sub>cont.</sub> (for C3H1xxV4, PSUP30)	

## Mains filter

For radio interference suppression and compliance with the emission limit values for CE conform operation.

	1	2
Order example	<b>NFI</b>	<b>01/01</b>

1 Accessories		
<b>NFI</b>	Mains filter	
2 Type		
<b>01/01</b>	for C3S025V2 or S063V2	
<b>01/02</b>	for C3S0xxV4, S150V4 or S1xxV2	
<b>01/03</b>	for C3S300V4	
<b>02/01</b>	for C3H050V4	
<b>02/02</b>	for C3H090V4	
<b>02/03</b>	for C3H1xxV4	
<b>03/01</b>	for PSUP10 Reference axis combination 3x480 V 25 A 6x10 m motor cable length	
<b>03/02</b>	for PSUP10 Reference axis combination 3x480 V 25 A 6x50 m motor cable length	
<b>03/03</b>	for PSUP20, PSUP30 Reference axis combination 3x480 V 50 A 6x50 m motor cable length	

## Motor output choke

For disturbance suppression when the motor connecting cables are long

	1	2
Order example	<b>MDR</b>	<b>01/04</b>

1 Accessories		
<b>MDR</b>	<b>Motor output choke</b> (for Compax3S, Compax3M >20 m motor cable)	
2 Type		
<b>01/01</b>	up to 16 A rated motor current	
<b>01/02</b>	up to 30 A rated motor current	
<b>01/04</b>	up to 6.3 A rated motor current	

## Condenser module

	1
Order example	<b>Module C4</b>

1 Accessories		
<b>Module C4</b>	Condenser module for C3S300V4	

## Inputs/Outputs:

### Terminal block: EAM06/..

For additional wiring of the inputs/outputs:

- Can be mounted in the control cabinet via top hat rail
- Connection EAM06/.. via SSK23/.. to X11, SSK24/.. to X12

## Terminal block

	1	2
Order example	<b>EAM</b>	<b>06/01</b>

1 Accessories		
<b>EAM</b>	Terminal block	
2 Type		
<b>06/01</b>	I/Os without luminous indicator (for X11, X12, X22)	
<b>06/02</b>	I/Os without luminous indicator (for X12, X22)	

# Compact Servo Drive - SLVD-N

## Overview

### Description

SLVD-N is the family of compact digital servo drives for brushless motors which, in addition to positioning applications with trapezoidal profile, electrical shaft, electronic cam, spindle orientation, simulator of stepper motor and torque control, holds a PLC inside able to talk to the most common industrial programming systems, giving a great freedom of use of the inputs and outputs. It also allows the development of additional configurations to the basic features of the drive, such as gains adjustment of the loop in relation to speed or space, torque monitoring used for tools etc.

The SLVD-N range is equipped with a serial interface RS422/RS485 allowing the operator to configure, monitoring, give commands to up to 32 units simultaneously. A CANbus interface is available both in communication mode and in real time mode with SBCCAN, DS301, DS402 protocols.

### Typical applications:

- Packaging machines
- Pick & place systems
- General purpose machines

### Features

- Torque/current/speed control
- Advanced manager of torque limits
- Management of speed windows
- Positioner
- Electric shaft
- Electronic cam
- Controls the motor torque with the addition of speed control
- Virtual master
- Internal PLC - programming according to IEC61131 (option)
- Configurable feedback
- Standard interface: RS422/485, CANopen
- Optional interface: EtherCAT
- Internal braking resistor
- Internal EMC filter for three phase power supply
- Safety: STO function optional

### Technical Characteristics - Overview

<b>Power supply</b>	200...230 VAC single/three phase (±10 %) 50-60 Hz (±5 %) - only TT/TN networks
<b>Control supply</b>	24 VDC (-0/+10 %)
<b>Overload</b>	200 % for 2 s
<b>Operating temperature</b>	0...45 °C
<b>Operating humidity</b>	<85 % non condensing
<b>Altitude</b>	1000 m asl with 1.5 % derating every 100 m, up to 2000 m
<b>Protections</b>	IP20
<b>International standards</b>	CE, UL, cUL

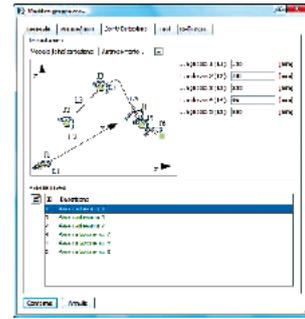

Model	Continuous current [A]	Peak current [A]	Size
SLVD1N	1.25	2.5	1
SLVD2N	2.5	5	
SLVD5N	5	10	
SLVD7N	7	14	
SLVD10N	10	20	2
SLVD15N	15	30	
SLVD17N	17	34	

## Typical Applications

### Industry: Robotics

#### Application: Painting robot

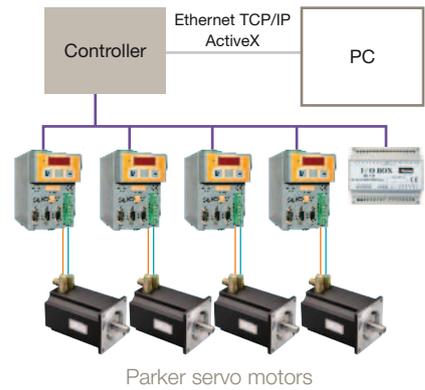

6/7 axes painting robot controlled by the SLVD-N servo drive. Full control of the machine is done with a dedicated motion controller and the remote I/O is managed over CANopen.

### Industry: Glass Industry

#### Application: Machining Centre

A 4 axis machine (x, y, z, mandrel) executing the following operations: drilling, threading and linear milling on materials of different types. The system comprises of 4 SLVD-N and 4 SMB motors. The control of the machine is via a dedicated motion controller. The remote I/O is controlled with CANopen protocol.

### Industry: Beverage Industry

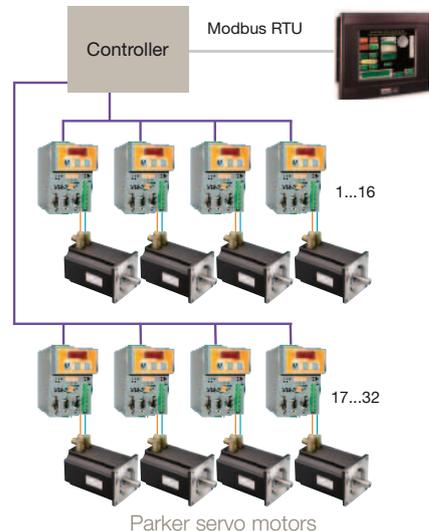

#### Application: Multi-head bottle capper

A multi-head machine able to cap bottles of different format. Each head, in order to reduce setup time, installs 2 SLVD-Ns, one dedicated to the vertical movement of the head depending on the carousel position and the other dedicated to the capping with preset torque. The machine is made of up to 16 heads with 2 SLVD-Ns each. The control of the machine based to a motion controller. The remoted I/O is controlled with CANopen protocol.

#### Multi-head bottle capper

A multi-head machine to cap bottles of different formats. Each head has 1 SLVD-N dedicated to cap fastening with torque control. The machine is made of up to 32 heads with 1 SLVD-N per head. The control of the machine based on a motion controller. The remote I/O is controlled with CANopen protocol.

# Technical Characteristics

## Technical Data

Model		SLVD1N	SLVD2N	SLVD5N	SLVD7N	SLVD10N	SLVD15N	SLVD17N

Max continuous external braking power	[kW]	1					2		
Max duty cycle (internal resistance)	[%]	1.20					1.10		

## SLVD-N Features

<b>Feedback</b>	<ul style="list-style-type: none"> <li>• Resolver (SLVD-N)</li> <li>• Encoder (SLVD-NE)</li> <li>• Encoder+Hall (SLVD-NH)</li> </ul>
<b>Auxiliary encoder input</b>	in quadrature
<b>Max frequency encoder input</b>	400 kHz
<b>RS422 encoder simulation output</b>	4...65 000 steps/rev
<b>Max frequency</b>	160 kHz
<b>Serial link</b>	RS422 / RS485
<b>Fieldbus</b>	CAN ISO/DIS11898
<b>Inputs / outputs</b>	<ul style="list-style-type: none"> <li>• 4 digital inputs 0...24 V</li> <li>• 2 digital outputs</li> <li>• 1 differential analog reference ±10 V</li> <li>• 1 differential auxiliary analog input ±10 V</li> <li>• 1 analogue output single ended ±4 V</li> </ul>
<b>Safety technology</b>	STO function optional - category 3 performance level in compliance with UNI EN ISO 13849-1- SIL capability 3 in compliance with CEI EN 61800-5-2, PL=e

## Electrical Characteristics

### Power supply

Model		SLVD-N
	<b>Unit</b>	<b>Control stage</b>
Supply voltage	[VDC]	24 V (-0...+10 %)
Max. ripple	[V <sub>pkpk</sub> ]	Do not go over the range
Current rating of the external power supply	[A]	1
Control electronics dissipation	[W]	15
EMC filter	-	internal
		<b>Power stage</b>
Mains frequency	[Hz]	50...60 ±5 %
Supply voltage (3-phase or 1-phase)	[VAC]	200...230 ±10 % (only for TT, TN mains)
DC voltage range	[VDC]	282...325 ±10 %
EMC filter	-	internal

## Environmental Characteristics

### Ambient conditions

<b>Temperature range</b>	<ul style="list-style-type: none"> <li>Operating temperature: 3K3 class, 0...+45 °C (+32...+113 °F)</li> <li>Storage temperature: 1K4 class, -25 ...+55 °C (-4...+131 °F)</li> <li>Transportation temperature: 2K3 class, -25 ... +70 °C (-13...+158 °F)</li> </ul>
<b>Humidity</b>	<ul style="list-style-type: none"> <li>Operating humidity: 3K3 class, 5...85 % without ice and condensation</li> <li>Storage humidity: 1K3 class, 5...95 % without ice and condensation</li> <li>Transportation humidity: 2K3 class, 95 % a 40 °C</li> </ul>
<b>Altitude (*)</b>	≤1000 m asl (≤3281 feet asl)
<b>Protection degree</b>	IP20 (only in close electric cabinet), UL open type equipment
<b>Pollution degree</b>	2 or lower (no conductive dust allowed)

\* For higher installation altitude, derate the output current by 1.5 % each 100 m up to 2000 m maximum

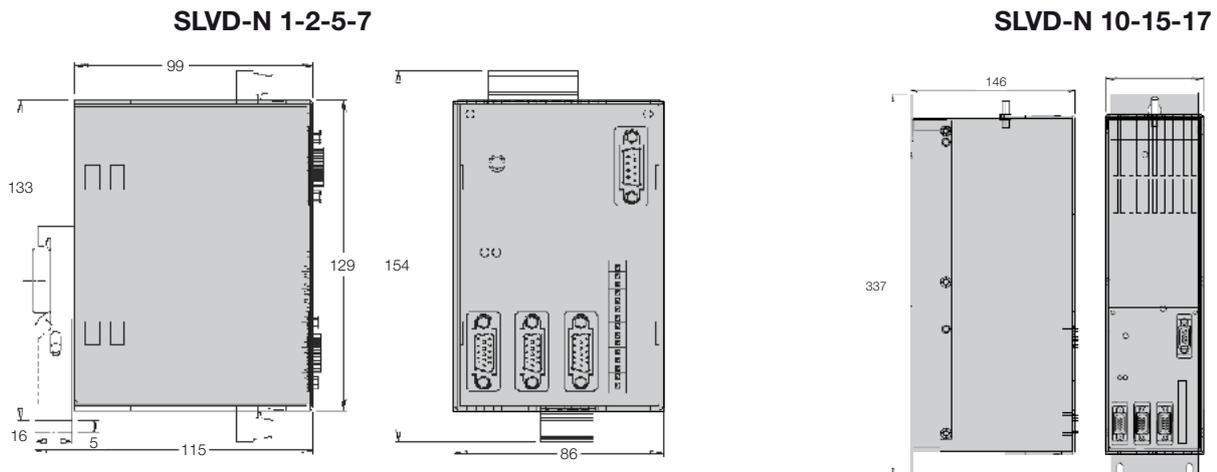

### Shock and vibration

IEC60068-2-6	Frequency [Hz]	Width [mm]	Acceleration [m/s <sup>2</sup> ]
	10 ≤ f ≤ 57	0.075	-
	57 < f ≤ 150	-	9.81

## Standards and Conformance

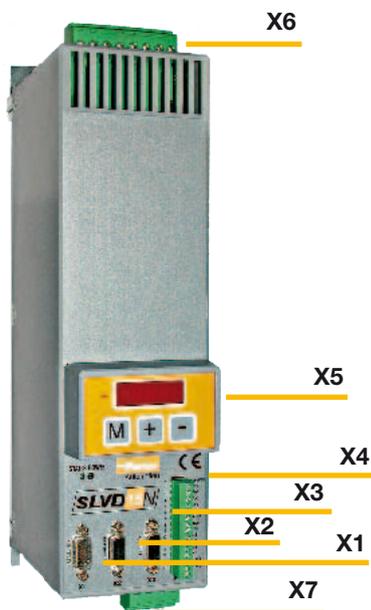

<b>Safety standards</b>	<ul style="list-style-type: none"> <li>2006/95/EC: Low voltage directive</li> <li>EN 61800-5-1: Adjustable speed electrical power drive systems - part 5-1: safety requirements, electrical, thermal and energy</li> </ul>
<b>Certification</b>	<ul style="list-style-type: none"> <li>UL: UL508C (USA) Power Conversion Equipment</li> <li>CSA: CSA22.2 Nr. 14-5 (Canada) Power Conversion Equipment</li> </ul>
<b>Electromagnetic compatibility</b>	<ul style="list-style-type: none"> <li>2004/108/EC: EMC directive</li> <li>EN 61800-3: Adjustable speed electrical power drive systems - part 3: EMC requirement and specific test methods</li> </ul>

## Dimensions

Model	Height [mm]	Width [mm]	Depth [mm]	Weight [kg]
SLVD-N 1-2-5-7	154	86	115	1.1
SLVD-N 10-15-17	337	87	146	3.1

## Connector Layout

X1	RS422/485 - CAN interface
X2	Encoder input/output
X3	Resolver/encoder configurable input
X4	4 digital inputs 0-24 V 2 digital outputs 1 differential analogue reference $\pm 10$ V 1 differential aux analog input $\pm 10$ V 1 analogue output single ended $\pm 4$ V
X5	Optional board connector (behind the keypad)
X6	Power terminal block
X7	DC bus terminal block

## Accessories and Options

### Keypad

SK158/L <sup>1)</sup>

Easy to use to program the functional data, control the status of the converter and send commands.

### I/O Expansion Module

SK135/S

- 16 in + 8 out
- SBCCAN interface

### Cables

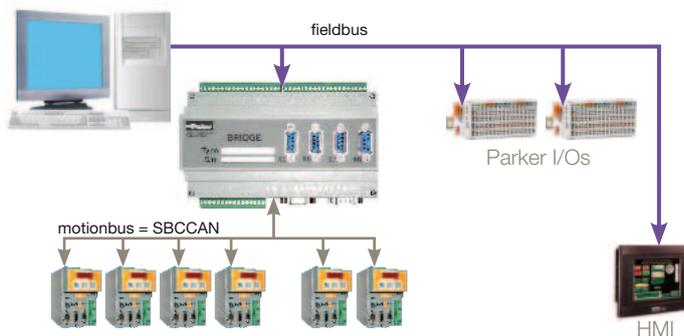

- Power and signal cables for resolver, incremental and absolute encoder and SinCos feedback
- Cable to connect a Bridge with several SLVD-N drives

### Network Bridge

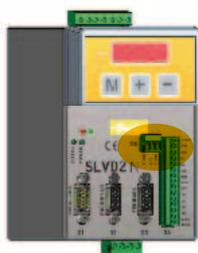

Interface protocol:

- DeviceNet
- Profibus DP

### Safety Option

Option "Safe Torque off" (STO) for all SLVD-N drives available

### EtherCAT Fieldbus

Applying industrial standard fieldbus systems enables the SLVD-N to be very versatile.

#### Option EtherCAT (E5, E6):

**Feature:** 1 EtherCAT option for up to 3 SLVD-N (requirement SLVD-N with EtherCAT protocol)

SLVD-N & EtherCAT box (option E5)

<sup>1)</sup> Not in combination with option E5

## Software

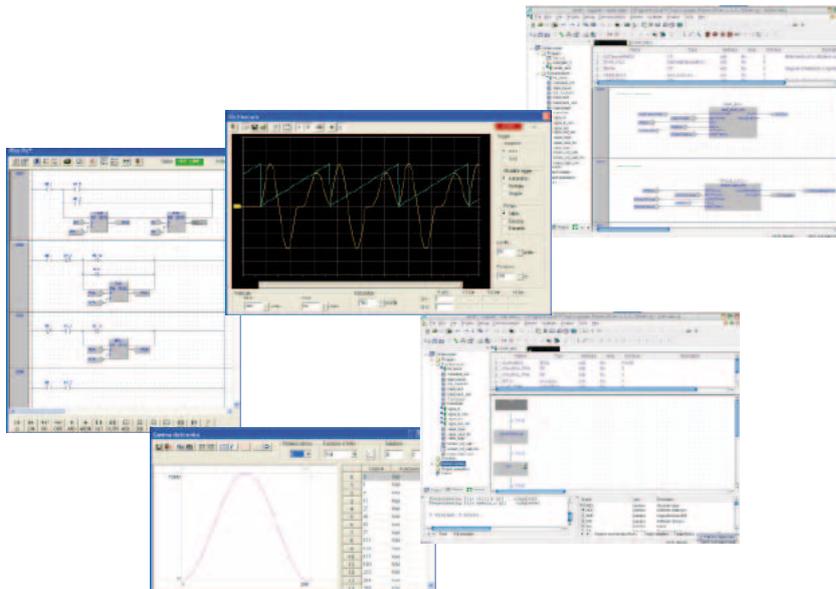

### MotionWiz and LogicLab

The free MotionWiz configuration software is available to configure the SLVD-N system with just a few clicks of the mouse. MotionWiz features an easy and "friendly" interface to speed up installation, optimisation and diagnostics procedures. To simplify configuration, MotionWiz shows a typical Windows® environment on the monitor with dialogue windows and toolbars.

MotionWiz permits performing operations in both "on line" mode, directly in the mechanism, and in "off line" mode in remote on the PC. In this case, personalised configuration can be sent to the mechanism subsequently.

To simplify the configuration of systems with a large number of axis but with different cuts and the same operating mode, MotionWiz permits maintaining the same mechanism configuration and only changing the type of selected motor. Inside the MotionWiz configurator is a database containing the data of standard Parker motors.

MotionWiz incorporates "picoPLC", a built-in PLC environment programmable with standard language. PicoPLC allows the external word to communicate with the drive and to execute function sequences. Should the custom application require additional computational resources, an option software environment can be used, programmable with PLC commands according to IEC61131-3.

# Triple Axis Servo Drive - TPD-M

## Overview

### Description

TPD-M is a multi axis system where each power module can supply up to three servo motors. The base configuration consists of a common DC bus supply (PSU) and multiples TPD-M modules, connected through DC bus bars.

The modules are available as one, two or three axis versions. This makes the system very flexible.

The TPD-M drive has been specifically designed for the Packaging OEM market but it can also be used in many other centralized automation structures which incorporate a large number of servo axes offering significant advantages.

TPD-M controls also induction motors with feedback or sensorless in V/f mode.

- Packaging machines
- Material forming machines
- Textile machines
- Paper and converting lines
- Plastics machines
- Machines tools

Motion control functionality is performed by means of EtherCAT Real Time CoE (CAN over Ethernet) communication, CAN / CANopen DS402 communication.

### Features

- The most compact multi-axis servo drive on the market
- Quick and simple wiring
- One, two or three axis versions combined in one housing
- Removable SD card
- Common DC bus connection for energy exchange between drives
- Feedback: Resolver, Hiperface and EnDat interface, Hall sensors, rotary and linear encoders
- New feedback: Hiperface DSL feedback ® Reduced cabling; only one cable connection between drive & motor
- Fieldbus: CANopen - standard, EtherCAT - option
- Serial link and CAN auto-address

Drives  
TPD-M

### Technical characteristics - Overview

TPD Axis	Continuous current [A <sub>rms</sub> ]	Peak current A (≤ 2 s)
3 axis	2 + 2 + 2	4 + 4 + 4
	8 + 5 + 5	16 + 10 + 10
2 axis	2 + 2	4 + 4
	5 + 5	10 + 10
	8 + 8	16 + 16
1 axis	15 + 5	30 + 10
	5/10/15/30	10/20/30/60

## TPD-M Overview

TPD-M has been developed for all applications where multiple drives are normally used and gives both OEMs and end users the opportunity to reduce build, configuration and operating costs, while boosting productivity and profitability.

Typical applications for TPD-M include packaging machines, material forming machines, textile, paper, converting and plastics machines, where large numbers of axes are required.

### Features and Benefits

#### Control cabinet space, size and cost savings

The integration of three servo power stages in a single housing offers machine builders the opportunity of having more compact control cabinets. Each TPD-M module is only 50 mm width (100 mm in the single axis 30 A version).

#### Reduced system complexity

The complexity of the system is significantly reduced due to the following benefits:

- Fewer components (cables, connectors, filters and braking resistors)
- Fewer communication interconnections between devices
- Centralized filtration and braking resistance

#### Reduce setup and maintenance costs

Due to the modular nature of TPD-M, machine design is much more straight forward. Additional axes can be added easily, simply by reproducing schemes from other existing axes. Programming time is reduced as only one drive unit needs to be configured.

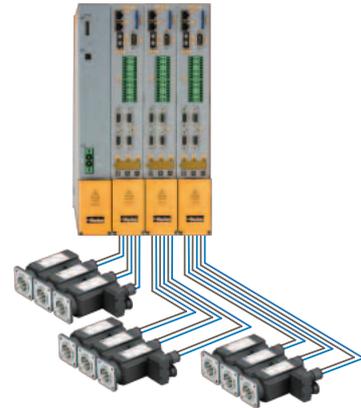

#### Efficient power control

TPD-M works on a common DC bus power supply that allows the system to absorb and re-supply much of the braking energy to other TPD-M units rather than dissipating it in the form of heat via external resistors. In some instances, resistors can be removed completely and in others smaller resistors are required.

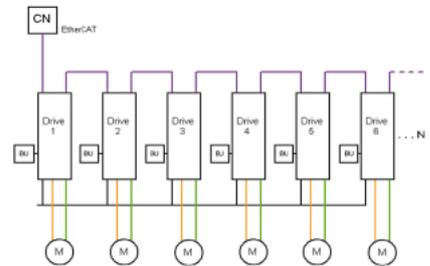

#### Standard Version

TPD-M servo drives is available as one, two or three axis versions. As standard TPD-M is supplied with:

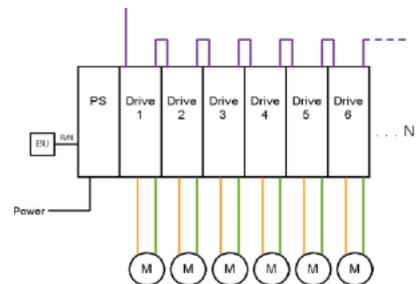

- CANopen
- STO functionality
- Digital and analog inputs/outputs
- Mechanical brake control

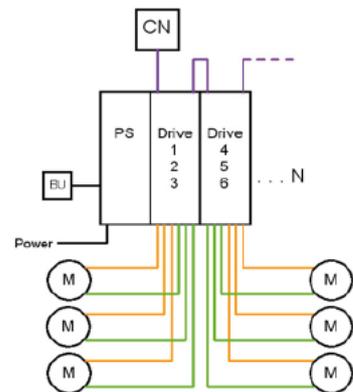

TPD-M system with Parker servo motors

Traditional solution: one drive for each axis

Rack solution: one drive for each axes in a rack solution

TPD-M solution: one drive for three axis in a rack solution. Only one Power Supply

# TPD-M Overview

## Application

TPD-M servo drive is particularly suitable for all centralised automation systems, such as those found in many packaging machines, where large numbers of drives are often required.

- Packaging lines
- Material forming machines
- Textile machines
- Paper and converting lines
- Plastics machines
- Machine tools

---

## Functionality

Additional features of TPD-M include an USB interface for configuration and setup plus a standard SD card interface for storing system parameters.

TPD-M can be integrated into a larger hybrid motion solution (centralized and decentralized) using Parker Motornet DC system.

---

## Options

The capabilities of TPD-M can be further enhanced with numerous options which are available upon request, including:

- EtherCAT communication
- Hiperface DSL® feedback
- Braking resistors
- Additional inputs/outputs

---

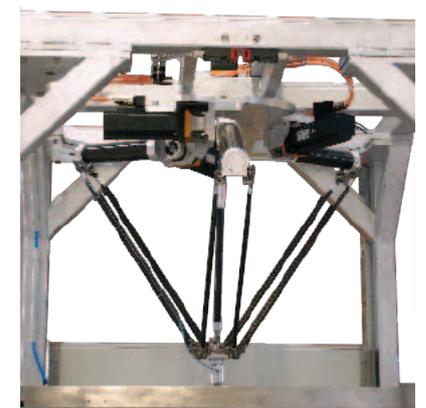

## Safety technology

TPD-M supports the "Safe Torque Off" (STO) safety function in the sense of the "Safe Stop", with protection against unexpected startup according to the requirements EN ISO 13849-1 Category 3.

Together with the external safety control device, the "safe stop 1" (SS1) safety function according to the requirements of EN ISO 13849-1 category 3 can be used.

Switching off the motor torque must be effected by the machine controller.

According to a risk analysis which must be carried out according to the machine standard 89/392/EWG or EN 292; EN ISO 13849-1 and EN 1050, the machine manufacturer must project the safety system for the entire machine including all integrated components. This does also include the electrical drives.

### Connector Layout

## Accessories and Options

### Hiperface DSL® Feedback

#### Description

The Single Cable Servo Drive System from Parker is a combination of the low inertia servo motor SME and the triple axis servo drive TPD-M based on the Hiperface DSL® digital feedback technology. The encoder feedback communication is fully integrated into the motor power cable and thus no separate feedback cable between drive and motor is required.

The new feedback system is a purely digital encoder communication protocol with exceptional performance. The absolute position determination, a resolution of up to 20 bit per turn, as well as 4096 maximum rotations, is unique in it's class.

The System is completed by the multi-axis servo drive TPD-M which represents one of the most compact solutions on the market giving the possibility of controlling up to three single cable SME servo motors with one 50 mm drive module.

Therefore, the Single Cable Servo Drive System from Parker is a bespoke solution to provide machine builders with lower cabling and installation cost and the possibility to reduce control panel size and machine footprint.

TPD-M triple axis servo drive connected to SME motors via Hiperface DSL® interface: One cable per servo motor instead of two.

#### Feedback-Features

- One cable connection between drive and motor instead of two
- No need for separate feedback cable and connector
- Fully digital and interference-free communication
- Synchronous, bidirectional, multi-channel
- Easy setup and reduced wiring

#### Applications

- Packaging Machinery
- Material Handling
- Machine Tools
- Robotics
- Paper & Converting

## Configuration Software - MotionWiz

MotionWiz is free of charge downloadable configuration software that allows users to configure and optimise the TPD-M series with a few easy clicks of the mouse.

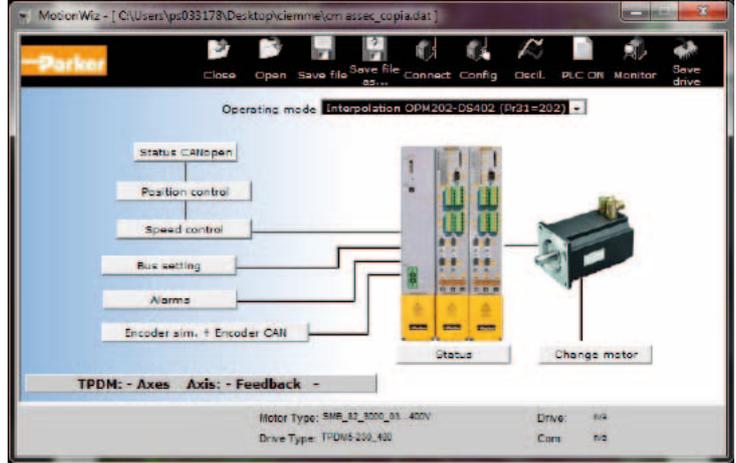

MotionWiz features an intuitive, easy and simple to use Windows® style environment to aid installation, optimisation and diagnostic use.

MotionWiz permits operation in both “on line” mode, directly in the controller, and in “offline” mode, remotely on the PC before downloading to the controller.

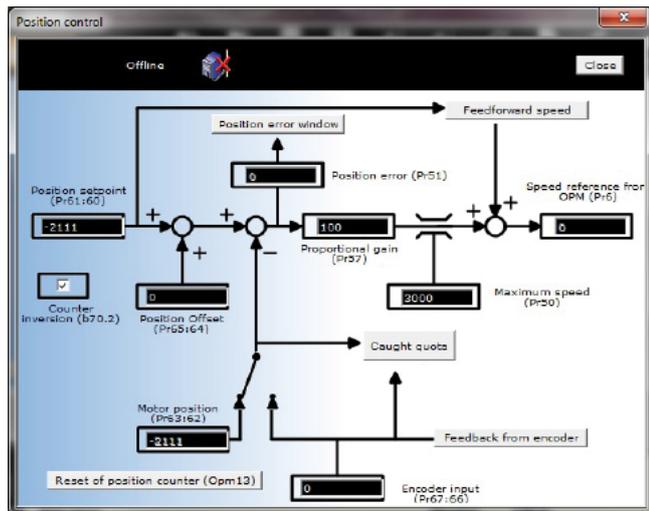

To simplify the configuration of systems with a large number of similar axes but with different motion profiles, MotionWiz allows users to copy the configuration from one application to another.

Inside the MotionWiz configurator is a database containing the technical characteristics of the full range of Parker motors and drives.

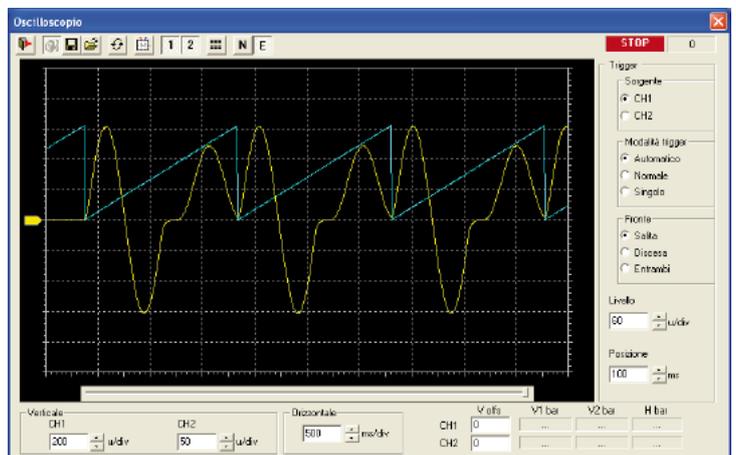

MotionWiz can be downloaded at [www.parker.com/eme/tpdm](http://www.parker.com/eme/tpdm)

MotionWiz: General settings

MotionWiz: Position control

MotionWiz Oscilloscope: Real speed & torque trends

# Brushless Servomotor with Integrated Servo Drive - Motornet DC

## Overview

### Description

Motornet DC is a brushless servomotor system with integrated servo drive, supplied from a DC-bus voltage. Hybrid power, control and communications cables, a Power supply and Interface module complete the system and local I/O's can be connected directly to the motor.

Ideally suited to multi-axis applications where a number of motors are mounted in close proximity on the machine, Motornet DC allows a decentralized approach to motion control to be taken.

- **Packaging Machines**
- **Rotary Tables**
- **Filling, bottling and capping machines**

Motion control functionality is executed by means of EtherCAT communication or optionally CANopen DS402 communication.

### Features

- **Feedback: Resolver / EnDat (optional)**
- **Fieldbus: EtherCAT**
- **2 digital Inputs / 2 digital Outputs**
- **Protection level: IP64 standard, IP65 / IP67 (optional)**
- **STO (optional)**
- **CAN Service Bus**

### Technical Characteristics - Overview

Inertia without brake [kgmm <sup>2</sup> ]		30.2	100	504

### Typical System Architecture

## Motornet DC System

### Description

The next logical evolution in machine motion control, Motornet DC integrates servo control electronics into a brushless servomotor creating a self-contained motor and servo controller. This offers considerable benefits in terms of machine design by allowing a decentralised motion control architecture to be used. This in turn allows substantial savings in time and materials to be realised, while reducing machine footprints.

Typical applications for Motornet DC include packaging machines and rotary tables where numerous motors are mounted on the machine.

Motornet DC

### Features and Benefits

#### Quick and simple machine configuration and reduced wiring

The hybrid cabling solution, which contains all power supply, control and communications signalling offers machine builders a number of benefits including:

- Simplified plug and socket connections at the motor
- Reduced number of connections and potential points of failure
- Reduced wiring time and cost of associated cabling

#### Reduced machine footprint

With a power supply and PSI Interface module being the only additional components required in the cabinet, the electronics footprint is up to 70 % smaller than traditional centralised solutions. Additionally, all wiring changes are made on the machine via plug and socket connections rather than in the electrical cabinet.

#### Modular machine design

Because of the modular nature of Motornet DC, machine design becomes very easy. Additional axes can be added with very little effort, simply by duplicating schematic drawings from other axes. This not only reduces engineering time and costs, but simplifies build and significantly improves time to market.

#### Efficient power control

Motornet DC works on a common DC bus power supply that allows the system to share much of the braking energy to other Motornet DC units rather than dissipating it in the form of heat via external resistors. In some instances, the resistor can be removed completely and in others a smaller resistor is required.

PSUP - Power Supply Unit and  
PSI - Power Supply Interface for  
Motornet DC

## Application

Motornet DC is ideally suited to applications where a number of motors are mounted in close proximity on a machine, such as a filling machine. In this case, the reduced cabling and electronics allow a much smaller physical footprint for the machine to be developed. Motornet DC is suited to packaging lines in general as the plug and play nature of its cable architecture allows new machine modules to be easily added or removed without considerable rewiring cost being incurred.

- **Packaging lines**
- **Rotary tables**
- **Filling, bottling and capping machinery**

## Functionality

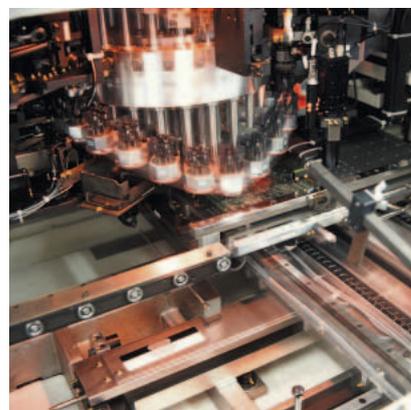

Motornet DC offers full motion control and is designed to complement the existing Parker servo drive and motor product range. Being flexible in its configuration, Motornet DC can be used to provide repeatable and accurate motion control for a wide range of applications and can be integrated into a larger hybrid motion solution.

## Standard Version

Available in flange sizes of 60 mm, 70 mm and 100 mm with continuous torque ratings of 0.9 to 7.5 Nm and motor speeds up to 6000 min<sup>-1</sup>. Motornet DC can be configured to suit the needs of any number of applications with a range of options. As standard Motornet DC is supplied with:

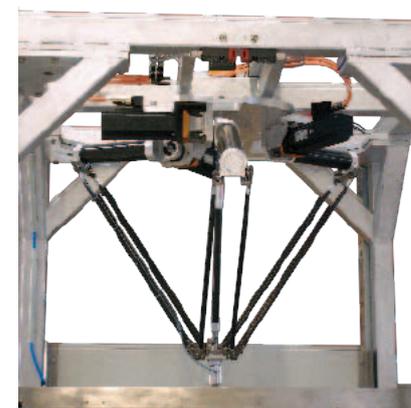

- **EtherCAT**
- **Localised I/O - 2 digital inputs and 2 digital outputs**
- **Resolver feedback**
- **CAN Service Bus**

## Options

The capabilities of Motornet DC can be further enhanced with numerous options which are available upon request, including:

- **IP65 protection for harsh environments**
- **Safe Torque Off (STO) functionality**
- **CANopen DS402 communication in place of EtherCAT**
- **Encoder feedback**
- **Holding brake**

## Configuration Software - MotionWiz

MotionWiz is free of charge downloadable configuration software that allows users to configure and optimise the Motornet DC series with a few easy clicks of the mouse.

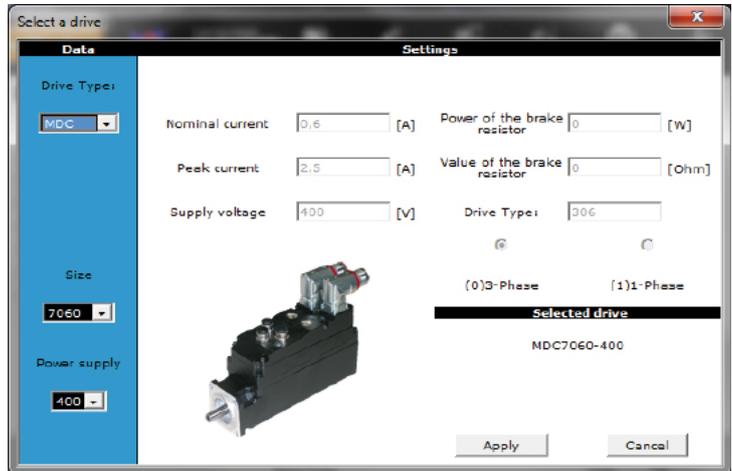

MotionWiz features an intuitive, easy and simple to use Windows® style environment to aid installation, optimisation and diagnostic use.

MotionWiz permits operation in both "on line" mode, directly in the controller, and in "offline" mode, remotely on the PC before downloading to the controller.

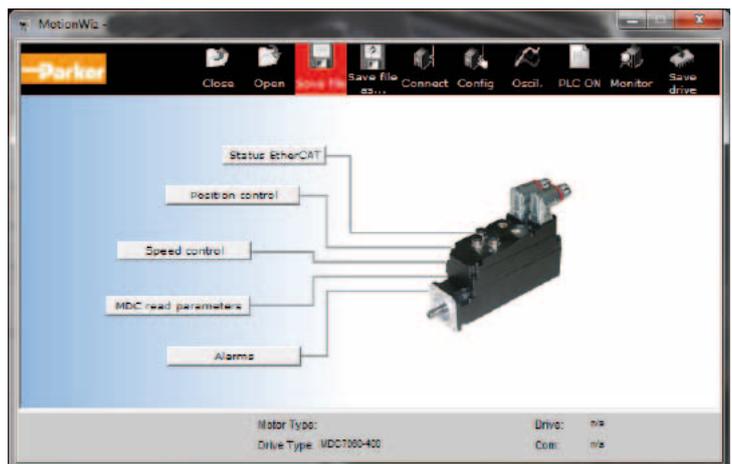

To simplify the configuration of systems with a large number of similar axes but with different motion profiles, MotionWiz allows users to copy the configuration from one application to another.

Inside the MotionWiz configurator is a database containing the technical characteristics of the full range of Parker motors and drives.

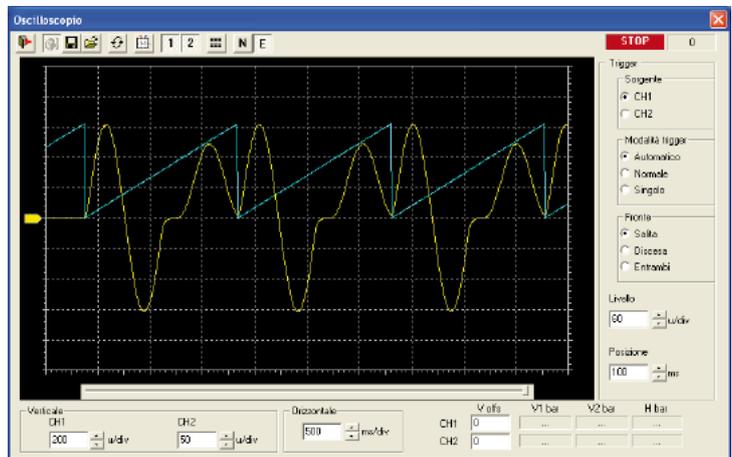

MotionWiz can be downloaded at [www.parker.com/eme/motornet](http://www.parker.com/eme/motornet)

MotionWiz: Motor's size selection

# Hybrid Integrated Motion Solutions

Drives  
Motornet DC

In this example Motornet DC is shown in a system which also uses the TPD-M series servoamplifier, SMB/H series servomotors, InteractXpress series HMI and PIO series I/O to form a complete integrated hybrid motion solution. This type of architecture can be used for the complete control of packaging or process lines.

# Flexible Servo Drive - Hi-Drive

## Overview

### Description

Hi-Drive is a fully digital drive for brushless motors with currents from 2 to 450 A and operating from 230 VAC or 480 VAC supplies. Hi-Drive is able to control induction motors; its target market is where high precision, accuracy, performance, fieldbus connectivity and custom applications are required.

Hi-Drive features several built-in motion control functions, including current, torque and speed control, positioning with trapezoidal profiles, digital lock with variable ratio and phase correction, electronic cam, real-time mode, S-ramp positioning, homing functions and position capture.

An axis card with Power PC 400 MHz micro processor which is able to control up to 32 interpolated axes via CANopen DS402, further enhances the Hi-Drive functionality.

The Hi-Drive series is suited for simple as well as extremely sophisticated applications such as: Printing machines, wood and metal working machines, feeders, palletizers, applications with different interpolated axes and robots.

### Features

- Current, torque and speed control
- Positioner with trapezoidal profile and S-ramps
- Digital lock with variable ratio and phase correction
- Electronic cam
- Configurable feedback input
- Configurable second encoder input
- Fieldbus RS232, RS422/485, SBCCan, EtherCAT, CANopen DS402
- DC bus connection to clamping board is possible (mono or three-phased)
- Built-in braking resistor (to 45 A)
- Safety relay optional CAT.3 EN 954-1
- Built-in EMC filter: HID2...HID10, HID75...HID450
- Built-in three-phased line choke (HID75...HID155)

### Technical Characteristics - Overview

Device	Nominal current [A]	Peak current [A]	Peak current time [s]	Frame size
HID2	2	4	2	1
HID5	5	10		
HID8	8	16

HID155	155	232		
HID250	250	375		
HID450	450	675	-	

## Applications

### Trajectory control of a six axis vertical robot

This is a six axis vertical robot that drives the globe in order to direct a laser pointer on the desired city, selected from the onboard operator panel or from a remote interface. The application is driven by six servo drives, controlled by a CN board integrated in one of the drives. In the board resides the interpolation and transformation part of the robot coordinates. The data for the optimized trajectory are transmitted to the individual axes via CANopen with DSP402 profile, at defined times by the sync protocol. In order to reach motion uniformity, the controller card transmits the demand speed together with the optimized motion data. Thus, every servo drive can internally execute a cubical interpolation of the information received. Moreover at every synch the real CN quota are sent back to the six joints.

The human-machine interface is represented by an industrial PC. By the PC, the operator choose in a graphical globe the city it wants to reach and gives the start/stop command.

## Accessories and Options

### Keypad

SK161

Optional keypad, size 2x6 characters with upload/download functions (port RS232)

### Cables

- Resolver cable
- Incremental encoder cable
- Absolute encoder EnDat + SinCos cable
- Absolute encoder Hiperface + SinCos cable
- Encoder SinCos cable
- Motor cable
- Servoventilation cable

### Fieldbus Options

By selecting one of the numerous fieldbus options the Hi-Drive becomes a highly versatile networked drive. EtherCAT based on the Ethernet industry standard, has been implemented within the Hi-Drive to exploit operating performance of industrial PC's.

- EtherCAT
- CANopen (DS402)
- Profibus DP
- SBCCan (standard)

EtherCAT®

CANopen

PROFI®  
BUS

## Axis Board

### High performances CN

This board is an axis controller which can be integrated into the Hi-Drive in order to increase the servo drive performance.

The board can generate trajectories of "n" interpolated axes with a low dissipated power, piloting the slave axis via CANopen DSP402.

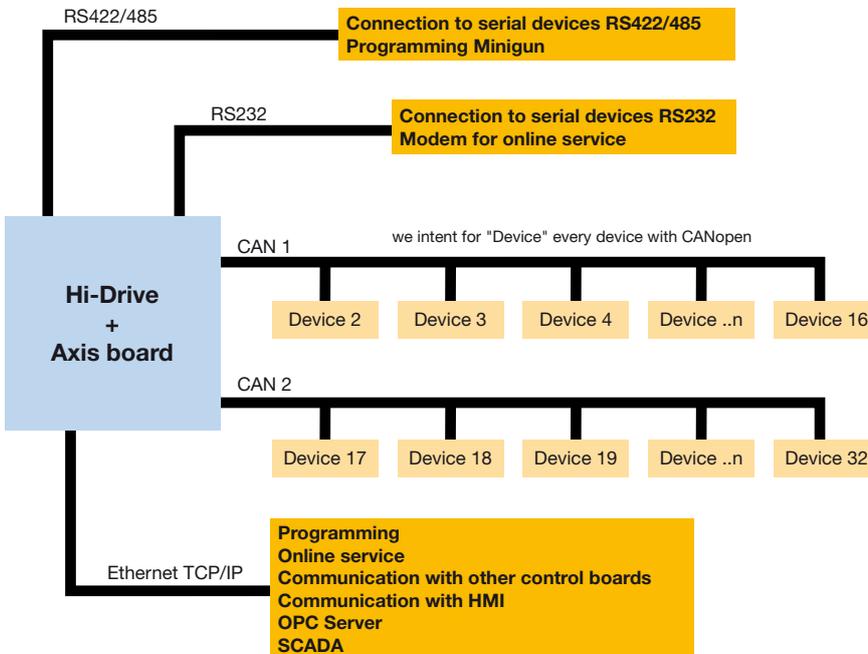

Managing resident I/O and field bus remote I/O the CN board can be linked to the plant network or to any operator panels via Ethernet TCP/IP. The board is equipped with an embedded OPC server.

Equipped with a multitasking real time operating system and can be programmed using standard programming and motion control languages.

- Power PC 400 MHz microprocessor
- Real time multitasking RTE operating system
- Cycle tasks, event control and background
- Interpolation of up to 32 axes for CPU
- CANopen DS402 communication channels
- Libraries with a wide range of function blocks
- 64 MB RAM, 128 MB extractable flash memory and 128 kB EEPROM
- RS232, RS485 and Ethernet

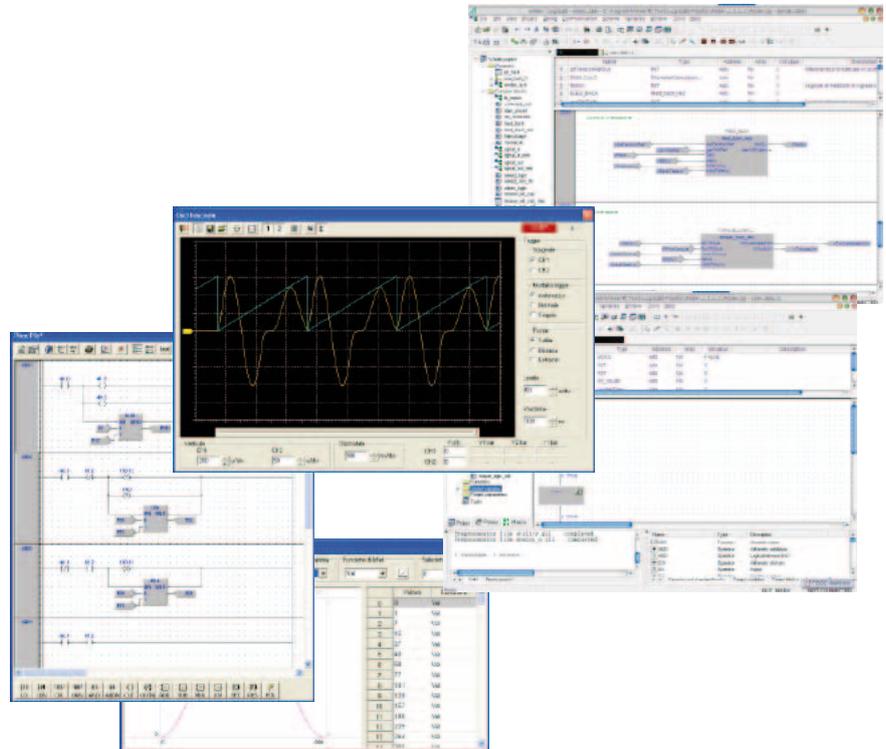

Programming language	
Structured text	for motion control functions
Ladder diagram	for machine cycles programming
ISO	for tool machines programming
RHLL	for robot programming

## Software

### MotionWiz and LogicLab

The free MotionWiz configuration software is available to configure the Hi-Drive system with just a few clicks of the mouse. MotionWiz features a simple and user-friendly interface to speed up installation, optimization and diagnostics procedures. To simplify configuration, MotionWiz shows a typical Windows® environment on the monitor with dialogue windows and toolbars. MotionWiz permits performing operations in both "online" mode, directly in the device, and in "offline" mode on a remote PC. In this case, personalized configuration can be sent to the mechanism subsequently. To simplify the configuration of systems with a large number of axis but with different cuts and the same operating mode, MotionWiz permits maintaining the same mechanism configuration and only changing the type of selected motor. Inside the MotionWiz configurator is a database containing the data of standard Parker motors. MotionWiz incorporates "picoPLC", a built-in PLC environment programmable with standard languages. PicoPLC allows the external word to communicate with the drive and to execute function sequences. If the customer application requires additional calculation resources, an option board programmable with PLC commands in accordance with IEC61131-3 can be inserted.

# Servo Drive - 638 Series

## Overview

### Description

638 series servo drives are suitable for all servo applications, from simple speed or current control to most complex positioning applications. The processor of 638 series servo drives gives a rapid response time to the control circuits of 105 µs. Numerous expansion slots allow 638 series servo drives to reach a high degree of versatility, opening access to a wide variety of fieldbus communication and feedback sensors options.

### Features

- Integrated motion controller
- 230 or 400 VAC direct power supply
- STO: Safety torque off in accordance with EN13489-1 Category 3, Performance Level d and EN1037 as standard
- Ultra-fast control loops (105 µs)
- Embedded PLC functions
- Programmable electronic cam
- 3 configurable trajectory generators
- Multi-axis synchronization through process bus
- Numerous fieldbuses options
- Hiperface and SSI encoder inputs options
- Optional flash memory chip for data storage
- Simple commissioning and programming Software

## Accessories

### EASYSRIDER Software

EASYSRIDER is a graphical software for the 630 series providing a single user interface for accessing all drive parameters, programming motion and calibrating the drive. This unique assistant offers an autopilot mode helping user in all phases of application set-up: from the choice of the motor in the motor library to the drive auto adjustment. All set-up steps are extremely simplified. EASYSRIDER gives also the possibility to develop advanced motion in an intuitive way using its BIAS language.

### Features

- Intuitive and easy use
- Set-up assistant
- Integrated motor library
- Oscilloscope function
- Drive and fieldbus diagnostic
- Drive advanced programming

# Micro Servo Drive - ViX

## Overview

### Description

The freely-programmable, intelligent ViX servo drive delivers high levels of functionality and flexibility in programmable motion control. With an output in the 250-500 VA power range, ViX uses field-oriented digital control technology, to give enhanced dynamic performance with improved efficiency. Housed within an extremely compact case, ViX is suitable either for direct panel mounting or for attachment to a standard DIN rail.

The ViX drive is produced in two versions having continuous current ratings of 2.5 A and 5 A at motor bus voltages up to 80 V. A peak current capability of three times the continuous rating provides an outstanding acceleration performance. The device offers the choice of either resolver or encoder feedback (user selectable). To assist with initial commissioning, the drive can correct most motor and feedback wiring errors automatically.

### Features

- Fully digital design
- Field-oriented control for improved dynamic performance
- Panel or DIN rail mounting
- 2.5 A & 5.0 Arms
- 80 V DC Bus
- Built-in controller using Parker's proven EASI code
- Powerful EASI-V front-end software
- Programmable resolution
- Optional CANopen/RS485 interface
- Automatic standby current reduction
- Compact size
- Compatible with Parker servo motors

## Product Description

A powerful front-end software package is supplied with the drive and permits straightforward, rapid configuration and tuning. When used with Parker servo motors, only the motor type number is required for full configuration.

ViX intelligent drives incorporate a powerful controller using Parker's well-proven EASI command language. As well as carrying out all basic motion control functions, the controller performs more advanced operations such as external encoder following and registration moves. All necessary configuration is performed by software. In addition to an RS232C interface which is included in the standard drive, an optional factory-installed fieldbus module allows for both CANopen and RS485 communication. The base version of the drive can be controlled by step-direction signals in addition to an analog velocity or torque demand. ViX forms part of a new, fully-integrated system of motion control components which includes digital servo and stepper drives, power supplies, operator panels and extension I/Os. These components complement Parker's range of mechanical positioning systems which includes precision tables, electric cylinders and linear actuators.

### Digital technology

The operating core of the ViX drive is based on a powerful digital processor. Armed with information about the motor and drive parameters, the processor is able to set the operating conditions in the current loop with a high degree of precision. In this way the bandwidth of the torque amplifier can be optimized for the specific configuration, allowing a wide range of motors to be accommodated without compromising on performance. In addition, set-up is virtually instantaneous without the need to adjust multiple parameters. The relevant data for Parker high-performance servo motors is held in a database within the EASE-V software package.

### Flexible communication options

ViX is supplied as standard with an integral RS232 communication interface. To keep the wiring as simple as possible, dual RJ45 connectors on the underside of the drive provide a built in daisy-chaining facility. The last drive in the chain automatically detects that no more units are connected and creates a loop return back to the host controller. Optional built-in modules provide both RS485 and CANopen communication to allow for integration within Fieldbus systems.

### Powerful, user-friendly configuration software

ViX series drives utilize Parker's EASI-V software package, a comprehensive front-end tool for system configuration and tuning. This Windows™-based software incorporates wizard-guided set-up procedures using simple click-entry screens. Configuration is simple and straightforward. Entering the data for Parker servo motors could not be easier - simply select the motor from a pull down menu. Other motors may be used by entering the relevant parameters.

## Dimensions

### ViX servo drive

Dimensions [mm]

#### Mounting

vertical mounting, min. clearance 50 mm above & below drive, 10 mm each side panel  
mounting standard, DIN rail adaptor available

## Accessories and Options

Parker offers a range of accessories for ViX drives including mating connector sets, motor cables and a DIN rail mounting kit. The range will be extended to include operator panels and I/O expansion modules.

### Power module: VXLPSU240 and VXLPSU960

The Parker power supply offers a convenient way of powering a ViX servo drive. The continuous rated output is 240 W at 230 VAC input and supplies the 80 V main DC rail and operates directly from all AC supplies between 90 V and 264 V. No external EMC filters are required unless the motor leads are exceptionally long (e.g. greater than 30 m).

#### Technical characteristics

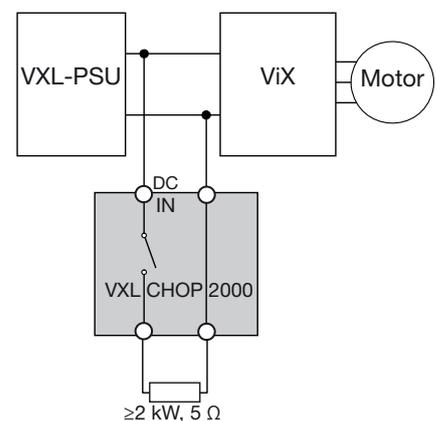

Power module:	VXLPSU240	VXLPSU960
AC input voltage, nominal (absolute limits)	115...230 VAC, 1phase (90...264 VAC)	400...500 VAC, 3phase
DC voltage	80 VDC, 3 A	80 VDC, 12 A
Rated output	240 W	960 W
Power factor	>0.895	>0.92
Dimensions (HxWxD)	140x63.5x118 mm	127x80x139 mm
Weight	0.720 kg	1.2 kg

### Motor brake controller: VXLCHOP2000

The function of the VXLCHOP2000 is to dissipate the energy delivered by the motor in an external resistor thus damping the resulting overvoltage on the DC Bus. Up to 4 VXLCHOP2000 units can be connected in parallel to increase the braking power.

#### Technical characteristics

Motor brake controller:	VXLCHOP2000
DC voltage	80 VDC (24...110 VDC)
Rated output	2 kW
External braking resistor	≥2 kW, 5 Ω (provided by the customer)
Dimensions (HxWxD)	115x39x128 mm
Weight	0.2 kg

# Micro Stepper Drive - ViX

## Overview

### Description

The award-winning ViX intelligent digital servo drive from Parker Hannifin has now been joined by a high-performance microstep version. Like its servo equivalent, the ViX microstep drive uses field-oriented digital control technology to give enhanced dynamic performance with improved efficiency. Housed within an extremely compact case, ViX is suitable either for direct panel mounting or for attachment to a standard DIN rail using an optional adaptor. The ViX microstep drive is produced in two versions having current ratings of 2.8 A and 5.6 A RMS at motor bus voltages up to 80 VDC. User resolution is freely programmable between 400 and 51 200 steps/rev. Regardless of the programmed resolution, the motor always operates at maximum resolution for optimum smoothness over the entire speed range. The power stage features full PWM control for accurate microstepping performance.

### Features

- Fully digital design
- Field-oriented control for improved low-speed performance
- Panel or DIN rail mounting
- 2.8 A & 5.6 A (rms)
- Up to 80 V DC bus
- Built-in controller using Parker's proven EASI code
- Powerful front-end software
- Fully-programmable resolution, up to 51 200 increments/rev
- Optional CANopen / RS485 interface
- Automatic standby current reduction
- Compact package
- Compatible with Parker high performance stepper motors

### Technical Characteristics - Overview

Device	Continuous current [A <sub>rms</sub> ]	Peak current [A] (<2 s)	Interface	Supply voltage [VDC]
ViX250-IM	2.8	4	Step+ Direction	24 & 24...80
ViX500-IM	5.6	8		24 & 48...80
ViX250-CM	2.8	4	CANopen	24 & 24...80
ViX500-CM	5.6	8		24 & 48...80

## Product Description

ViX intelligent microstep drives incorporate a powerful motion controller using Parker's well-proven EASI command language. As well as carrying out all standard motion-related functions, the controller performs more advanced operations such as external encoder following and registration moves. All necessary configuration is performed by software. In addition to an RS232C interface which is included in the standard drive, an optional factory-installed fieldbus expansion module allows for both CANopen and RS485 communication.

A comprehensive front-end software package is available which permits rapid configuration of the drive. When used with Parker stepper motors, only the motor type number is required for configuration of all relevant motor parameters. Parker's power supplies offer a convenient way of powering ViX microstep drives.

ViX forms part of a new, fully-integrated system of motion control components. The ViX microstep drive forms part of a new, fully-integrated system of motion control components which includes digital servo and stepper drives, power supplies, operator panels and I/O expansion units. These components complement Parker's range of mechanical positioning systems which includes precision tables, electric cylinders and linear actuators.

### Digital technology

The operating core of the ViX microstep drive is based on a powerful microprocessor. Armed with information about the motor and drive parameters, the processor is able to set the operating conditions in the current loop with a high degree of precision. In this way the bandwidth of the torque amplifier can be optimized for the specific configuration, allowing a wide range of motors to be accommodated without compromising on performance. In this way the bandwidth of the output amplifier can be optimized for the specific configuration, allowing a wide range of motors to be accommodated without compromising on performance. In addition, set-up is exceptionally straightforward with the relevant data for Parker high-performance stepper motors being held in a database within the EASI-V software package.

### Flexible communication options

ViX is supplied as standard with an integral RS232 communication interface. To keep the wiring as simple as possible, dual RJ45 connectors on the underside of the drive provide a built in daisy-chaining facility. The last drive in the chain automatically detects that no more units are connected and creates a loop return back to the host controller. Optional built-in modules provide both RS485 and CANopen communication to allow for integration within fieldbus systems.

### Freely-programmable user resolution

The ViX microstep drive is exceptionally easy to integrate into any mechanical arrangement since the user resolution may be set anywhere between 400 and 51 200 steps/rev. This means you can always set distances within your program using convenient units, even if there is an odd transmission ratio or leadscrew pitch. Moreover, the drive power stage always operates at maximum resolution.

## Dimensions

### ViX stepper drive

Dimensions [mm]

#### Mounting

vertical mounting, min. clearance 50 mm above & below drive, 10 mm each side panel  
mounting standard, DIN rail adaptor available

## Accessories and Options

Parker offers a range of accessories for ViX drives including mating connector sets, motor cables and a DIN rail mounting kit. The range will be extended to include operator panels and I/O expansion modules.

### Power module: VXLPSU240 and VXLPSU960

The Parker power supply offers a convenient way of powering a ViX servo drive. The continuous rated output is 240 W at 230 VAC input and supplies the 80 V main DC rail and operates directly from all AC supplies between 90 V and 264 V. No external EMC filters are required unless the motor leads are exceptionally long (e.g. greater than 30 m).

#### Technical characteristics

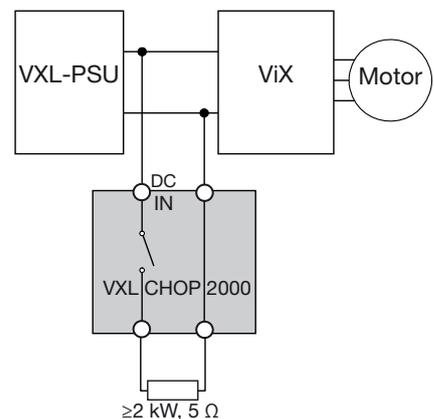

Power module:	VXLPSU240	VXLPSU960
AC input voltage, nominal (absolute limits)	115...230 VAC, 1phase (90...264 VAC)	400...500 VAC, 3phase
DC voltage	80 VDC, 3 A	80 VDC, 12 A
Rated output	240 W	960 W
Power factor	>0.895	>0.92
Dimensions (HxWxD)	140x63.5x118 mm	127x80x139 mm
Weight	0.720 kg	1.2 kg

### Motor brake controller: VXLCHOP2000

The function of the VXLCHOP2000 is to dissipate the energy delivered by the motor in an external resistor thus damping the resulting overvoltage on the DC Bus. Up to 4 VXLCHOP2000 units can be connected in parallel to increase the braking power.

#### Technical characteristics

Motor brake controller:	VXLCHOP2000
DC voltage	80 VDC (24...110 VDC)
Rated output	2 kW
External braking resistor	≥2 kW, 5 Ω (provided by the customer)
Dimensions (HxWxD)	115x39x128 mm
Weight	0.2 kg

# DC Servo Drive - RTS

## Overview

### Description

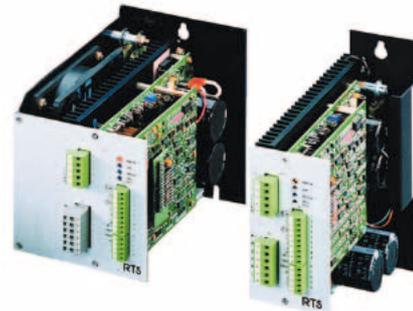

The RTS servo amplifiers are designed for driving DC servo motors and are available in ratings up to 6.5 kW.

These products enable speed control of DC motors with or without tachometers.

They integrate main supply, auxiliary supply and braking resistor circuits in a compact package.

### Features

- Battery, single-phase or three-phase power supply
- U-RI or tachometer control
- Integrated braking resistor
- Full protecting features
- High compactness
- Panel or rack mounting
- 3U Eurocard

### Technical Characteristics - Overview

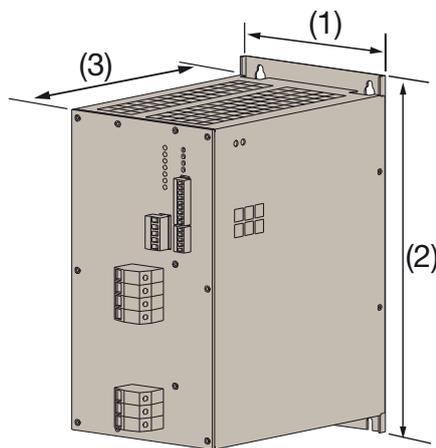

RTS Series	
Power supply	Single phase, three phase or battery
Nominal current	3...40 A
Peak current	10...80 A
Operating Temperature	0...40 °C (derate by 35 % per 10 °C >40 °C to 60 °C max.)
Altitude	1000 m (derate by 10 % >1000 m per 1000 m to 4000 m max.)
Protection	IP00, IP20 for versions with covering cap

## Technical Characteristics

Product type	Power supply input [V..]	Output current (nominal/peak) [A]	Nominal output voltage [VDC]	Associated transformer (minimum power)

Motors

# Low Inertia Servo Motors - SMB / SMH

## Overview

### Description

The SMB / SMH\* Series of highly-dynamic brushless servo motors have been design to combine the cutting-edge technology of Parker Hannifin products with an extremely high performance.

Thanks to the innovative "salient pole" technology, the motor's dimensions are considerably reduced with significant advantages in terms of specific torque, overall dimensions and dynamic performance. Compared to traditional-technology brushless servo motors, the specific torque is approximately 30 % higher, overall dimensions are considerably reduced and, consequently rotor inertias are extremely low. Thanks to the high quality of Neodymium-Iron-Boron magnets, and also the encapsulation method used to fasten them to the shaft, the SMB/H motors can achieve very high acceleration and withstand high overloads without risk of demagnetisation or detachment of the magnets.

Specific applications for the SMB/H Series include all types especially those for the packaging and handling industry, and all those applications where very high dynamic performances and very low inertias are required.

### Features

- High number of feedback options
- Customised windings/voltages
- Increased Inertia option
- Multiple connection options

### Application

- Food, Pharma & Beverage
- Packaging Machines
- Material Forming
- Material Handling
- Factory Automation
- Life Science Diagnostic
- Automotive Industry / In-Plant
- Printing Industry
- Textile Machines
- Robotics
- Servo Hydraulic Pumps

### Technical Characteristics - Overview

<b>Motor Type</b>	Permanent magnets synchronous servomotor
<b>Rotor Design</b>	Rotor with surface rare earth magnets
<b>Number of poles</b>	10 for SM_ 42 8 for SM_ 60-82-100-115-142
<b>Power Range</b>	0.2 – 5.3 kW
<b>Torque Range</b>	0.35 – 17 Nm
<b>Speed Range</b>	0 – 7500 min <sup>-1</sup>
<b>Mounting</b>	Flange with smooth holes
<b>Shaft End</b>	Plain keyed shaft Plain smooth shaft (option)
<b>Cooling</b>	Natural ventilation
<b>Protection Level (IEC60034-5)</b>	IP64 IP65 (option)
<b>Feedback sensor</b>	Resolver Absolute Endat or Hiperface Incremental Encoder
<b>Other options</b>	Brake Thermal protection (PTC for SMB and KTY for SMH) Increased inertia
<b>Marking</b>	CE / UL
<b>Voltage Supply</b>	230 / 400 VAC other voltage uder request
<b>Temperature Class</b>	Class F
<b>Connections</b>	Connectors Flying cables Terminal Box (see table option for combination)

\* SMB: for Drives TPD-M, SLVD-N, TWIN-N, SPD-N, Hi-Drive  
SMH: for Drive Compax3

<sup>(2)</sup> only for torque <2 Nm

## Options

Parker SMB / SMH family motors are available with standard and custom options to adapt motor on your application. If the option for your application is not listed, please consult our technical department.

### Holding Brake

All SMB / SMH motors are available with option holding brake.

The fail-safe (supply voltage 24 VDC  $\pm 10\%$ ) holding brake is incorporated in the motor at the opposite side of the front flange and is applied when there is no voltage present. Because of the power loss caused by the brake, torque values must be reduced by 5 %. The holding brakes shall be used with the motor at a standstill and not for dynamic braking. For normal uses, they are maintenance free brakes.

Motor	Voltage [V]	Current [A]	Torque @20 °C [Nm]	Added Length [mm]	Added Weight [kg]	Added Inertia [kgmm <sup>2</sup> ]
SMB / SMH60	24	0.34	2.2	31.5	0.3	12.5
SMB / SMH82	24	0.5	5	43	0.7	43
SMB / SMH100	24	0.67	11	47	0.6	104
SMB / SMH115	24	0.67	11	45	2	100
SMB / SMH142	24	0.75	22	50	3	200

### Medium Inertia

Where the application needs different values of inertia, SMB / SMH can provide a standard adder.

Motor	Added inertia [kgmm <sup>2</sup> ]	Added length [mm]	Added weight [kg]
SMB / SMH60	29	31.5	0.32
SMB / SMH82	270	43	0.91
SMB / SMH100	284	47	0.68
SMB / SMH115	900	45	2.28
SMB / SMH142	690	50	2.49

### Feedback

Motors may be equipped with various feedback types in order to meet the different requirements for precision, signal that the application needs. The standard motor includes the resolver feedback. Hiperface Encoder, DSL Encoder, EnDat Encoder, Incremental Encoder are available like the following tables.

#### Resolver

Poles	2
Transformation ratio	0.5
Operating temperature	-50...+150 °C

### 1 Type Of Motor (mandatory field)

<b>SME</b>	Standard Motor with Encoder SME Series
<b>SMB</b>	Standard Motor with Resolver SMB Series

### 2 Brake Option

<b>empty field</b>	No Brake Option
<b>A</b>	Motor with Holding Brake (brakes when the supply voltage is 0)

### 3 Motor Frame Size (mandatory field)

<b>42</b>	Torque 0.35 Nm
<b>60</b>	Torque range 0.55...1.4 Nm
<b>82</b>	Torque 3 Nm
<b>100</b>	Torque range 6 Nm
<b>115</b>	Torque range 10 Nm
<b>142</b>	Torque range 15...17 Nm
<b>170</b>	Torque range 36...60 Nm (Provisional data)

### 4 Winding (mandatory field)

<b>nn</b>	min <sup>-1</sup> (x100) see "Technical Data" (page 106)
-----------	---

### 5 Motor Torque (mandatory field)

<b>nn</b>	Torque [Nm] see "Technical Data" (page 106)
-----------	--

### 6 Flange (mandatory field)

<b>5</b>	B5 Flange
<b>7</b>	Only for Frame 82 and 115
<b>8</b>	Only for Frame 60, 82, 100 and 115
<b>9</b>	Only for Frame 115
<b>A B C</b>	Special Flange

### 7 Shaft (mandatory field)

<b>9</b>	9x25 mm for size 42 - 9x20 mm for size 60
<b>11</b>	11x23 mm for size 60
<b>14</b>	14x30 mm for size 82
<b>19</b>	19x40 mm for size 82/100/115/142
<b>24</b>	24x50 mm for size 100/115/142
<b>28</b>	28x60 mm for size 115/142
<b>A*</b>	Special shaft under request

### 8 Key Shaft option

<b>empty field</b>	Shaft with Key
<b>S</b>	Shaft without key

### 9 Layout - Connectors (mandatory field)

<b>0V</b>	Cable exit and Molex Flying connectors - 200 mm above
<b>2I</b>	Rotatable Interconnectron receptacles
<b>2IB</b>	90° Interconnectron receptacles - forward facing
<b>2ID</b>	90° Interconnectron receptacles - rear facing
<b>DC</b>	Special Customer Layout

### 10 Female connectors option

<b>empty field</b>	With Female / flying connectors
<b>W</b>	Without Female / flying connectors

### 11 Protection Degree (mandatory field)

<b>64</b>	IP64
<b>65</b>	IP65

### 12 Feedback

<b>empty field</b>	Standard Resolver [SMB]
<b>Exx</b>	Prearrangement for external encoder mounting Where xx is the model of feedback [SMB]
<b>A1</b>	Encoder 1024 ppr + Hall - TAMAGAWA OIH48
<b>A2</b>	Encoder 2048 ppr + Hall - TAMAGAWA OIH48
<b>A3</b>	Encoder 4096 ppr + Hall - TAMAGAWA OIH48
<b>A6</b>	SinCos Hiperface Encoder Single-Turn - STEGMANN SRS50/52
<b>A7</b>	SinCos Hiperface Encoder Multi-Turn - STEGMANN SRS50/52
<b>B3</b>	Encoder 2048 ppr + Hall - TAMAGAWA OIH35
<b>B9</b>	SinCos EnDat Encoder Multi-Turn - HEIDENHAIN EQI1331
<b>C1</b>	SinCos EnDat Encoder Single-Turn - HEIDENHAIN EQI1113
<b>C4</b>	Encoder 5000 ppr + Hall - TAMAGAWA OIH48
<b>C6</b>	SinCos Hiperface Encoder Single-Turn - STEGMANN SKS36
<b>C7</b>	SinCos Hiperface Encoder Multi-Turn - STEGMANN SKM36
<b>D3</b>	Encoder 5000ppr + Hall - TAMAGAWA OIH35
<b>D5</b>	SinCos EnDat Encoder Multi-Turn - HEIDENHAIN EQN1325
<b>F2</b>	SinCos EnDat Encoder Multi-Turn - HEIDENHAIN EQN1125
<b>F4</b>	SinCos EnDat Encoder Multi-Turn - HEIDENHAIN EQI1130
<b>G4</b>	SinCos Hiperface Encoder Multi-Turn - STEGMANN SEL37
<b>G5</b>	SinCos Hiperface Encoder Multi-Turn - STEGMANN SEL52
<b>S1</b>	SinCos Hiperface Encoder Single-Turn - STEGMANN SRS50S
<b>S2</b>	SinCos Hiperface Encoder Multi-Turn - STEGMANN SRS50S
<b>S3</b>	SinCos Hiperface Encoder Single-Turn - STEGMANN SKS36S
<b>S4</b>	SinCos Hiperface Encoder Multi-Turn - STEGMANN SKM36S
<b>S5</b>	32768 steps/rev Single Turn Hiperface DSL® Encoder Feedback SIL2
<b>S6</b>	32768 steps/rev x 4096 Multi Turn Hiperface DSL® Encoder Feedback SIL2

### 13 Option Resolver

<b>H</b>	High Accuracy Resolver [SMB]
----------	------------------------------

**14 Option Inertia**

**empty field** Standard Inertia

**M** Medium Inertia

**15 Special Option**

**empty field** No Special Option

**1Bxx** Motor with 2-side output shaft, where xx is the diameter of second shaft

**16 Voltage**

**0A** 24 V

		<b>for linear motors</b>
	<b>GBK33/....<sup>(1)</sup></b>	Feedback cable for LXR Moving application
	<b>GBK32/....<sup>(1)</sup></b>	Feedback cable for BLMA Moving application

# Servo Motor - MB / MH

## Overview

### Description

The MB / MH <sup>(1)</sup> series caters for torques in the range of 0.2 to 285 Nm, speeds up to 10 000 min<sup>-1</sup> and includes a total of 75 models available across 6 frame sizes. Thanks to the high quality and performance of the Neodymium-Iron-Boron magnets, and also the encapsulation method used to fasten them to the shaft, the MB / MH series of motors can achieve very high accelerations and withstand high overload without the risk of demagnetisation or detachment of the magnets. Furthermore, shaft and flange size flexibility on all models provides the user with the possibility to optimise their motor selection for any given application. Adequate mechanical over-sizing, low inertia in an extra-strong mechanism and a broad range of models permits the application of the MB / MH series in all fields where high dynamic performance and utmost reliability are crucial features.

Typical applications include any type of automatic machinery, especially in the product packaging and handling industry, and wherever the demand exists for axis speed and position synchronisation.

### Features

- Large set of feedback option
- Customization
- Increase inertia option
- ATEX certification for MB/MH105/145
- Options
  - Flying cables
  - Terminal box (power and resolver)
  - External encoder
  - Increased inertia
  - Brake
  - Feedback - resolver/incremental/ SinCos/absolute encoder
  - Thermal protection (PTC for MB and KTY for MH)
  - Second shaft

### Application

- Food, Pharma & Beverage
- Packaging Machines
- Material Forming
- Material Handling
- Factory Automation
- Life Science Diagnostic
- Automotive Industry / In-Plant
- Printing Industry
- Textile Machines
- Robotics

### Technical Characteristics - Overview

<b>Motor Type</b>	Permanent magnets synchronous servo motor
<b>Rotor Design</b>	Rotor with surface rare earth magnets
<b>Power supply</b>	230 VAC or 400 VAC
<b>Operating temperature</b>	-10/+40 °C
<b>Number of poles</b>	4 for M_ 56-70 8 for M_ 105-145-205-265
<b>Power Range</b>	0.05...67 kW
<b>Torque Range</b>	0.2...285 Nm
<b>Speed Range</b>	0...10 000 min <sup>-1</sup>
<b>Mounting</b>	Flange with smooth holes B14, B3 option
<b>Shaft End</b>	Plain keyed shaft Plain smooth shaft (option)
<b>Cooling</b>	Natural ventilation Self-ventilation (option for size 105-145-205) Forced ventilation (option for size 105-145-205) Water cooled (option for size 145)
<b>Protection Level (IEC60034-5)</b>	IP64 IP65 (option)
<b>Feedback sensor</b>	Resolver Absolute EnDat or Hiperface Incremental Encoder
<b>Voltage Supply</b>	230 / 400 VAC
<b>Temperature Class</b>	Class F
<b>Connections</b>	Connectors Flying cables Terminal Box (see table option for combination)
<b>Marking</b>	CE
<b>Standards</b> In compliance with:	73/23/CEE and 93/68/CEE EN60034-1 EN60034-5 EN60034-5/A1 EN60034-9 EN60034-14

<sup>(1)</sup> MB for drives: TPD-M, SLVD-N, TWIN-N, SPD-N, Hi-Drive, MH for drive: Compax3

## Options

Parker Mx family motors are available with standard and custom options to adapt motor on your application. If the option for your application is not listed, please consult our technical department.

### Holding Brake

All MB, MH motors are available with an optional holding brake. Two different brake types exist, standard holding brake (option A) and special brake (option B) depending on the features of your application needs. Incorporated into the motor is the fail-safe holding brake (supply voltage 24 VDC  $\pm$ 10 %) which is applied when no voltage is present. Because of the power taken by the brake, torque values must be reduced by 5 % (10 % for size 265). The holding brake shall be used with the motor only at a standstill and not for dynamic braking. When used normally they are maintenance free.

Holding Brake <sup>(1)</sup>	Option	Voltage [V]	Current @20 °C [A]	Torque @20 °C [Nm]	Added Length [mm]	Added Weight [kg]	Torque derating of motor
M_56_A	A	24 $\pm$ 10 %	0.32	0.6	51	0.8	5 %

<sup>(1)</sup> If more than one option is required, please check with our technical department the feasibility.

### Fan cooling

For high duty cycle applications, Parker offer 3 different types of cooling option: servo-ventilated, self ventilated and water cooled. With servo-ventilated the motors (order Code M\_SV), an increase of 25 % torque and current based on nominal values (except for the maximum torque and current data) is provided. The servo-ventilated 205 motor is equipped with an external condenser for starting the fan.

With the self-ventilated option (order Code M\_V), the torque is increased proportionally to the nominal speed.

For water-cooled motors (order code M\_W, available only for size 145), consider a performance increase of approx. 100 % in the torque and current, except peak data.

Motor MB / MH	Option <sup>(1)</sup>	Voltage	Current [A]	Frequency [Hz]	Speed [min <sup>-1</sup> ]	Added Length [mm]	Added Weight [kg]	Torque increasing of motor
105	SV	24 VDC $\pm$ 10 %	0.17	n.a.	3000	64	1	25 %
	V	n.a.	n.a.	n.a.	n.a.	34	0.25	Depending of speed

	V	n.a.	n.a.	n.a.	n.a.	44	0.55	Depending of speed
205	SV	230 VAC Single Phase $\pm$ 10 %	0.22	50	3000	109	2.2	25 %
	V	n.a.	n.a.	n.a.	n.a.	54	1.1	Depending of speed
265	SV	230 VAC Single Phase $\pm$ 10 %	0.22	50	3000	109	2.2	25 %

<sup>(1)</sup> If more than one option is required, please check with our technical department the feasibility.

## Feedback options

M\_ motors are available with standard resolver feedback, but for different type of application we can offer the following types of feedback:

- Incremental Encoder with hall sensors
- Hiperface absolute encoder (single or multi-turn)
- EnDat absolute encoder (single or multi-turn)

- Not possible
- ✓ Possible without increment
- Δ Possible with increment motor length

## Shaft

M\_ motors are available with or without key option; shafts are available in different sizes suitable for your existing machine or gearbox

## Increased Safety

M\_ motors size 105 and 145 are also available with increased safety which conform to ATEX... directive 94/9/CE  II 2G Ex e II T3 with environment temperature between -20 and +40 °C  
Only with drive HIDX. The feature and characteristics of the MBX motors are different from the standard version. For more info please consult technical department of Parker EME.

## Custom options

### Flange and shafts

In addition to the standard product it is possible to specify a fully customized mechanical interface for the motor ie flange, shaft and mounting holes. This option requires technical collaboration between the customer and Parker.

### KIT (frameless) options

We can also supply our motors as only stator + rotor. Our mechanical team will develop / propose the right solution for your mechanical application which integrates into the existing elements of the machine.

A second output shaft / external encoder mount

Certain applications need a second shaft on the rear of motor; for this reason with M\_ motors we offer alternative solutions for adding existing feedback or other mechanical accessories. For more details contact your Parker sales engineer.

## Order Code

### MB / MH Motors

To ensure that you select the correct motor we recommend that you have the following information.

- Diagram speed / time of load cycle to identify the type of the cycle (S1, S3 or others)
- Information about inertia load system
- Check the duty cycle - acceleration/deceleration
- Calculate the average torque and peak torque of the system
- Calculate the average speed and maximum speed of the cycle
- Check the temperature and altitude of environment / application
- Check the mechanical compatibility

With these preliminary data you can start to choose the motor (with the correct drive) for your application.

#### 1 Type Of Motor (mandatory field)

<b>ME</b>	Motor with Encoder ME Series
<b>MB</b>	Motor with Resolver MB Series
<b>MH</b>	Motor with Resolver MH Series

#### 2 EX Protection

empty field	Standard motor no EX Certification
<b>x</b>	Motor with EX Certification (increased protection safety) (only for 105 and 145 without the holding brake at 3000 min <sup>-1</sup> ) (only with HIDX...)

#### 3 Brake Option

empty field	No Brake Option
<b>A</b>	Motor with Holding Brake (brakes when the supply voltage is 0)
<b>B</b>	Motor with BINDER Holding Brake (size145 up to 15Nm and 205)

#### 4 Cooling Option

empty field	no cooling option
<b>V</b>	Motor with shaft-drive fan cooling
<b>SV</b>	Motor with (single-phase) motorised fan cooling
<b>W</b>	Water cooled motor (only size 145)

#### 5 Motor Frame Size (mandatory field)

<b>56</b>	Torque range 0.2...0.6 Nm
<b>70</b>	Torque range 0.5...2,5 Nm
<b>105</b>	Torque range 2.2...8 Nm
<b>145</b>	Torque range 4.5...28 Nm
<b>205</b>	Torque range 15...90 Nm
<b>265</b>	Torque range 75...265 Nm

#### 6 Winding (mandatory field)

<b>nn</b>	min <sup>-1</sup> (x100) except for size 205 1150 min <sup>-1</sup> which is only 11
-----------	--

#### 7 Motor Torque (mandatory field)

<b>nn</b>	Torque in Nm
-----------	--------------

#### 8 Flange (mandatory field)

<b>5</b>	B5 Flange
<b>6</b>	116 mm Flange, only for frame 105
<b>9</b>	96 mm Flange, only for frame 105

#### 9 Shaft (mandatory field)

<b>9</b>	9x20 mm for size 56
<b>11</b>	11x23 mm for size 56/70
<b>14</b>	14x30 mm for size 70
<b>19</b>	19x40 mm for size 105/145
<b>24</b>	24x50 mm for size 105/145
<b>28</b>	28x60 mm for size 145
<b>38</b>	38x80 mm for size 205
<b>42</b>	42x110 mm for size 205
<b>48</b>	48x110 mm for size 265
<b>A*</b>	Special shaft under request

#### 10 Key Shaft option

empty field	Shaft with key
<b>S</b>	Shaft without key

#### 11 Layout - Connectors (mandatory field)

<b>2I</b>	Interconnectron rotatables receptacles (not for size 56 - 265 and 205 with brake)
<b>3M</b>	Terminal Box - opposite shaft glands
<b>3MB</b>	Terminal Box -toward shaft glands
<b>2IB</b>	90° Interconnectron receptacles - forward facing
<b>2ID</b>	90° Interconnectron receptacles - rear facing
<b>3I</b>	Terminal Box + Interconnectron 90° (not for size 56 - 265)
<b>3MBS</b>	Terminal Box + Interconnectron 90° (only for size 265)

#### 12 Female connectors option

empty field	With Female / flying connectors
<b>W</b>	Without Female / flying connectors

#### 13 Form Option

empty field	no Foot Mount Option
<b>3</b>	B3 - Foot Mount Option

#### 14 Protection Degree (mandatory field)

<b>64</b>	IP64
<b>65</b>	IP65

### 15 Feedback

empty field	Resolver (Standard) not for ME motors
<b>A1</b>	Tamagawa OIH48 2000 ppr / on request - No Stock
<b>A2</b>	Tamagawa OIH48 2048 ppr for size 105/145/205
<b>A3</b>	Tamagawa OIH48 4096 ppr for size 105/145/205
<b>A6</b>	Stegman SRS50 Hiperface Single-Turn for size 70/105/145/205
<b>A7</b>	Stegman SRM50 Hiperface Multi-Turn for size 70/105/145/205
<b>B1</b>	Encoder 3000 ppr + Hall - TAMAGAWA OIH35
<b>B9</b>	SinCos EnDat Encoder Multi-Turn - HEIDENHAIN EQI1331
<b>C1</b>	SinCos EnDat Encoder Single-Turn - HEIDENHAIN EQI1113
<b>C4</b>	Encoder 5000 ppr + Hall - TAMAGAWA OIH48
<b>D5</b>	SinCos EnDat Encoder Multi-Turn - HEIDENHAIN EQN1325
<b>S1</b>	SinCos Hiperface Encoder Single-Turn - STEGMANN SRS50S
<b>S2</b>	SinCos Hiperface Encoder Multi-Turn - STEGMANN SRS50S

### 16 Option Inertia

empty field	Standard Inertia
<b>M</b>	Medium Inertia
<b>ML</b>	High Inertia

### 17 Special Option

empty field	No Special Option
<b>1Bxx</b>	Motor with 2-side output shaft Where xx is the diameter of second shaft
<b>Exx</b>	Prearrangement for external encoder mounting; where xx is the model of feedback

### 18 Voltage

<b>0A</b>	24 V
<b>0B</b>	34 V
<b>0C</b>	48 V
<b>0D</b>	50 V
<b>0E</b>	60 V
<b>0F</b>	72 V
<b>0G</b>	74 V
<b>0</b>	80 V
<b>0H</b>	96 V
<b>1A</b>	108-110 V
<b>1D</b>	120 V
<b>1B</b>	125 V
<b>1C</b>	150 V
<b>1</b>	180 V
<b>2</b>	220-230 V
<b>2A</b>	222 V
<b>2B</b>	200 V
<b>3</b>	330 V
<b>4</b>	380-400 V
<b>4A</b>	425 V
<b>4C</b>	460 V
<b>4B</b>	490 V

Cables and connectors are part of the accessories required for Parker motors; for different combination we offer propose different types of cables for signals and power. Below you will find the code structure.

### Motor Power Cable for MB Motors

	1	2	3	4	5	6	7

	<b>for linear motors</b>
<b>GBK33/....<sup>(1)</sup></b>	Feedback cable for LXR Moving application
<b>GBK32/....<sup>(1)</sup></b>	Feedback cable for BLMA Moving application

# Low Cogging Servo Motor - NX Series

## Overview

### Description

NX Series brushless servomotors from Parker combine exceptional precision and motion quality, high dynamic performance and very compact dimensions. A large set of torque / speed characteristics, options and customization possibilities are available, making NX Series servomotors the ideal solution for most servosystems applications.

### Advantages

- High precision and motion quality
- High dynamic performance
- Compact robust
- Large set of options and customization possibilities
- CE and UL marking certification available

### Applications

- Life Science Diagnostic
- Tooling Machines
- Pulp & Paper
- Renewable Energy
- Aerospace
- Radiation Hardend
- Marine
- Continuous Process
- Mobile Hybrid Solutions

### Features

- **Mounting**
  - Flange with clearance holes
- **Shaft end**
  - Plain smooth shaft (standard)
  - Plain keyed shaft (option)
- **Cooling**
  - Natural ventilation
  - Forced ventilation (NX860V only)
- **Feedback sensors**
  - Resolver (standard)
  - Absolute EnDat, Hiperface, Encoder
  - Posivex (only with Digivex Motion)
- **Other options**
  - Brake
  - Thermal protection (PTC, Thermo Switch or KTY)

Motors  
NX Series

### Technical Characteristics - Overview

<b>Motor type</b>	Permanent magnet synchronous servomotors	
<b>Rotor design</b>	Rotor with concentrated-flux rare earth magnets

For non-standard length cable with length different from: 1/2/3/4/5/10/15/20/25/30/40/50 m please contact us.  
Example CC3UP1F1R0015: power cable, length = 15 m.

## Feedback Sensors for CE and UL Motors

### 2 poles resolver - option A

- Accuracy:  $\pm 10'$  max
- Transformation ratio:  $0.5 \pm 5\%$
- Max. operating speed:  $17\,000\text{ min}^{-1}$
- Working temperature range:  $-55\dots+155\text{ }^\circ\text{C}$
- Compatibility: NX1 to NX8

### Single turn / Multiturn absolute encoder HIPERFACE SKS/SKM36 - option R/S

- Number of sine/cosine periods per revolution: 128
- Absolute position per revolution: 4096 (12 bits)
- Number of absolutely encodable revolutions: 4096 (SKM36)
- Max. operating speed SKS36:  $12\,000\text{ min}^{-1}$
- Max. operating speed SKM36:  $9\,000\text{ min}^{-1}$
- Working temperature range:  $-20\dots+110\text{ }^\circ\text{C}$
- Compatibility: NX2 to NX8

### Single turn / Multiturn absolute encoder EnDat ECN1113/EQN1125 - option V/W

- Number of sine/cosine periods per revolution: 512
- Absolute position per revolution: 8192 (13 bits)
- Number of absolutely encodable revolutions: 4096
- Accuracy:  $\pm 60''$
- Absolute position value EnDat 2.2
- Max. operating speed:  $12\,000\text{ min}^{-1}$
- Working temperature range:  $-40\dots+115\text{ }^\circ\text{C}$
- Compatibility: NX2 to NX8

### Single turn / Multiturn absolute encoder HIPERFACE SRS/SRM50 - option T/U (on request)

- Number of sine/cosine periods per revolution: 1024
- Number of absolutely encodable revolutions: 4096 (SRM50)
- Absolute position per revolution: 32768 (15 bits)
- Working speed up to which the absolute position can be reliably determined:  $6\,000\text{ min}^{-1}$
- Max. operating speed:  $12\,000\text{ min}^{-1}$
- Working temperature range:  $-20\dots+115\text{ }^\circ\text{C}$
- Compatibility: NX3 to NX8

### Multiturn absolute encoder HIPERFACE SEL37 - option Q (on request)

- Number of sine/cosine periods per revolution: 16
- Number of absolutely encodable revolutions: 4096
- Working speed up to which the absolute position can be reliably determined:  $6\,000\text{ min}^{-1}$
- Max. operating speed:  $10\,000\text{ min}^{-1}$
- Working temperature range:  $-20\dots+115\text{ }^\circ\text{C}$
- Compatibility: NX2 to NX8

# Explosion Proof Servo Motor - EX Series

## Overview

### Description

EX series is a range of permanent magnet servo motor designed for use in explosive atmospheres. Featuring robust explosion-proof housings, EX motors are capable of bearing internal explosions with no risks of propagation to the neighbouring environment. Two versions are available, conforming with North American or European safety standards. EX servomotors are characterized by excellent motion quality, great acceleration / deceleration capabilities, and high torque output over a wide speed range. Various winding variants and numerous options are available to offer maximum flexibility.

### Advantages

- Servo motors with explosion proof housings
- CE or UL versions available
- High dynamic performance
- Compact and robust
- Maintenance free

### Applications

- Food, Pharma & Beverage
- Material Forming
- Printing Industry
- Hazardous / Ex Environment
- Painting robots

### Features

- **Mounting**
  - Flange with clearance holes
- **Mechanical interface**
  - Solid smooth shaft (standard)
  - Solid shaft with key (option)
- **Feedback sensors**
  - 2 pole resolver (standard)
  - Absolute EnDat encoder (option)
  - Absolute Hiperface encoder (option)
- **Thermal protection**
  - Thermoswitches and thermofuses integrated in the windings
- **Other options**
  - Parking brake

### Technical Characteristics - Overview

<b>Motor type</b>	Permanent magnet synchronous motors	
<b>Number of poles</b>	10

<b>Connections</b>	Cable glands	Tapped holes

# Standards

## Hazardous Areas Classification

### Dangerous Areas Identification

European directive 99/92/EC makes explicit the responsibility of employers to protect employees who may be exposed to risk of ATEX environments (Explosive Atmosphere). The employer must assess the risk and classify potentially dangerous areas. Equipment and materials must also be suited for use in dangerous areas in accordance with ATEX directive 94/9/EC.

Hazard	Permanent	Occasional	Unusal
Definition	Explosive atmospheres present continuously, for long periods or frequently	Explosive atmospheres are likely to occur	Explosive atmospheres are unlikely to occur or present only infrequently and for a short period only
Gas and vapour	Area 0	Area 1	Area 2
Dust	Area 20	Area 21	Area 22
Category	1 Very high level of protection	2 High level of protection	3 Normal level of protection

 EX motors can be used in these areas

### Equipment identification

Ex series is a range of permanent magnets servomotors designed for use in explosive atmospheres and are CE marked in accordance with ATEX directive 94/9/CE. Two versions are available:

- Gaseous atmospheres: II2 G Ex d IIB T4 IP64 – Group IIA or IIB – category 2G– areas 1 and 2.
- Gaseous and dusty atmospheres: II2 GD Ex d IIB T4 IP65 and Ex tD A21 IP65 T135 °C –
- Group IIA or IIB – category 2GD – areas 21 and 22.

All devices intended for use in hazardous areas must have standard CE inspection certificates and more specifically bear an ATEX mark.

II	2	G	Ex	d	IIB	T4	IP64	
Equipment group and category		Area		Ex	Type of protection	Gas group		Temperature class*
I Mine	M1 Very high level of protection	G Gas Vapour	D Dust	Protection against explosions	o Oil immersion	I Mine	Methane	T1 450 °C
	M2 High level of protection				p Pressurized apparatus			T2 300 °C
II Surface	1 Very high level of protection				d Flameproof enclosure	II Surface	A Propane	T3 200 °C
	2 High level of protection				e Increased safety		B Ethylene	T4 135 °C
	3 Normal level of protection				m Encapsulation		C Hydrogen Acetylene	T5 100 °C
					i Intrinsic safety		T6 85 °C	

\* Maximum surface temperature

### Additional Information for Servomotors in Dust Atmosphere

EX servomotors with IP65 option are designed for explosive atmospheres and are fitted with a lip seal at the customer shaft end.

With protection by enclosures «tD», they are designed to operate in combustible dust atmospheres, areas 21 and 22, («A21»).

In accordance with EN 6124-0: 2006 and EN 61241-1: 2004 standards.  
 Classification:  
 II2 D Ex tD A21 IP65 T135 °C

### Classification of common combustible gases and vapours according to temperature class and explosion group

Group	Temperature class					
	T1	T2	T3	T4	T5	T6
I	Methane					
II A	Acetic acid Acetone Ammonia Benzene Carbon monoxide Ethane Ethyl... Methane Methanol Methyl... Naphtalene Propane Toluene Xylene	Butyl acetate Amylic alcohol Liquefied gas Natural gas Butane Ethyl alcohol	Cyclohexane Cyclohexanol Diesel fuels Gasoline Heptane Hexane Pentane Petroleum (depending on composition)	Acetaldehyde Ether		
II B	Coke gas	Butadiene Ethylene Ethylbenzene Ethylene oxide	Hydrogen sulphide Isoprene Petroleum (depending on composition)	Ethyl ether		
II C	Hydrogen	Acetylene				Carbon disulphide Ethyl nitrate

Motors EX Series

### Compliance with North American standards

EX servomotors are CLASS 1, division 1, Groups C and D, explosion-proof apparatus designed to operate in explosive atmospheres in accordance with standard UL1004 and UL674.

Marking in accordance with Standard UL674

Class I	Division 1	Group C&D	Temperature class	
Class I Gas, vapour and liquids	Explosive atmospheres can exist all the time or some of the time under normal operating conditions	A Acetylene	T1 450 °C	IP65
		B Hydrogen	T2 300 °C	
		C Ethylene	T3 200 °C	
		D Propane	T4 135 °C	
Class II Dust		E, F, G	T4A 120 °C	
			T5 100 °C	
Class III Fibers			T6 85 °C

## Feedback Sensors for CE and UL Motors

### 2 poles resolver - option A

- Accuracy:  $\pm 10'$  max
- Transformation ratio:  $0.5 \pm 5\%$
- Max. operating speed:  $17\,000\text{ min}^{-1}$
- Working temperature range:  $-55\dots+155\text{ }^\circ\text{C}$
- Compatibility: EX3 to EX8

### Single turn / Multiturn absolute encoder HIPERFACE SKS/SKM 36 - option R/S

- Number of sine/cosine periods per revolution: 128
- Absolute position per revolution: 4096 (12 bits)
- Number of absolutely encodable revolutions: 4096 (SKM36)
- Max. operating speed SKS36:  $12\,000\text{ min}^{-1}$
- Max. operating speed SKM36:  $9\,000\text{ min}^{-1}$
- Working temperature range:  $-20\dots+110\text{ }^\circ\text{C}$
- Compatibility: EX3 to EX8

### Single turn / Multiturn absolute encoder EnDat ECN1113/EQN1125 - option V/W

- Number of sine/cosine periods per revolution: 512
- Absolute position per revolution: 8192 (13 bits)
- Number of absolutely encodable revolutions: 4096
- Accuracy:  $\pm 60''$
- Absolute position value EnDat 2.2
- Max. operating speed:  $12\,000\text{ min}^{-1}$
- Working temperature range:  $-40\dots+115\text{ }^\circ\text{C}$
- Compatibility: EX6 to EX8

### Single turn / Multiturn absolute encoder HIPERFACE SRS/SRM 50 - option T/U (on request)

- Number of sine/cosine periods per revolution: 1024
- Number of absolutely encodable revolutions: 4096 (SRM50)
- Absolute position per revolution: 32768 (15 bits)
- Working speed up to which the absolute position can be reliably determined:  $6\,000\text{ min}^{-1}$
- Max. operating speed:  $12\,000\text{ min}^{-1}$
- Working temperature range:  $-20\dots+115\text{ }^\circ\text{C}$
- Compatibility: EX4 to EX8

### Multiturn absolute encoder HIPERFACE SEL37 - option Q (on request)

- Number of sine/cosine periods per revolution: 16
- Number of absolutely encodable revolutions: 4096
- Working speed up to which the absolute position can be reliably determined:  $6\,000\text{ min}^{-1}$
- Max. operating speed:  $10\,000\text{ min}^{-1}$
- Working temperature range:  $-20\dots+115\text{ }^\circ\text{C}$
- Compatibility: EX3 to EX8

# High Speed Servo Motor - NV Series

## Overview

### Description

The NV series is a range of compact servomotors specially designed for high speed operation. NV motors are balanced with high accuracy to minimize the level of vibration and to increase their service life, making them particularly suitable for auxiliary spindle applications on machine tools. NV motors feature high dynamic performance and torque densities, while taking advantage of a large variety of options and customization possibilities. Available in kit version on request

### Advantages

- High-Speed capabilities, precise and accurate positioning, high dynamic performance
- Compact and robust
- Design flexibility

### Application

- Tooling Machines

### Features

- **Mounting**
  - Flange with clearance holes
- **Mechanical interface**
  - Solid smooth shaft
- **Feedback sensor**
  - 2 pole resolver (standard)
  - Absolute encoders: EnDat, Hiperface, Posivex (options)
  - Without sensor (on request)
- **Connections**
  - Connectors
  - Terminal box (fan cooled motors)
- **Options**
  - Thermal protection (PTC, Thermo Switch or KTY)

### Technical Characteristics - Overview

<b>Motor type</b>	Synchronous permanent magnet servomotors
<b>Poles number</b>	10
<b>Voltage supply</b>	230 VAC or 400 VAC
<b>Power range</b>	0.7...12 kW
<b>Torque range</b>	0.4...11.5 Nm
<b>Speed range</b>	7000...17 000 min <sup>-1</sup>
<b>Ingress protection level (IEC60034-5)</b>	<ul style="list-style-type: none"> <li>• IP64 (standard)</li> <li>• IP65 (option)</li> </ul>
<b>Cooling method</b>	<ul style="list-style-type: none"> <li>• Natural ventilation (standard)</li> <li>• Fan cooling (NV860V)</li> </ul>
<b>Temperature class (IEC60034-1)</b>	Class F

## Options

### Feedback Sensors

#### 2 poles resolver - option A

- Accuracy:  $\pm 10'$  max
- Transformation ratio:  $0.5 \pm 5\%$
- Max. operating speed:  $17\,000\text{ min}^{-1}$
- Working temperature range:  $-55\dots+155\text{ }^\circ\text{C}$
- Compatibility: NV3 to NV8

#### Single turn / Multiturn absolute encoder HIPERFACE SKS/SKM 36 - option R/S

- Number of sine/cosine periods per revolution: 128
- Absolute position per revolution: 4096 (12 bits)
- Number of absolutely encodable revolutions: 4096 (SKM36)
- Max. operating speed SKS36:  $12\,000\text{ min}^{-1}$
- Max. operating speed SKM36:  $9\,000\text{ min}^{-1}$
- Working temperature range:  $-20\dots+110\text{ }^\circ\text{C}$
- Compatibility: NV3 to NV8

#### Single turn / Multiturn absolute encoder EnDat ECN1113/EQN1125 - option V/W

- Number of sine/cosine periods per revolution: 512
- Absolute position per revolution: 8192 (13 bits)
- Number of absolutely encodable revolutions: 4096
- Accuracy:  $\pm 60''$
- Absolute position value EnDat 2.2
- Max. operating speed:  $12\,000\text{ min}^{-1}$
- Working temperature range:  $-40\dots+115\text{ }^\circ\text{C}$
- Compatibility: NV3 to NV8

#### Single turn / Multiturn absolute encoder HIPERFACE SRS/SRM 50 - option T/U (on request)

- Number of sine/cosine periods per revolution: 1024
- Number of absolutely encodable revolutions: 4096 (SRM50)
- Absolute position per revolution: 32768 (15 bits)
- Working speed up to which the absolute position can be reliably determined:  $6\,000\text{ min}^{-1}$
- Max. operating speed:  $12\,000\text{ min}^{-1}$
- Working temperature range:  $-20\dots+115\text{ }^\circ\text{C}$
- Compatibility: NV3 to NV8

	...	
	<b>050</b>	50 m

(\*) The 3 last digits indicate cable length in meters ±5 % max  
For non-standard length cable with length different from: 1/2/3/4/5/10/15/20/25/30/40/50m please contact us.  
Example CC3UP1F1R0015: power cable, length = 15 m.

# Frameless Servo Motor - NK Series

## Overview

### Description

Servo motor kit is an innovative and comprehensive approach enabling the complete integration of the motor in a simplified mechanical system. This approach ensures that the size constraints of the machine are utilized to maximum effect. This delivers a more accurate, reliable and robust solution than traditional construction methods. A complete range of products is available to meet the design needs of many different mechanical systems in a host of different applications. Other more bespoke adaptations can be developed upon request.

### Advantages

- Compact footprint and reduced weight of the mechanical systems
- Reduced cost
- Direct Drive: accurate and robust mechanics
- Complete and optimized solution including sensor, cooling system and drive
- Integration assistance

### Applications

- Tooling Machines
- Medical Science

Motors  
NK Series

## Technical Characteristics - Overview

Frameless servomotors	
Low speed torque	0.4...42 Nm
Max. speed	8000 min <sup>-1</sup>
Max. constant power	0.25...7.7 kW
Inertia	13...9200 kgmm <sup>2</sup>
Weight	0.422...17.445 kg
Frameless servomotors with water cooling	
Low speed torque	3.4...72 Nm
Max. speed	15000 min <sup>-1</sup>
Max. constant power	4.7...30 kW
Inertia	79...9200 kgmm <sup>2</sup>
Weight	0.8885...17.44 kg

# Frameless Spindle Servo Motor - SKW Series

## Overview

### Description

SK motors are compact and highly dynamic permanent magnet synchronous servomotors for spindle applications up to 20 kW. Delivered as separate components to be integrated into the mechanical structure of the machine, SK motors offer constant torque capabilities over a wide speed range.

### Features

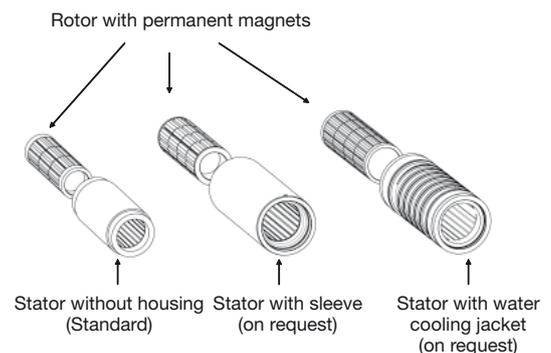

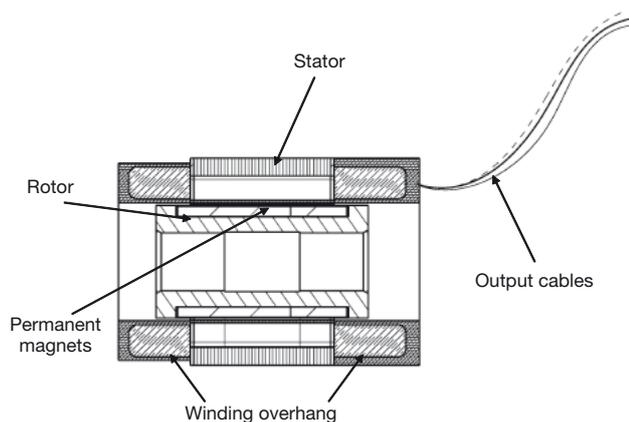

- **Parker SK Series Kit Spindle Motors include**
  - a rotor with permanent magnets which can, on request, be mounted on customer's shaft
  - a wound stator which can, on request, be designed with a cooling jacket or integrated into customer's mechanics
- **Kit solution leading to simplified mechanical designs**
- **High dynamic performance and power density: increased productivity and to reduced size compared to induction motors**
- **Cold permanent magnet technology: reduced heating in the bearings compared to induction motors, no dilatation effect**
- **Increased internal diameter compared to other solutions: increased rigidity and greater capacity for bar stock handling in automatic lathes**
- **Compatibility with cost effective sensorless drives from Parker**

### Applications

- Tooling Machines

### Technical Characteristics - Overview

<b>Motor Type</b>	Permanent magnet synchronous motors
<b>Power supply</b>	3 ph - 400 VAC
<b>Power range</b>	up to 20 kW
<b>Speed range</b>	<ul style="list-style-type: none"> <li>• up to 12 000 min<sup>-1</sup></li> <li>• higher speeds on request</li> </ul>
<b>Insulation (CEI 60034-1)</b>	Class F
<b>Cooling</b>	<ul style="list-style-type: none"> <li>• Water cooling (standard)</li> <li>• Natural convection on request</li> </ul>
<b>Connections</b>	2 m flying cables without connectors
<b>Construction type</b>	Individual components (rotor, stator, feedback sensor)

# Frameless AC Brushless Motor - HKW Series

## Overview

### Description

HKW motors are high performance permanent magnet synchronous servomotors for spindle applications up to 230 kW.

Delivered as separate components to be integrated into the mechanical structure of the machine, HKW motors benefit from the use of field weakening, in order to achieve both high torque at slow speed, and very high maximum speed at constant power.

### Applications

- Tooling Machines

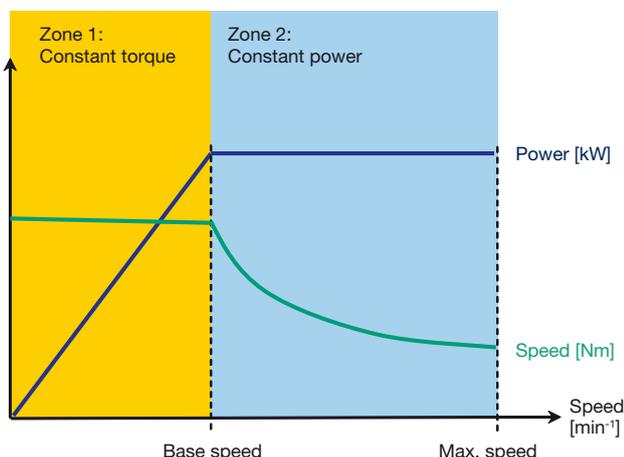

### Features

- Kit solution leading to simplified mechanical design
- Very high speed capabilities - up to 50 000 min<sup>-1</sup>
- Constant power operation up to 10 x base speed: no oversizing of the drive
- High dynamic performance and power density: increased productivity and reduced size compared to induction motors
- Cold permanent magnet technology: reduced heating in the bearings compared to induction motors, no dilatation effect
- Compatibility with third-party drives
  - Siemens
  - Fanuc

### Technical Characteristics - Overview

<b>Motor type</b>	Permanent magnet synchronous motors
<b>Type of construction</b>	Individual components: rotor, stator and feedback sensor
<b>Power supply</b>	3 ph - 400 VAC
<b>Power range</b>	up to 230 kW
<b>Speed range</b>	up to 50 000 min <sup>-1</sup>
<b>Insulation of stator winding according to CEI 60034-1</b>	Class F
<b>Ambient temperature</b>	40 °C maxi
<b>Altitude</b>	< 1000 m
<b>Cooling</b>	<ul style="list-style-type: none"> <li>• Water cooling (standard)</li> <li>• Natural convection on request</li> </ul>
<b>Stator design variants</b>	<ul style="list-style-type: none"> <li>• Stator without housing (standard)</li> <li>• Stator housing on request, with or without water cooling circuit</li> </ul>
<b>Rotor design variants</b>	<ul style="list-style-type: none"> <li>• Rotor without hub (standard)</li> <li>• Rotor with hub on request</li> </ul>
<b>Connections</b>	2 m flying cables without connectors

# Frameless Servo Motor - TK Series

## Overview

### Description

Delivered as separate rotor and stator to be integrated into the mechanical structure of the machine, TK series torque motors lead to simplified designs, reduced costs, and increased accuracy.

TK series is distinguished from existing solutions by their exceptional robustness, making them particularly suited to harsh environments.

Benefiting from Parker's unprecedented know-how in the design and manufacture of torque motors, TK series can also be delivered as complete sub-assemblies including frame, cooling system, bearings, feedback sensor...

### Advantages

- Simplified mechanical designs
- Reduced sizes and weights
- Reduced maintenance
- Increased rigidity and accuracy

### Applications

- Material Forming
- Material Handling
- Tooling Machines
- Pulp & Paper

### Features

- **Mounting**  
Tapped holes on rotor and stator periphery
- **Cooling**  
Water cooling (standard) or natural convection (available with derating, consult us)
- **Thermal protection**  
PTC and KTY probes fitted into the stator winding
- **Feedback sensor**  
Chosen depending upon mechanical conditions, required accuracy and drive specifics: resolver, sin/cos encoder...
- **Electrical connections**  
Flying cables without connectors, 2 m length

### Technical Characteristics - Overview

<b>Shaft-heights</b>	130 - 200 - 315 - 400 mm
<b>Power supply</b>	400 VAC three-phased
<b>Torque</b>	up to 21000 Nm
<b>Stator winding's insulation according to CEI 60034-1</b>	Class F

TK Series

# Stepper Motor - SY

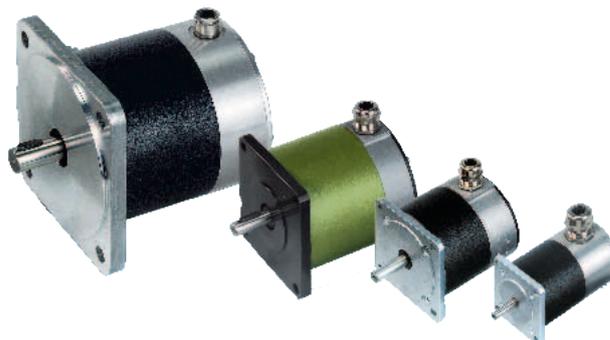

## Overview

### Description

The stepper motors of the SY-series are two-phase steppers and are designed for industrial applications. Flying leads and terminal box versions are available and encoders can be ordered as optional items.

### Features

- 1.8 degree - 2 phase hybrid stepper motors
- Nema 23 , Nema 34 & Nema 42 frame sizes with 1-, 2- and 3-stack motor lengths
- Rated at IP55 as standard
- Option for: IP68 on terminal box version
- Option for: 200 or 500 line encoder
- Option for: Vacuum preparation to 10<sup>-6</sup> Torr
- Holding brake available
- Rear shaft options
- Terminal box or flying leads
- Maximum holding torque 0.45 - 13 Nm
- Current per phase: 4.2 - 10 A (rms)
- Inductance per phase: 1 - 2.7 mH
- Rotor inertias: 12.5 - 1200 kgmm<sup>2</sup>

### Technical Characteristics - Overview

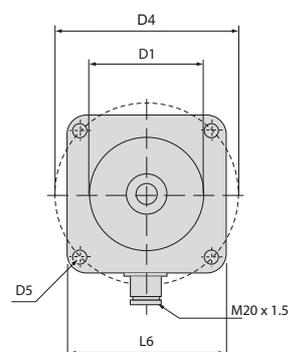

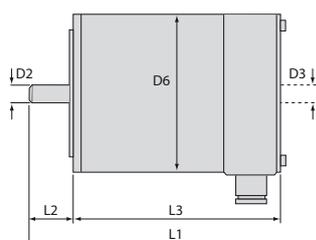

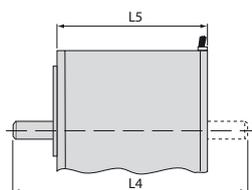

Type	SY56	SY87	SY107
Maximum holding torque [Nm]	0.45...1.25	1.8...5.4	9...13
Current per phase (parallel) [Arms]	4.2...6.5	4.2...8.4	8.0...10
Inductance per phase [mH]	1.0...1.2	1.6...1.7	2.4...2.7
Rotor inertia [kgmm <sup>2</sup> ]	12.5...32.5	65...195	800...1200
Axial bearing loading [N]	80	180	400
Radial bearing loading [N]	150	280	650
Weight [kg]	0.6...1.35	1.7...2.85	7.2...9.8

# High Performance DC Servo Motor - RS Series

## Overview

### Description

Using high energy magnets, RS DC motors combined with RTS drives are particularly suitable for applications which require a very compact solution or a high dynamic level.

### Characteristics and advantages

- High performance characteristics
- Excellent low-speed functioning
- High compactness
- Very long service life
- Rare earth magnets
- Tacho, encoder resolver and brake in option

### Features

- **Shaft**
  - RS1 to RS4: Smooth full shaft
  - RS5 and RS6: Full keyed shaft
- **2<sup>nd</sup> Shaft end**
  - RS1 to RS3: possibility to mount standard tacho or encoder
  - RS5 and RS6: possibility to mount standard tacho, adaptation for encoder mounting in option
- **Output cables 1 m without connector**
- **Options**
  - Brake (RS2 to RS6)
  - Tachometer
  - Adaptation 2<sup>nd</sup> shaft end for encoder mounting (RS5 and RS6)

# Low-Cost DC Servo Motor - RX Series

## Overview

### Description

The RX DC motors, combined with RTS drives, provide an economical solution for any servo applications. They are particularly suitable for low power systems in clean atmospheres.

### Advantages

- Excellent price/performance ratio
- Very low torque modulation
- High quality construction
- Very long service life
- 2nd shaft end for tacho and encoder mounting
- Tacho and brake as option

### Applications

- Factory Automation
- Life Science Diagnostic

### Features

- **Shaft**
  - RX1 and RX3: Smooth full shaft
  - RX5 and RX6: Full keyed shaft
- **2<sup>nd</sup> Shaft end**
  - RX1 and RX3: possibility to mount standard tacho or encoder
  - RX5 and RX6: possibility to mount standard tacho, adaptation for encoder mounting in option
- **Output cables 1 m without connector**
- **Options**
  - Brake
  - Tachometer
  - Adaptation 2<sup>nd</sup> shaft end for encoder mounting (RX5 and RX6)

### Technical Characteristics - Overview

# Pancake DC Servo Motor - AXEM Series

## Overview

### Description

The AXEM motor, with more than 2 million units produced, is one of the most widespread servo motors in the world. With its disk rotor, composed solely of copper and insulator the Axem motor achieves high dynamics and excellent regulation of motion at low speed, as well as silent and vibration-free functioning. It is robust, efficient, and low maintenance.

### Advantages

- Very low speed modulation
- Exceptional regulation at low speed
- High dynamic characteristics  
low rotor inertia
- Silent and vibration-free functioning
- Maintenance free
- Disk rotor
- Protection: IP44  
IP20 for ventilated models
- Class F insulation

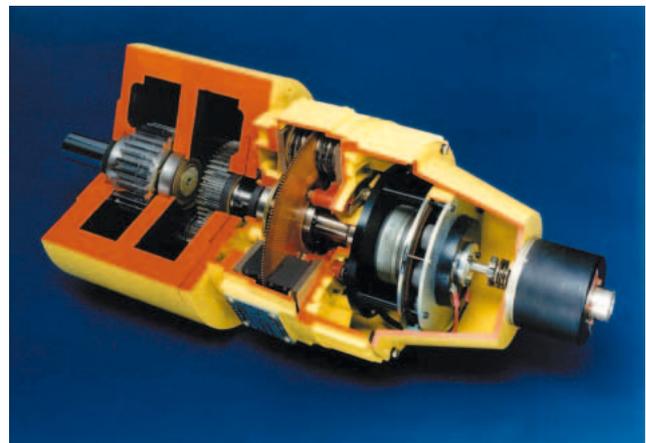

### Applications

- Factory Automation
- Life Science Diagnostic

### Technical Characteristics - Overview

<b>Nominal torque</b>	0.14 ... 19.2 Nm

# Planetary Gearboxes

Precision Gearboxes PS / RS Series

Economic Gearboxes PE Series

PR / RS

PE

# Precision Planetary Gearboxes PS / RS Series

## Overview

### Description

The Helical Planetary Gearboxes incorporate design enhancements to provide superior performance for the most demanding high performance applications. The PS / RS gearboxes incorporate dual angular contact bearings providing higher radial load capacities while maintaining high input speeds. The design enhancements comprise among others, needle bearings to ensure a longer lifetime. Internal design changes and optimized gearing geometries provide the basis for the universal mounting position.

Common mounting kits across multiple gear head lines promote quicker deliveries and ease of mounting to any servo motor.

Mounting to any servo motor is as easy as A-B-C (adapter, bushing, collet).

### Features

- **Higher radial load capacity:**  
Angular contact output bearings
- **Increased service life:**  
Needle bearings
- **Life time lubrication**
- **Universal Mounting Kits:**  
Quicker deliveries and easier mounting
- **High nominal torque and low backlash:**  
Helical planetary gearing
- **High stiffness:** Integrated planetary gear head
- **High wear resistance:**  
Plasma Nitriding heat treating

### Technical Characteristics - Overview

<sup>(1)</sup> At nominal speed  $N_{nom r}$ .

<sup>(2)</sup> Maximum of 1000 stops.

<sup>(3)</sup> Cycle mode.

<sup>(4)</sup> Max. radial load applied to the center of the shaft at 100 min<sup>-1</sup>

<sup>(5)</sup> Max. axial load at 100 min<sup>-1</sup>.

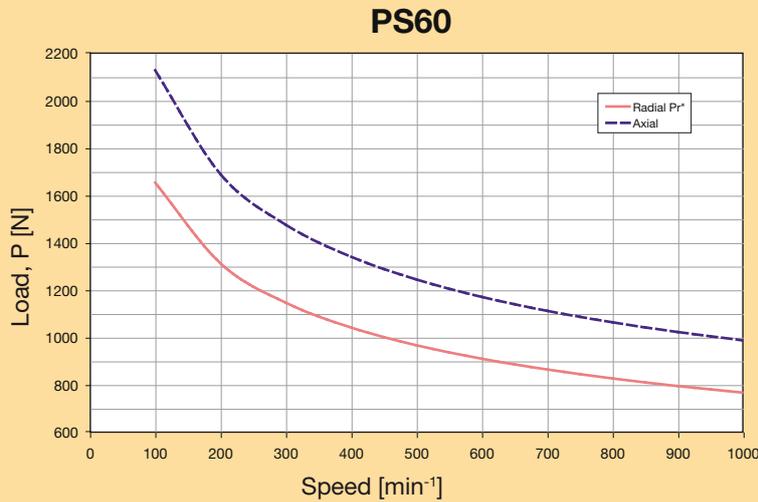

<sup>(6)</sup> Measured at 2 % of rated torque.

<sup>(7)</sup> Measure at 1 m.

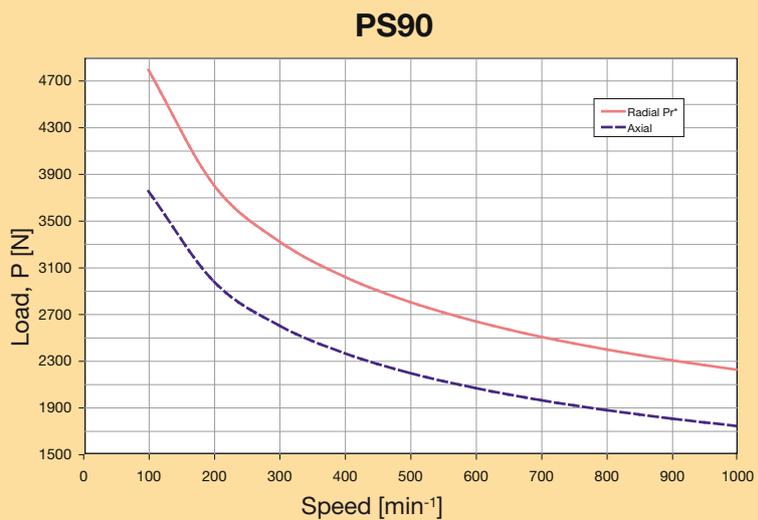

<sup>(8)</sup> Gearboxes in bold print - ratios with standard reversing play are on stock.

## Load on Input Shaft

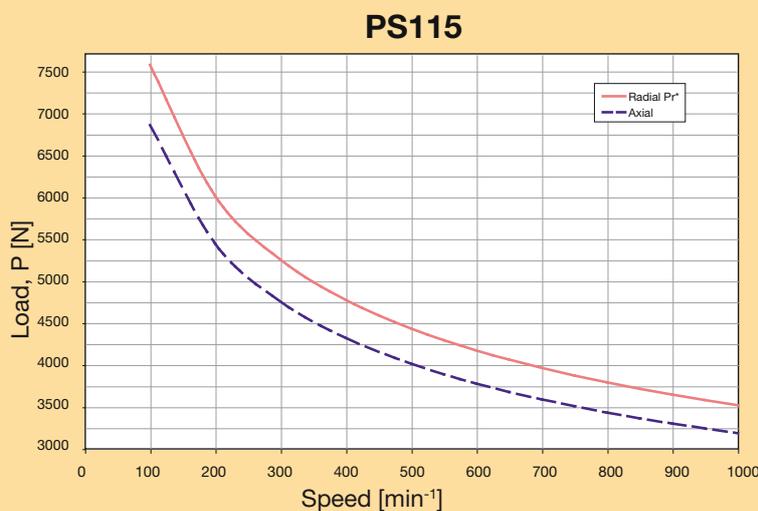

Formulas to calculate radial load ( $P_{rx}$ ) at any distance "X" from the gearbox mounting surface:

$$P_{rx} = P_r * 75 \text{ mm} / (49 \text{ mm} + X)$$

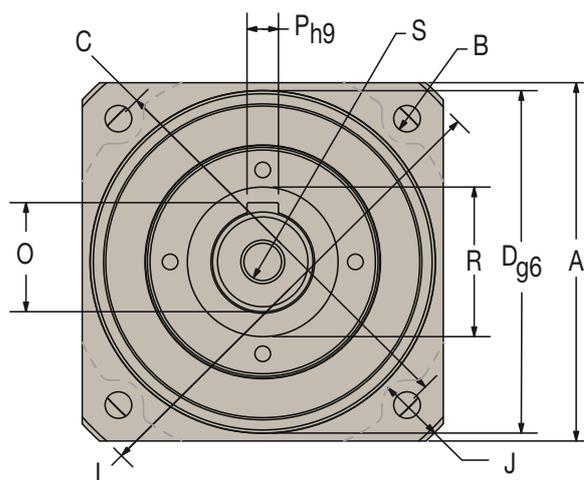

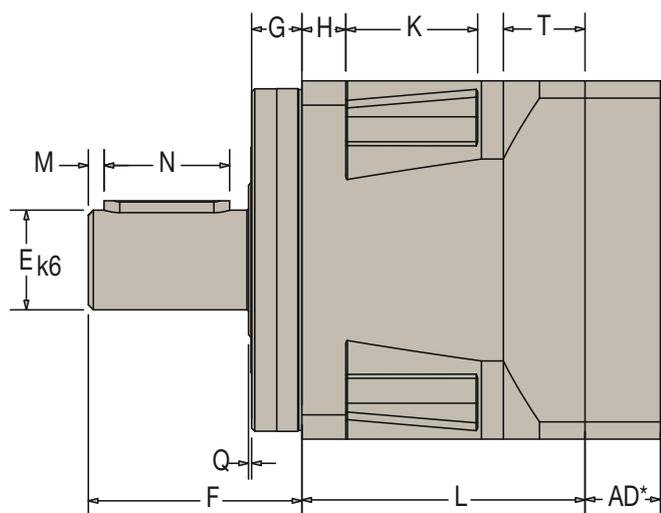

$$P_{rx} = P_r * 96 \text{ mm} / (62 \text{ mm} + X)$$

$$P_{rx} = P_r * 124 \text{ mm} / (81 \text{ mm} + X)$$

\* Radial load applied to center of the shaft.

# Gearbox Sizing

Parker has prepared the following procedure to provide a quick method for selecting a gearbox.

## 1) Application parameters:

- Acceleration time ( $t_{acc}$ )
- Continuous run time ( $t_{cont}$ )
- Deceleration time ( $t_{dec}$ )
- Dwell time ( $t_{dwell}$ )
- Acceleration torque ( $T_{acc}$ )
- Continuous torque ( $T_{cont}$ )
- Deceleration torque ( $T_{dec}$ )

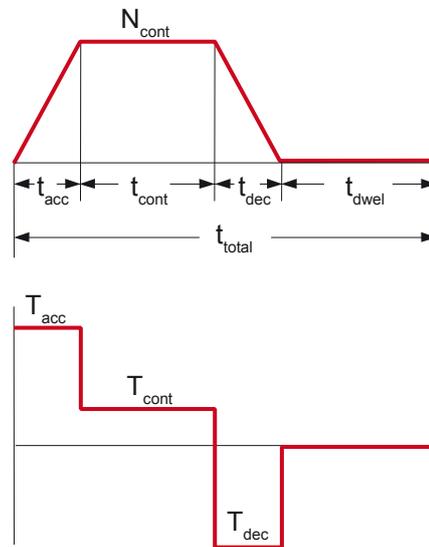

- Application speed ( $N_{cont}$ )
- Transmission ratio ( $i$ )
- Gearbox nominal torque ( $T_{nom r}$ )
- Max. permissible acceleration torque ( $T_{acc r}$ )
- Percentage of acceleration torque vs. continuous cycle time ( $t_{total}$ )
- Max. input speed ( $N_{max r}$ )

## 2) Duty cycle:

$$\text{Duty cycle} = \frac{t_{acc} + t_{cont} + t_{dec}}{t_{total}} \times 100 \%$$

If duty cycle is <60 % and ( $t_{acc} + t_{cont} + t_{dec}$ ) is less than 20 minutes, the motion is considered to be intermittent.

If duty cycle is <60 % and ( $t_{acc} + t_{cont} + t_{dec}$ ) is more than 20 minutes, the motion is considered to be continuous.

## 3) For Cycle mode applies:

Determine  $T_{acc}$  % of ( $T_{acc} + T_{cont} + T_{dec}$ ):  
 $T_{acc} / (T_{acc} + T_{cont} + T_{dec}) \times 100\%$

Define the ratio:  $T_{cont} / T_{acc}$

Use the table to select the load factor K.

Compare Accel/Decel torque to the maximum permissible accel torque of the gearbox  $T_{acc r}$ :  $T_{acc} < T_{acc r} \times K$ , if not, please select a more suitable gearbox.

Compare the required maximum speed to the maximum rated speed of the gearbox.

$$N_{max} < N_{max r / i} \text{ (i-gearbox ratio)}$$

Table: Load Factor K

$T_{acc}$ %	$0 < T_{cont} / T_{acc} < 0.25$	$0.25 < T_{cont} / T_{acc} < 0.5$
10-15	1.0	1.0
15-20	1.0	0.95
20-25	0.94	0.89
25-30	0.88	0.84
30-35	0.81	0.79
35-40	0.76	0.75
40-45	0.71	0.70
45-50	0.66	0.66

## 4) For continuous operation applies:

$$T_{nom} < T_{nom r}$$

$$N_{nom} < N_{nom r} / i$$

## 5) Check the Emergency Stop Torque Rating.

## 6) Verify Radial and Axial Shaft Load of the Application for the selected Gearbox.

# Economical Planetary Gearheads - PE

## Overview

### Description

The PLE is the perfect economy alternative to the PS gearbox. This planetary gearbox was especially designed for all applications where a considerably low backlash is not of vital importance.

### Features

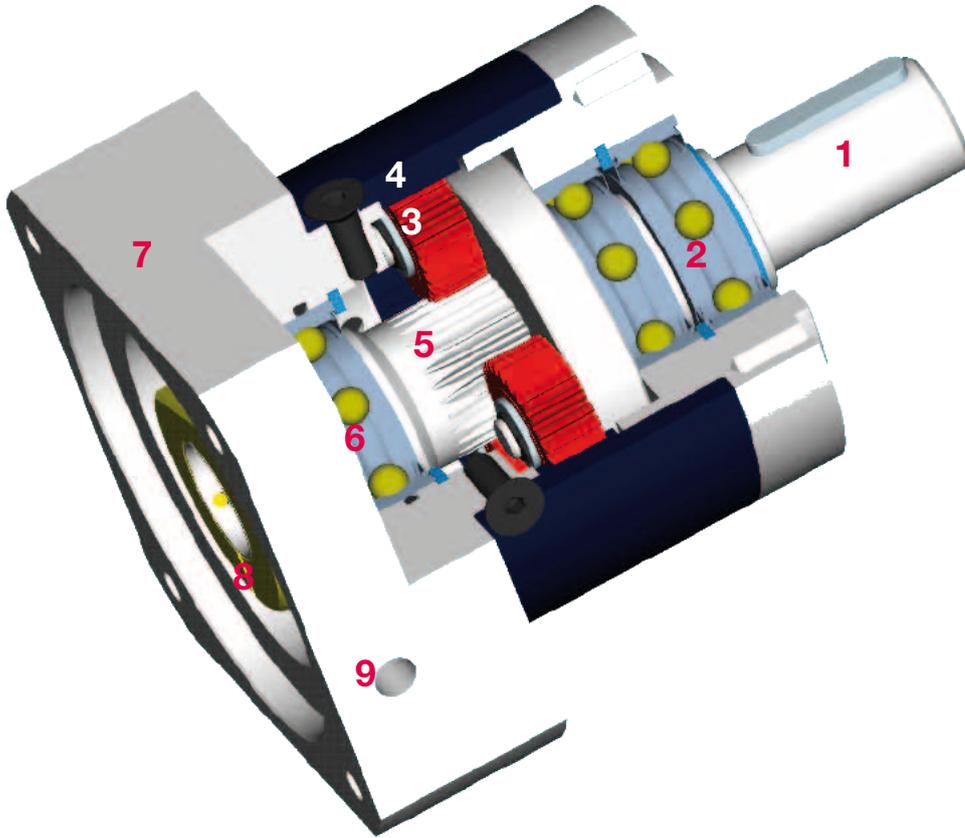

- Excellent price/performance ratio
- Input speeds up to 8000 min<sup>-1</sup>
- Low backlash
- High output torques
- PCS-2 system
- High efficiency (96 %)
- 22 ratios  $i=3...512$
- Low noise
- High quality (ISO 9001)
- Any fitting position possible
- Simple motor fitting
- Life time lubrication
- Direction of rotation equidirectional
- Balanced motor pinion

### Technical Characteristics Overview

Features	Unit	Division
Geometry		Planetary Gearheads
Type		Inline
Drives sizes	[mm]	60, 90, 115
Maximum input speed	[min <sup>-1</sup> ]	up to 13000
Nominal torque	[Nm]	260
Radial force	[N]	up to 2400
Service life	[h]	30000
Backlash	[arcmin]	< 8

# Layout / Features

**1 Output shaft**

The input shaft is case-hardened and offers a very good torsional rigidity.

**2 Output shaft bearing**

Double ball bearings distribute the load evenly which results in a high radial and axial load bearing capacity.

**3 Planet wheel**

Case-hardened and precision ground.

**4 Annulus gear in the housing**

Case-hardened and precision ground.

**5 Sun gear**

Case-hardened and precision ground.

**6 Sun gear bearing**

The integral sun gear allows precise mounting within a few minutes. The inside of the gearhead is protected against contamination.

**7 Mounting flanges**

The gearheads are available with motor flanges for a variety of common servo and stepper motors.

**8 Clamping bushing**

Consists of clamp collar and clamp screw.

The proven clamped joint for the motor shaft with even pressure distribution ensures safe torque transmission even at high loads.

**9 Fitting aperture**

Easy access for tightening and loosening the clamped joint.

Parker I/Os

# IEC61131-3 Controller with Powerlink - ACR9640

## Overview

### Description

The ACR EPL family is Parker's premier standalone motion controller family, capable of controlling up to 16 axes of motion. Connectivity and communication features give the ACR EPL flexibility for use in a wide variety of machine architectures. The ACR EPL excels as a standalone machine and motion controller, interfacing with a PC or working alongside a PLC. A powerful DSP makes the ACR EPL an outstanding multitasking servo controller. The ACR EPL includes easy-to-use project-development tools that enable fast, efficient application creation and maintenance. The ACR EPL is the solution for standalone applications requiring industry-leading performance in an affordable and easy-to-use package. The ACR9640 is a compact, cost-effective, EPL-only controller including Ethernet, USB and an integrated 2-port hub for ETHERNET Powerlink connections. I/O can be added using CANopen or by utilizing the inputs and outputs on the EPL drives.

ETHERNET Powerlink expands the ACR EPL family by adding a real-time motion controller over standard Ethernet hardware. The high speed digital communications network enhances machine performance and configuration possibilities while reducing set-up time and installation complexity.

### Features

- Control of 16 ETHERNET Powerlink drives
- 10/100 Base-T Ethernet
- USB 2.0
- EtherNet/IP compatibility
- CANopen expansion I/O
- CE (EMC & LVD), UL and cUL Recognized
- Multitasking of up to 24 simultaneous programs
- Interpolation of 8 axes in any combination
- IEC61131-3 programming with structured text, continuous function chart and ladder diagram

### Technical Characteristics - Overview

	ACR9640
<b>Power supply</b>	24 VDC, 1A
<b>Processor</b>	32 bit DSP @150 MFLOPS/75 Hz
<b>User memory</b>	2 MB flash-based
<b>Motion bus</b>	ETHERNET Powerlink: 16 axes
<b>Operating system</b>	Multi-tasking RTOS
<b>Ethernet</b>	TCP/UDP, ETHERNET/IP
<b>CANopen</b>	DS401 protocol

## Proven Control Engine with IEC61131-3 Programming

The ACR-9640 Controller provides multitasking of up to 16 simultaneous programs with multiple coordinate systems.

### Motion and programming capabilities:

- IEC61131 programming
  - Structured text, ladder logic and CFC
  - PLCOpen motion function blocks
  - Parker function blocks
- Linear interpolation up to 8 axes
- Up to 16 PLC tasks: timer, cyclic or interrupt configurable task priority
- Additional 16 AcroBasic tasks available
- Segmented electronic camming
- Electronic gearing with real-time phase advance
- Linear, circular, helical and spline interpolation
- Gantry lock
- Backlash and ballscrew compensation

### Hardware features:

- EPL versions support up to 16 axes of coordinated motion
- Equipped with 2 MB of user memory standard
- Robust connectors hold up in harsh environments
- EtherNet/IP, CANopen, USB2.0, RS232 and RS485 communications are supported, with multiple channels available simultaneously
- Industry-standard Ethernet/IP communications
- ETHERNET Powerlink digital motion bus
- CANopen I/O support for over 1000 points of I/O
- Indicator LED's improve your troubleshooting capability

**ACR-9640 supports standard PLCOpen function blocks, and adds Parker custom multi-axis functions**

PLCOpen Function Blocks:		Parker Function Blocks:

MC_ReadActualPosition				ACR_TouchProbe

### Industry-standard programming in a proven platform

The ACR9640 offers the best of IEC61131-3 standard programming. With structured text, continuous function chart and ladder diagram programming, we offer the right language for your application.

### Multiple fieldbus options

The ACR9640 supports EPL for high-speed motion and CANopen for analog and discrete I/O. EtherNet/IP is also supported for integration with other PLC's and HMI's. EtherNet/IP, CANopen, USB2.0, RS232 and RS485 communications are supported, with multiple channels available simultaneously.

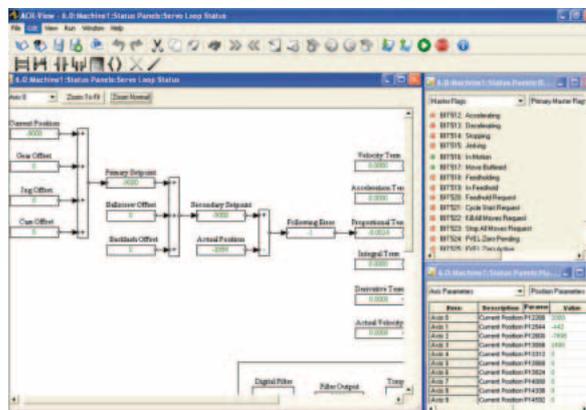

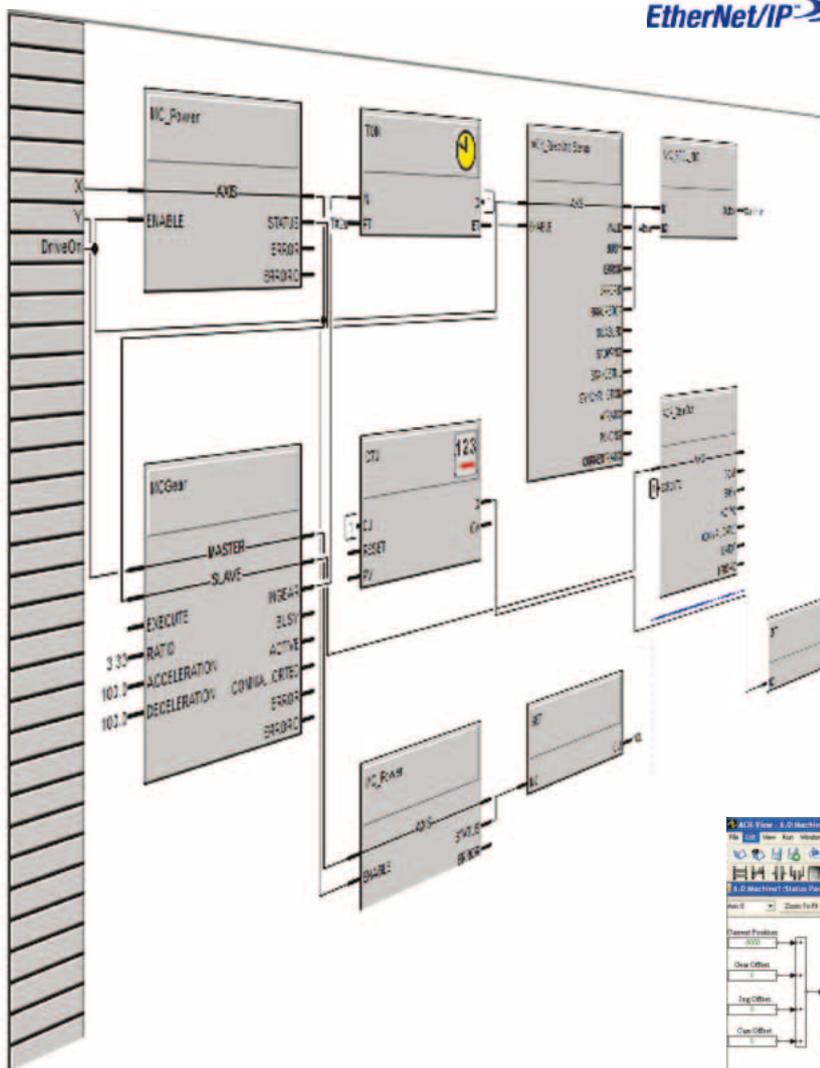

### Connectivity

The ACR EPL controllers include a separate Ethernet port for TCP/IP and EtherNet/IP™ traffic. The ACR controller acts as a gateway between the real-time EPL domain and other communications, allowing the EPL network to remain focused on time-critical motion and I/O functions. The controller can service multiple communications channels at once, giving users many options for PC and PLC connectivity in development and normal operation.

The EtherNet/IP™ network is designed to use standard Ethernet and TCP/IP equipment for the industrial environment. The application layer protocol is an open standard - CIP™ (Control and Information Protocol). CIP is the same upper layer protocol used by DeviceNet™ and ControlNet™ networks, allowing interoperability between various industrial devices.

### ACR-View

ACR-View automatically generates a suite of common tags for each project you define. These tags can be automatically used in your Xpress HMI application.

ACR9640

## ACR-View Software Development Kit

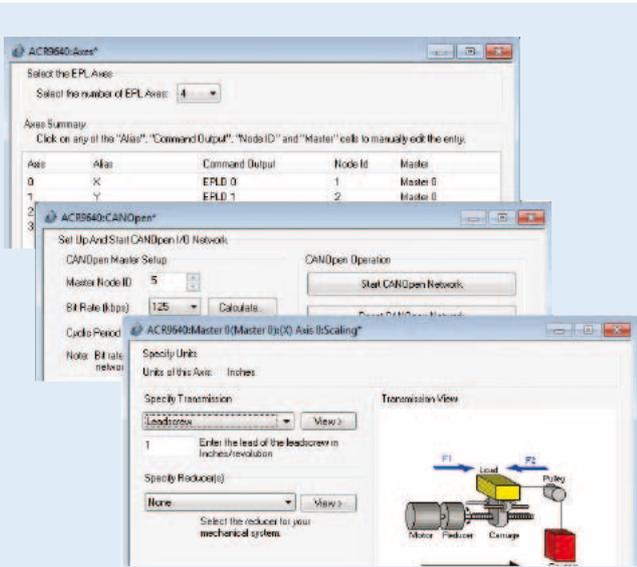

ACR-View is a powerful project-development suite that assists the user of the ACR family products in programming, debugging and commissioning their application. Many features are incorporated to assist both the novice and expert users in developing code. All the tools needed to build and maintain a motion project are included:

- Ethernet, USB, CANOpen and serial connection support
- Project Configuration Wizard
- Servo tuning tools
- Built-in oscilloscope, strip chart and XY plot
- IEC61131-3 editor (structured text, ladder diagram and continuous function chart)
- Real-time terminal interface
- Servo loop diagnostic tool
- Comprehensive status panels
- Integrated help files

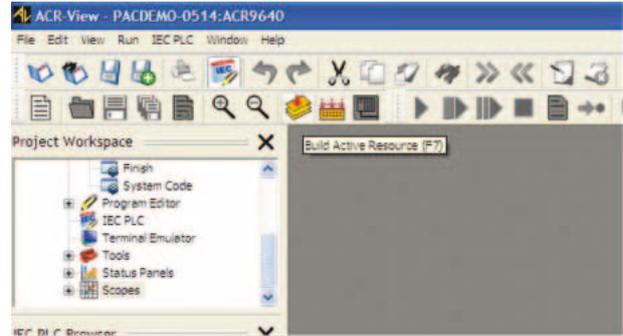

## Development Overview

## Configuration Wizard

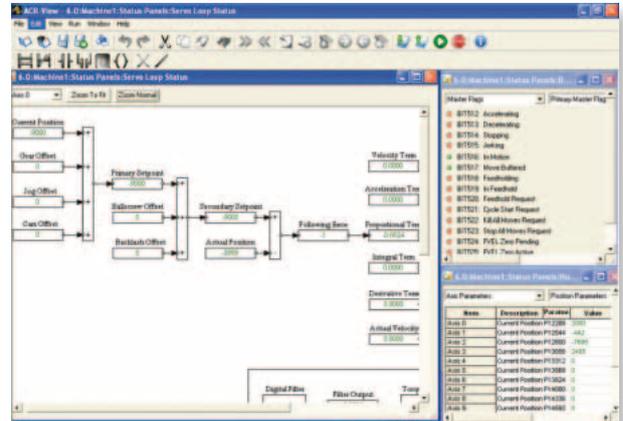

Project set-up is streamlined through the use of the Configuration Wizard. The ACR9640 can be configured in a matter of minutes as the user is guided through a series of simple steps. ACR-View will set the necessary parameters to have the controller ready for motion and code development.

ACR-View's configurable environment allows you to create a development system that works the way you do. Elements of the environment can be docked, floated or moved to where they work best for you. Additional information is available from tool tips and a context sensitive help system.

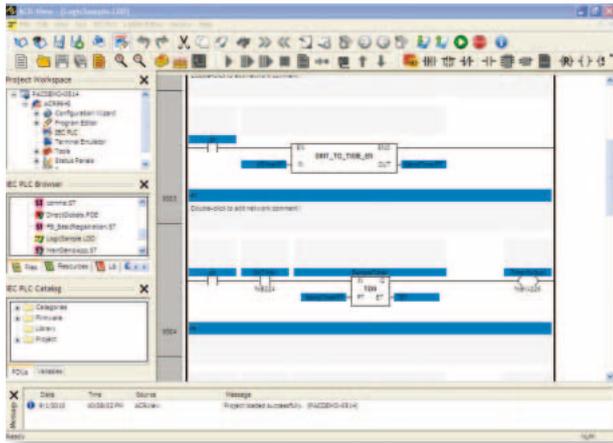

## Status Panels

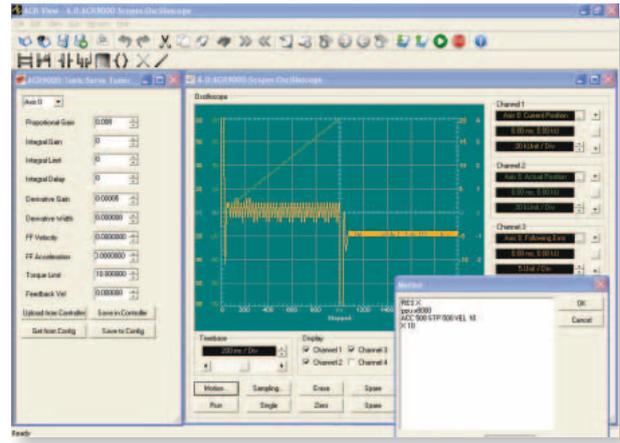

View virtually any parameter or flag within the controller using the Bit and Numeric Status panels. The Servo Loop Status panel allows in-depth analysis of servo operation.

Controller Products  
ACR9640

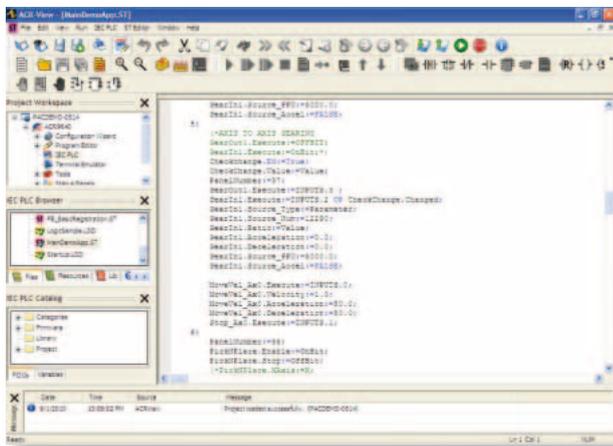

### Editors

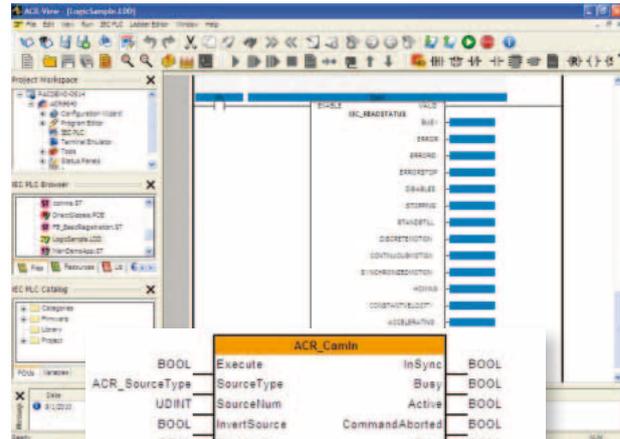

### Tuning

Servo tuning can be optimized with ACR-View's powerful oscilloscope feature. Up to four channels of data can be observed and stored. Tuning gains are updated immediately and move profiles can be tailored to best fit the application's needs.

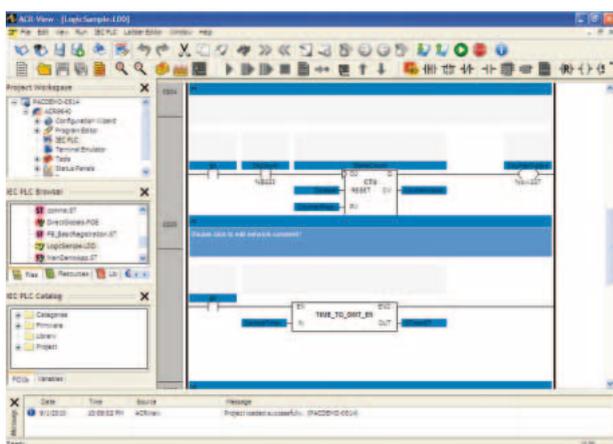

### Motion Control Function Blocks

ACR_CamIn			
BOOL	Execute	InSync	BOOL
ACR_SourceType	SourceType	Busy	BOOL
UDINT	SourceNum	Active	BOOL
BOOL	InvertSource	CommandAborted	BOOL
REAL	CamScale	Error	BOOL
REAL	CamOffset	ErrorID	WORD
UDINT	CamCycles	EndOfProfile	BOOL
DINT	IndexOffset		

ACR_GearIn			
BOOL	Execute	InGear	BOOL
ACR_SourceType	SourceType	Busy	BOOL
INT	SourceNum	Active	BOOL
REAL	Ratio	CommandAborted	BOOL
REAL	Acceleration	Error	BOOL
REAL	Deceleration	ErrorID	WORD
REAL	SourcePPU		
BOOL	SourceAccel		
DINT	OffsetMax		
DINT	OffsetMin		

IEC61131-3 editors support complete project development in one or several supported languages. Motion and I/O logic are supported in all languages.

ACR-View not only incorporates the industry-standard PLCopen function blocks for motion, but goes beyond with proprietary multi-axis and coordinated function blocks.

Controller Products  
ACR9640

## ETHERNET Powerlink

### EPL Controller Managing Node (MN)

- Stores and runs the motion program
- Supervises and controls local drive I/O and system expansion I/O
- Generates motion trajectories for all axes
- Sends position set points to drives
- Synchronizes positions of multiple axes for tightly coordinated motion

### Compax3 EPL I30 Controlled Node (CN)

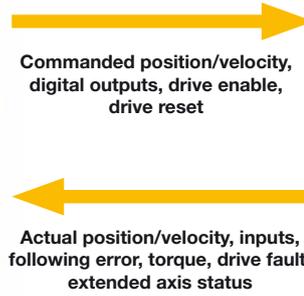

- Closing servo loops including torque, velocity and position loops
- Local I/O (8 in, 4 out)
- High-speed inputs for registration
- Encoder feedback from motor, Resolver ...
- STO

ACR9640 Multi-axis  
EPL Controller

Compax3  
EPL Servo Drive

## ETHERNET Powerlink Communications

- Replace the traditional  $\pm 10$  V analog control and feedback cables with an all-digital Ethernet network
- Real-time, deterministic data to and from nodes is guaranteed each cycle with the slot communications network protocol, illustrated in the diagram below
- Proven, robust CANopen profiles are sent over proven, robust Ethernet hardware
- Standard TCP/IP communications does not interrupt determinism, as it takes place during the asynchronous slot at the end of the cycle
- Excellent performance with timing jitter  $< 1 \mu s$

# Technical Characteristics

## Technical Data

### ACR9640 EPL Controller

<b>Hardware</b>	Axes/controller	16 EPL axes
	Power requirement	24 VDC, 1 A
	Processor	32 bit floating-point DSP @150 MFLOPS / 75 MHz
	User memory	2 MB flash-based. Retains user programs and system configuration parameters
	Firmware	Flash-based
	Operating system	Multi-tasking RTOS
	Battery backup	Non-volatile memory retains all system and user variables (5 years @25 °C)
<b>Performance</b>	Multi-tasking	8 coordinated systems/16 text programs/8 ladder programs
	Trajectory update	64 bit precision, 500 µs (axes dependent)
	Interpolation	Linear, circular, sinusoidal, helical, elliptical, spline, 3D arcs
<b>Communications</b>	ETHERNET Powerlink	ETHERNET Powerlink V2. Integrated 2-port hub, RJ-45 connectors Supports EPL DS402 drives in interpolated position mode
	Serial interface	1 serial port (RS232 and/or RS422)
	Ethernet	10/100 Base-T, RJ-45 connector. Supports IP protocols TCP/UDP, EtherNet/IP
	USB	USB 2.0, type B connection
	CANopen	Standard 9-pin D-sub connector Supports DS401 protocol for I/O devices
<b>Provided software</b>	Development software	ACR-View software development kit
	Language support	Libraries for C++, VB6, C#, VB.NET, LabVIEW

## Environmental Characteristics

### Ambient conditions

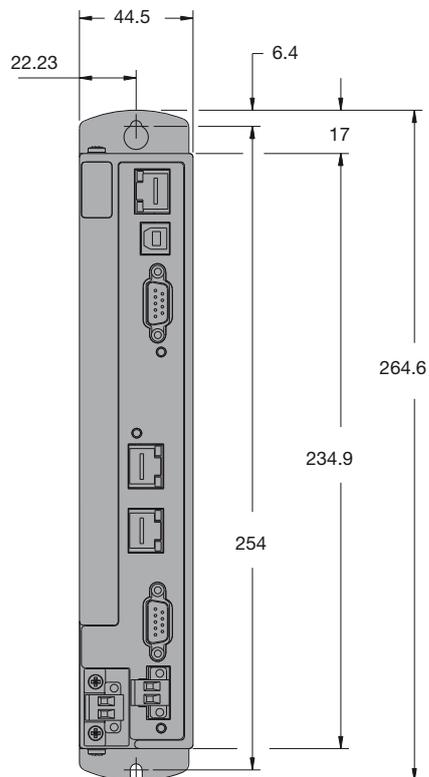

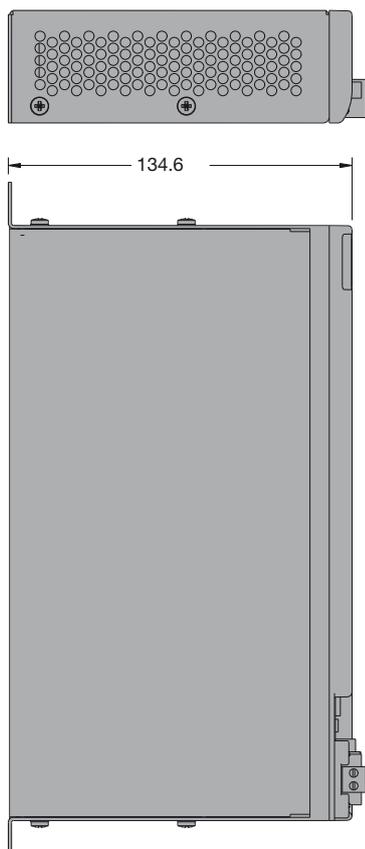

<b>Temperature range</b>	<ul style="list-style-type: none"> <li>Operating temperature: 0...+50 °C</li> <li>Storage temperature: -40...+75 °C</li> </ul>
<b>Humidity</b>	Operating humidity: 0...95 % non-condensing
<b>Pollution degree</b>	2 (per IEC61010)
<b>Shock</b>	15 g, 11 ms half-sine
<b>Vibration</b>	10...2000 Hz @2 g

## Standards and Conformance

<b>CE compliance</b>	CE (EMC) CE (LVD)
<b>UL certification</b>	UL Recognized
<b>RoHS compliance</b>	Complies with European Union Directive 2002/95/EC - Restriction of Hazardous Substances (RoHS)

# IEC61131-3 Controller with CANopen - C3 powerPLmC-E30

## Overview

### Description

Compax3 powerPLmC is a control system for combined PLC, motion and visualization tasks. CANopen combines the bus components with the CANopen master "Compax3 powerPLmC". The power range of commands based IEC61131-3 is available for control tasks.

Programming takes place in the "CoDeSys" high-power programming system via Ethernet. The implementation of the motion tasks is supported by PLCopen function modules.

### Features

- **32 Bit - RISC - Processor:** <100 µs for 1000 IL commands
- **CANopen multi-axis communication**
- **Simple integration of the servo axes via the Drive Interface**
- **Ethernet:**
  - Programming interface,
  - Remote diagnostics via Internet/Intranet
  - Process visualization,
  - System integration
- **Programmable based on IEC61131-3 / PLCopen**
- **CoDeSys V2.3 development tool**
- **PLC functionality**
  - 4 real-time task types: free-running, cyclical, event-triggered (internal or external events)
  - Debugging, single step, watch function, log
  - Online program change
- **PLC extensions offered by Parker:**
  - POP: Parker Operator Panel (MMI) - from the 4-line display to the color touch screen
  - PIO: Parker digital and analogue inputs/outputs - modular extensions
  - InteractXpress (HMI)

### Technical Characteristics - Overview

<b>Platform</b>	32 bit RISC processor 200 MHz
<b>Program memory</b>	128MB Compact Flash card
<b>Data memory SDRAM / Data memory non volatile</b>	16 MB / 32 kB (Retain)
<b>Controller features</b>	
<b>Processing time</b>	<100 µs for 1000 IL rows
<b>Minimal cycle time</b>	Typical 1 ms
<b>Programming and debugging</b>	
<b>Programming system</b>	CoDeSys V2.3
<b>Programming languages</b>	IL, SFC, FBP, ST, LD, CFC
<b>Visualization</b>	
<b>Locally on the programming system</b>	Yes
<b>Web Server</b>	Yes
<b>OPC Server</b>	Yes
<b>Interfaces</b>	
<b>general</b>	2x RS232
<b>Fieldbus options</b>	<ul style="list-style-type: none"> <li>• 2 x CANopen Master</li> <li>• DP - SLAVE (Profibus)</li> <li>• Ethernet                             <ul style="list-style-type: none"> <li>• 10/100 MBauds</li> <li>• TCP / UDP</li> <li>• Modbus TCP/IP Server</li> </ul> </li> </ul>
<b>Digital and analog inputs/outputs option</b>	Any (depending on the number of axes) via PIO and CANopen

## Application of the Multi-Axis Motion Controller C3 powerPLmC-E30

**C3 ServoManager / CoDeSys**

- IEC61131-3
- PLCopen
- Data handling
- Visualization
- Communication (process control)
- Access to all system components
- Project handling

---

**C3 powerPLmC-E30**

- Communication
- Actuator system
- Net Working
- Drive interface

---

**C3 ServoManager / CoDeSys**

- IEC61131-3
- PLCopen
- CamDesigner
- Optimization Setup
- Diagnostics / analysis / maintenance Scope

---

**MotorManager**  
Motor database  
HydraulicsManager  
Valve library

---

Dimensioning tools

---

**PC Software**

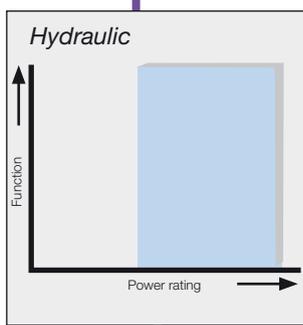

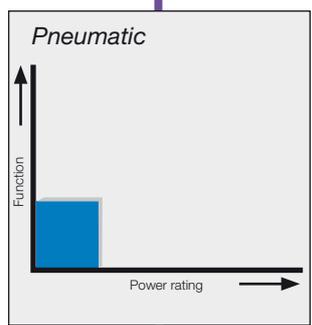

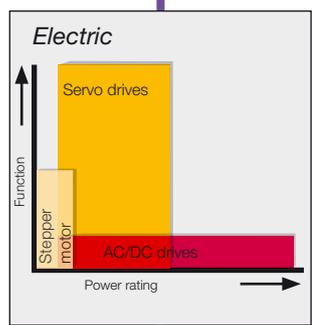

**Visualization / HMI**

- POP

**decentralized I/O extensions**

- PIO

**CANopen**

- Servo Motors
- Step motors
- AC motors
- Direct drives
- Handling Actuators
- Precision actuators

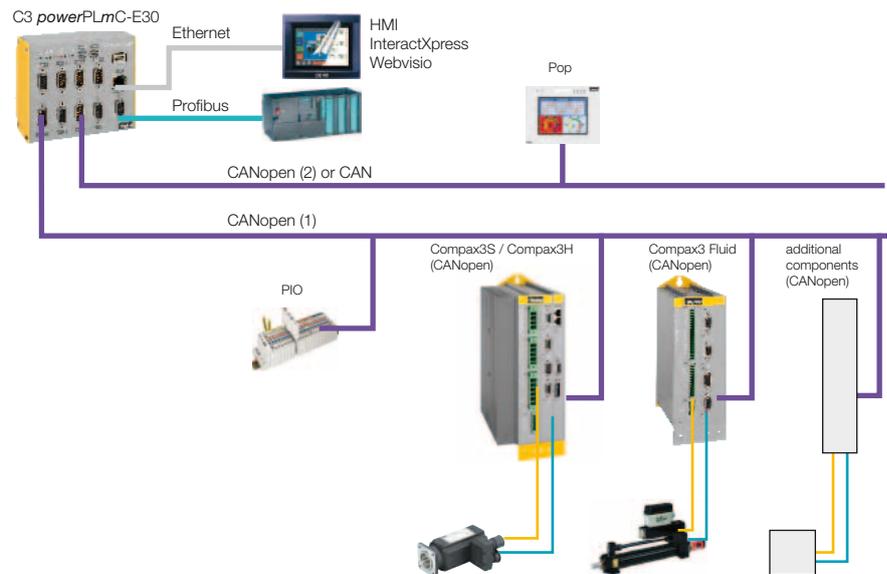

- Cylinder
- Grippers
- Rotary modules
- Rotary drives
- Linear drives

- Motors
- Cylinder
- Valves
- Pumps

## System Design with the Motion PLC C3 powerPLmC-E30

### Main fields of application

- More than two axes for motion automation
- High degree of system integration (e.g. via Ethernet)
- Integration of complex devices for machine visualization and operation
- Connection to a wide number of digital and analog inputs
- Integration of pneumatic and hydraulic automation devices
- High proportion of PLC typical tasks
- Integration of additional automation components via a second CAN bus.
- Basis for the realization of hybrid machine concepts electromechanics, hydraulics and pneumatics

## Functions

### Motion Control

- Ready-made PLCopen compliant Motion Control function modules allow users to create programs effectively
- Drive interface
  - Integrating a servo axis without fieldbus knowledge
  - shortest transmission times due to internal cache memory; only modified data is transmitted

### Project Management

- Saving and archiving an entire project (source file) including symbols and comments to make service calls easier, because there is no need for any project data on the device itself.
- Creating and protecting user-specific libraries that can be reused as tested sections of programs
- Various user levels make it possible to lock sections of the program with passwords
- 5 IEC languages plus CFC can be selected
- Data import / export

### File Handling

- The controller can generate files (e.g. for error protocols, recipes, machine parameters)
- Files are available via the FTP server on a drive in C3 powerPLmC and can be downloaded onto a PC.
- Error messages can be assigned to an error string by means of the error number and then stored together with the time of day (from an integrated clock)

### Networking control systems

- Multiple control systems can be networked together via Ethernet
- Exchanging information via network variables

### Visualization

- Integrated into the local programming system
- Monitoring of machine or system states
- Debugging
- Diagnosis
- With integrated access to web server via standard browser
- OPC interface for integrating Windows-based visualization programs such as InteractX, WinCC, Intouch, Protool
- Remote diagnostics

## Technical Characteristics

### General information

- Platform: 32 bit RISC processor 200 MHz
- 128 MB Compact Flash card
- 4 MB FLASH program memory
- 16 MB SDRAM data memory
- 32 kB (Retain) non volatile data memory
- Real time clock
- Real time multitasking operating system
- 24 VDC supply

### Controller features

- Processing time <100 µs for 1000 IL rows
- Real time tasks
  - Coasting
  - Cyclical
  - Event-controlled, internal / external events
- 1 ms minimum cycle time
- Online Program Change
- Watchdog Timer
- Data exchange in distributed systems (network variables)

### Programming and debugging

- CoDeSys V2.3 programming system
- IL, SFC, FBP, ST, LD, CFC programming languages
- IEC61131-3 range of commands
- PLCopen - Motion control modules
- Debug, Single Step, Watch function
- Simulation, online trace
- Breakpoints (source level debugging)
- Source code download
- Write, read, force variables
- Fast Ethernet programming interface

### Visualization

- Locally on the programming system
- Web - Server
- OPC Server

### Interfaces

- 2 x CANopen Master
- DP - SLAVE (Profibus)
- Ethernet
  - 10/100 MBauds
  - TCP / UDP
- Modbus TCP/IP Server
- Any digital and analog inputs/outputs (depending on the number of axes) via PIO and CANopen

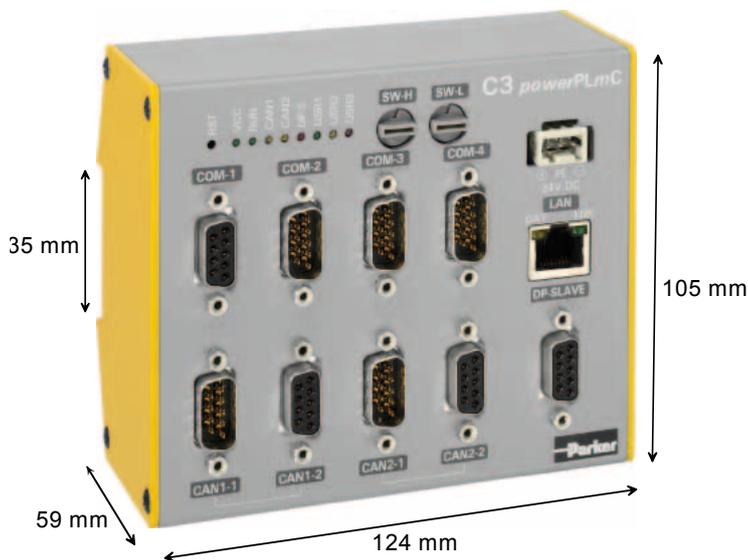

## Standards and Conformance

<b>CE compliance</b>	<ul style="list-style-type: none"> <li>• EC EMC directive EN 61 000-6-2 and EN 61 000-6-4</li> </ul>
<b>UL certification</b>	<ul style="list-style-type: none"> <li>• UL conform according to UL508C</li> </ul>
<b>RoHS compliance</b>	Complies with European Union Directive 2002/95/EC - Restriction of Hazardous Substances (RoHS)

## Ambient conditions

<b>Temperature range</b>	0...45 °C
<b>Humidity</b>	max. relative air humidity <=85% class 3K3; non-condensing

# Touchscreen HMI with Integrated Webserver - Interact Xpress

## Overview

### Description

#### Distributed HMI in a durable and affordable package

XPR2 PowerStation line offers a hardware/software solution that simplifies and cost-reduces distributed HMI applications. Available with a 6", 8", 10", 15" TFT panel mount touchscreen or new non-display system. XPR2 models are designed to optimize the performance, storage and connectivity features of Interact Xpress™ HMI software.

This CE-based workstations features the latest embedded processor technology supporting fanless operation, CompactFlash® storage, USB, serial and 100Base-T Ethernet connectivity.

#### Take full advantage of the web for; HMI design, publishing, runtime and support

Interact Xpress fully leverages the wide availability of web browsing software to enable distributed HMI software, remote support and application sharing on the internet and IP networks. Interact Xpress HMI applications are developed, edited, published and run in an HMI that is a web server, allowing users and OEMs to easily publish upgrades and applications to any global location with an internet connection and a web browser.

Interact Xpress combines a rich, graphical runtime interface with HMI development tools that can be accessed from either the HMI panel or any PC running Internet Explorer®.

### Features

- Fanless operation
- More than 40 communication drivers
- Complex animation capabilities
- Alarm logging
- Sending email on alarms
- Recipes
- Real time trending
- PDF documents viewing
- Multi language support
- Screen templates

### Technical Characteristics - Overview

<b>Display</b>	262 144 color TFT
<b>Storage options</b>	512 MB CompactFlash
<b>Operating system</b>	Windows CE
<b>Ports</b>	<ul style="list-style-type: none"> <li>• 2 USB</li> <li>• RS232/422/485</li> <li>• 10/100 Base-T Ethernet</li> </ul>
<b>Power supply</b>	24 VDC

## Complete Transparency and Supervisory Control

Interact Xpress provides your system with a connection to the rest of the company or the rest of the world. It offers a completely web-published environment where any plant-floor data or information can be accessed from any web browser with an Ethernet connection to the XPR PowerStation on your machine.

- Reduces HMI development time by automatically sharing tags with the ACR9640 programmable automation controller
- Pre-built template screens for common functions reduce your time to market
- Integrated development environment allows applications to be designed and edited on the runtime system
- HMI designer/editor supports multiple runtime versions, eliminating version control management headaches
- Easy, object-based screen development using a "tool bin" of pre-configured panels tools and drag-and-drop editing
- Panel tools include pushbuttons, numeric entry, selection entry, numeric displays, bar graphs, meters, gauges, sliders, message displays, time/date display and more
- 3-D, shaded panel tool graphic are available in multiple styles with no additional work
- Includes an integrated graphics library
- Jpeg (.jpg) and Flash (.swf) image support
- Complex animation capabilities and video support
- Web link support
- Pre-configured alarm tool with automatic collection of historical alarm data
- Integrated tag editor with drag-and-drop tools and import/export to Excel and other software packages

- Development software for offline design/editing supports Windows® 2000 and Windows® XP operating systems
- Reduces SCADA development time by up to 80 %, when used with our InteractX SCADA
- Interact Xpress is offered in everything from a no-display system to a 15" integrated display size
- More than 40 bundled communications servers allow Xpress to work with everything from our ACR9640 Xpress to virtually any legacy equipment you may have

- Real time trend display capability: Up to 1000 point historical buffer Any tag or expression can be used for values
- Multi Language support: Support export applications Easily export an application and translate all text, using standard tools

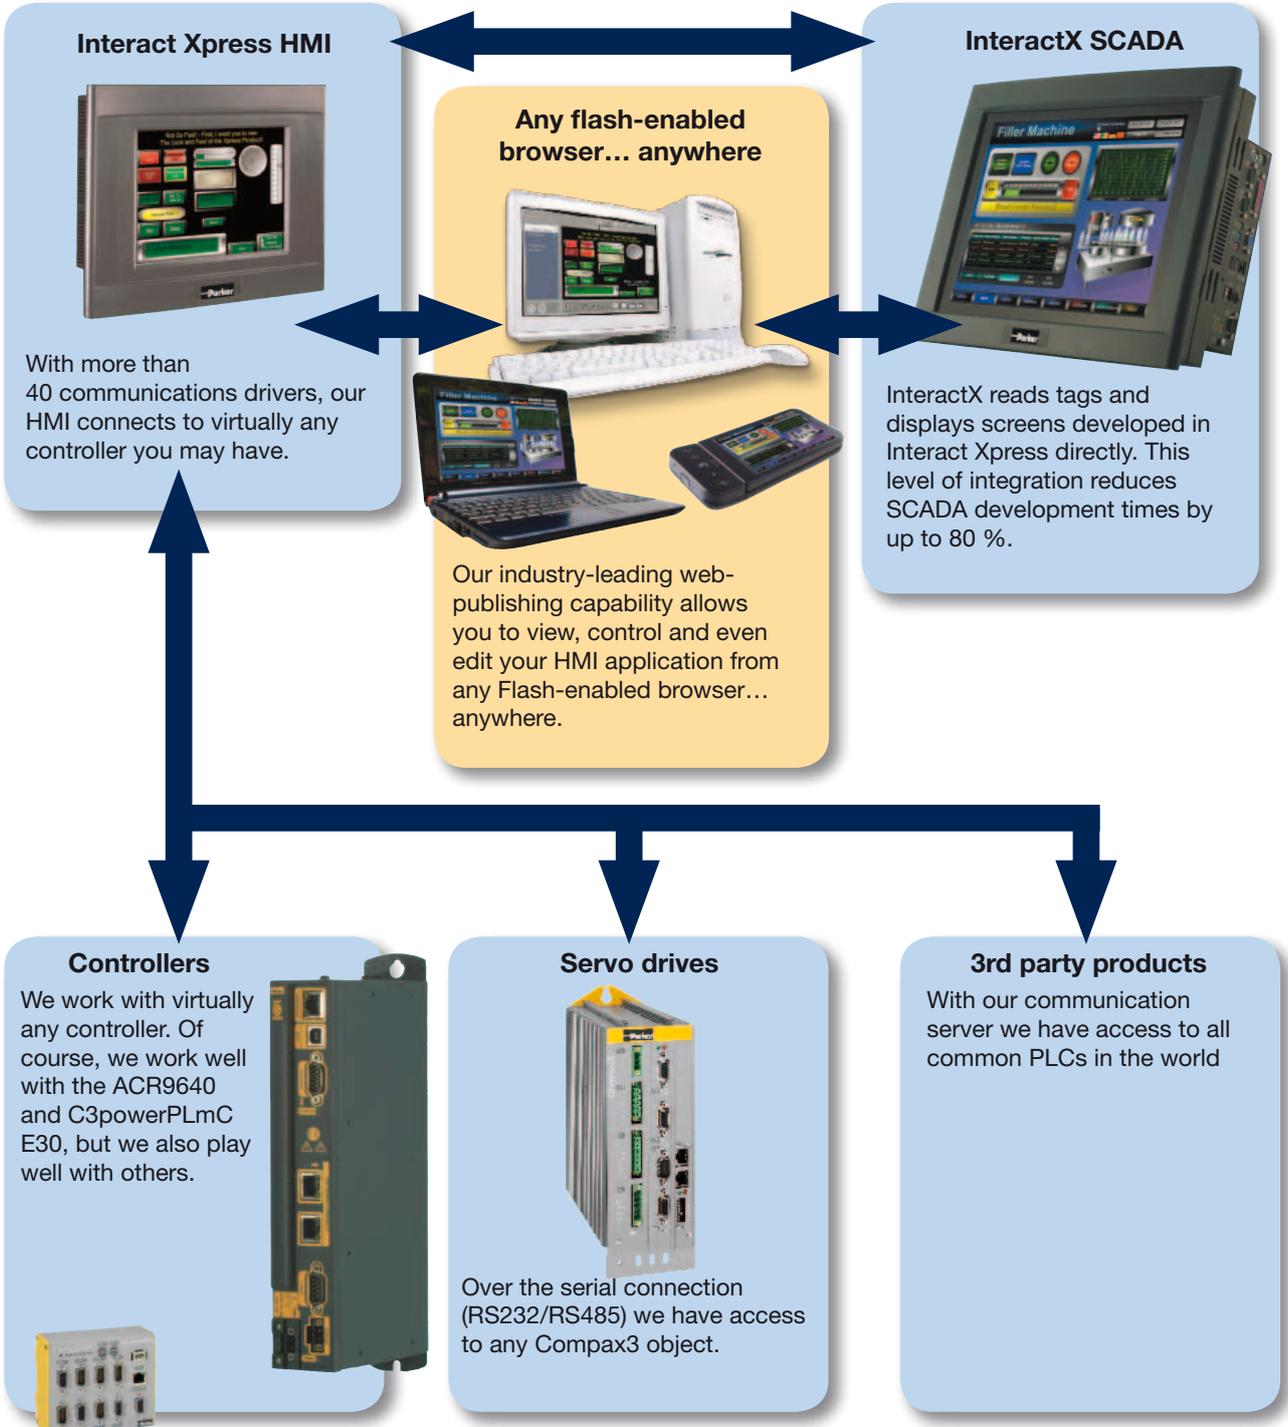

Real-time trending with 1000-point buffer for each pen.

Windows® is a registered trademark of Microsoft Corporation.

Controller Products  
Interact Xpress

Parker's Interact Xpress HMI with InteractX SCADA delivers your plant-floor data wherever it's needed, when it's needed.

Controller Products  
Interact Xpress

## HMI Power and Connectivity In a Durable, Affordable Package

Interact Xpress software is pre-installed and bundled with XPR2 PowerStation hardware, which is designed to optimize the performance, storage and connectivity features of Xpress HMI. This CE-based workstation is available with 6", 8", 10" and 15" TFT touchscreen display models, embedded fanless CPU technology, 256 MB DRAM and a full range of standard features such as CompactFlash storage, 2 USB ports, 2 RS232 and RS232/422/485 ports and a 100Base-T Ethernet port.

With standard 512 MB CompactFlash storage, XPR2 models use non-rotating storage media for high system reliability. And like all PowerStations, these units are quality tested to endure more harsh conditions in a day than most operator stations see in a lifetime.

**XPR2 PowerStations offer durability and no moving parts, to complement Xpress software in providing a high-value, Distributed HMI solution.**

## Interact Xpress Features

Controller Products  
Interact Xpress

- Sophisticated graphics look and feel with ease of development
- Integrated Web Publishing capability for distributed applications
- Applications can be served, created and edited online from any PC with Internet Explorer
- Available offline, development software allows work on applications when a live Internet connection is not available
- Advanced security for single or multi-user applications
- Tools for historical alarm data
- Capacity for complex graphics and animations
- Standard Ethernet port for both networking and controller communications
- More than 40 device communication drivers
- Unlimited tags
- Color depth to 262 144 colors

# Modular I/O - System - PIO

## Overview

### Description

Parker Hannifin's modular expandable bus terminal system uses electronic devices to capture a wide variety of control signals from field devices. Connections to the field level can be implemented quickly and reliably with PIO. PIO offers the convenience of exceptionally simple installation. The individual modules can be installed and removed without any tools. Different modules can be combined with each other within the bus terminal system. Gold-plated contacts guarantee reliable connections between the individual modules. A conducting ground contact adds additional safety.

### Features

- Fieldbus independent layout
- Easy to extend with additional modules
- Exceptionally compact design
- Intrinsically-safe contacts
- Maintenance free
- Mixed voltages can be combined
- Great flexibility ensures optimal adaptability in different applications
- Integrated input filter
- Opto-isolation
- Suitable for copper cables from 0.08 mm<sup>2</sup> to 2.5 mm<sup>2</sup>
- Error and status display (LED)
- Access options for simple signal test
- Short-circuit proof inputs
- Options for clear, unambiguous identification

### Technical Characteristics - Overview

PIO - Parker I/O-System	
Bus terminals	Digital and analog input and output terminals
Fieldbus coupler (Standard and ECO version)	<ul style="list-style-type: none"> <li>• CANopen</li> <li>• PROFIBUS</li> <li>• DeviceNet</li> <li>• ETHERNET TCP/IP</li> </ul>
Current via power contacts	max. 10 A
Voltage isolation	500V System / Supply
Operating temperature	0...55 °C
Enclosure rating	IP20
Resistance to vibrations	in accordance with IEC 60068-2-6
Resistance to impact	in accordance with IEC 60068-2-27
EMC Interference immunity	in accordance with EN 50082-2 (96)
Interference emission	in accordance with EN 50081-2 (94)
International Standards	CE, UL 508

# Technical Data

## Fieldbus Coupler

### CANopen

	<b>PIO-337 Standard</b>	<b>PIO-347 ECO</b>
Signals	digital and analog	digital and analog
max. number of couplers in the system	110	110
Transfer medium	screened copper cable 3 x 0.25 mm <sup>2</sup>	screened copper cable 3 x 0.25 mm <sup>2</sup>
max. bus length	40...1000 m depending on cable and baud rate	40...1000 m depending on cable and baud rate
Transfer rate	10 kBaud...1 MBaud	10 kBaud...1 MBaud
max. number of bus terminals	64	64
Fieldbus input process image	max. 512 bytes	max. 32 bytes
Fieldbus output process image	max. 512 bytes	max. 32 bytes
Supply voltage	24 VDC (-15 %...+20 %)	24 VDC (-15 %...+20 %)
Input current	max. 500 mA at 24 V	260 mA at 24 V typ. at nominal load
Internal current drain	350 mA at 5 V	350 mA at 5 V
max. vectorial sum current for bus terminals	1650 mA at 5 V	650 mA at 5 V
Power contacts	3; 24 VDC (-15 %...+20 %)	none
Current via power contacts	max. 10 A	-

### PROFIBUS DP

	<b>PIO-333 Standard</b>	<b>PIO-343 ECO</b>
Signals	digital and analog	digital and analog
max. number of couplers in the system	96 with repeater	125 with repeater
Number of I/O points	Approx. 6000 (depending on the master)	Approx. 6000 (depending on the master)
Transfer medium	Copper cable as per EN 50170	Copper cable as per EN 50170
max. bus length	100...1200 m depending on cable and baud rate	100...1200 m depending on cable and baud rate
Transfer rate	9.6 kBauds...12 MBauds	9.6 kBauds...12 MBauds
Transmission time	typ. 1 ms, max. 3.3 ms	typ. 1 ms, max. 3.3 ms
max. number of bus terminals	63	63
Fieldbus input process image	max. 128 bytes	max. 32 bytes
Fieldbus output process image	max. 128 bytes	max. 32 bytes
Supply voltage	24 VDC (-15 %...+20 %)	24 VDC (-15 %...+20 %)
Input current	max. 500 mA at 24 V	260 mA at 24 V typ. at nominal load
Internal current drain	200 mA at 5 V	350 mA at 5 V
max. vectorial sum current for bus terminals	1800 mA at 5 V	650 mA at 5 V
Power contacts	3; 24 VDC (-15 %...+20 %)	none
Current via power contacts	max. 10 A	-

Controller Products  
PIO

## DeviceNet™

	<b>PIO-306 Standard</b>	<b>PIO-346 ECO</b>
Signals	digital and analog	digital and analog
max. number of couplers in the system	64 with scanner	64 with scanner
Number of I/O points	Approx. 6000 (depending on the master)	Approx. 6000 (depending on the master)
Transfer medium	screened copper cable trunk line: 2x0.82 mm <sup>2</sup> + 2x1.7 mm <sup>2</sup> drop line: 2x0.2 mm <sup>2</sup> + 2x0.32 mm <sup>2</sup>	screened copper cable trunk line: 2x0.82 mm <sup>2</sup> + 2x1.7 mm <sup>2</sup> drop line: 2x0.2 mm <sup>2</sup> + 2x0.32 mm <sup>2</sup>
max. bus length	100...500 m depending on cable and baud rate	100...500 m depending on cable and baud rate
Transfer rate	125 - 250 - 500 kBauds	125 - 250 - 500 kBauds
max. number of bus terminals	64	63
Fieldbus input process image	max. 512 bytes	max. 32 bytes
Fieldbus output process image	max. 512 bytes	max. 32 bytes
Supply voltage	24 VDC (-15 %...+20 %)	24 VDC (-15 %...+20 %)
Input current	<500 mA at 24 V	260 mA at 24 V typ. at nominal load
DeviceNet Interface	<120 mA at 11 V	<120 mA at 11 V
Internal current drain	350 mA at 5 V	350 mA at 5 V
max. vectorial sum current for bus terminals	1650 mA at 5 V	650 mA at 5V
Power contacts	3; 24 VDC (-15 %...+20 %)	none
Current via power contacts	max. 10 A	-

## ETHERNET TCP/IP

	<b>PIO-341 Standard</b>
Signals	digital and analog
max. number of socket connections	3 HTTP, 5 MODBUS/TCP, 128 for ETHERNET/IP
Number of I/O modules	limited by ETHERNET specification
Transfer medium	Twisted Pair S-UTP 100 Ω CAT 5
max. bus length	100 m between hub and PIO-341; max. network length is limited by the ETHERNET specification
Transfer rate	10/100 Mbits/s
max. number of bus terminals	64
Fieldbus input process image	max. 2 kBytes
Fieldbus output process image	max. 2 kBytes
Supply voltage	24 VDC (-15 %...+20 %)
Input current	500 mA at 24 V
Internal current drain	300 mA at 5 V
max. vectorial sum current for bus terminals	1700 mA at 5 V
Power contacts	3; 24 VDC (-15 %...+20 %)
Current via power contacts	max. 10 A

ECO fieldbus couplers are used in situations where mainly digital inputs and outputs are to be connected and the number of analogue inputs and outputs is small.

The system is supplied directly via the coupler. The field supply is connected via a separate input terminal (PIO-602).

## Bus Terminals

### Digital inputs

	<b>PIO-400</b> 2DI 24 VDC 3.0 ms 2-channel digital input terminal	<b>PIO-402</b> 4DI 24 VDC 3.0 ms 4-channel digital input terminal	<b>PIO-430</b> 8DI 24 VDC 3.0 ms 8-channel digital input terminal
Number of inputs	2	4	8
Data width of the process image	2 Bits	4 Bits	8 Bits
Connection	2 - 4 wires, positive switching	2 - 3 wires, positive switching	single-wire, positive switching
Power contacts	3; 24 VDC (-15 %...+20 %)	2; 24 VDC (-15 %...+20 %)	2; 24 VDC (-15 %...+20 %)
Internal current drain	3.7 mA at 5 V	7.5 mA at 5 V	17 mA at 5 V
Signal voltage (0)	-3...+5 VDC	-3...+5 VDC	-3...+5 VDC
Signal voltage (1)	15...30 VDC	15...30 VDC	15...30 VDC
Input current (typ.)	4.5 mA	4.5 mA	2.8 mA
Dimensions (mm) WxHxD	12x64x100	12x64x100	12x64x100

### Analog inputs

	<b>PIO-456</b> 2AI ±10 VDC differential input 2-channel analog input terminal	<b>PIO-468</b> 4AI 0-10 VDC S.E. 4-channel analog input terminal	<b>PIO-480</b> 2AI 0-20 mA differential input 2-channel analog input terminal
Number of inputs	2	4	2 (opto-isolated)
Data width of the process image	2*2 bytes	4*2 bytes	2*2 bytes
Connection	differential input	Single-ended	differential input
Power contacts	none	none	none
Internal current drain	80 mA at 5 V	60 mA at 5 V	<100 mA at 5 V
Signal input	±10 V	0...10 V	0...20 mA
Resolution	12 bits	12 bits	14 bits (A/D converter) 13 bits (measurement value)
Dimensions (mm) WxHxD	12x64x100	12x64x100	12x64x100

### Digital outputs

	<b>PIO-501</b> 2DO 24 VDC 0.5 A 2-channel digital output terminal	<b>PIO-504</b> 4DO 24 VDC 0.5 A 4-channel digital output terminal	<b>PIO-530</b> 8DO 24 VDC 0.5 A 8-channel digital output terminal
Number of outputs	2	2	4
Data width of the process image	2 bits	4 bits	8 bits
Connection	short-circuit proof, positive switching	short-circuit proof, positive switching	short-circuit proof, positive switching
Power contacts	3; 24 VDC (-15 %...+20 %)	2; 24 VDC (-15 %...+20 %)	2; 24 VDC (-15 %...+20 %)
Internal current drain	3.5 mA at 5 V	7 mA at 5 V	25 mA at 5 V
Type of load	resistive, inductive, lamp load	resistive, inductive, lamp load	resistive, inductive, lamp load
Output current	0.5 A	0.5 A	0.5 A
Switching frequency (max.)	5 kHz	5 kHz	1 kHz
Dimensions (mm) WxHxD	12x64x100	12x64x100	12x64x100

### Analog outputs

	<b>PIO-550</b> 2AO 0-10 VDC 2-channel analog output terminal	<b>PIO-552</b> 2AO 0-20 mA 2-channel analog output terminal	<b>PIO-556</b> 2AO ±10 VDC 2-channel analog output terminal
Number of outputs	2	2	2
Data width of the process image	2*2 bytes	2*2 bytes	2*2 bytes
Power contacts	none	2; 24 VDC (-15 %...+20 %)	none
Signal input	0...10 V	0...20 mA	±10 V
Internal current drain	65 mA at 5 V	60 mA at 5 V	65 mA at 5 V
Resolution	12 bits	12 bits	12 bits
Conversion time	Approx. 2ms	Approx. 2ms	Approx. 2ms
Load impedance	> 5 kOhm	< 500 Ohm	> 5 kOhm
Dimensions (mm) WxHxD	12x64x100	12x64x100	12x64x100

### Power Supply Terminal

The power supply terminal is used to supply the field level when ECO couplers are used or if the supply is interrupted by bus terminals with no or only a single power contact.

#### Passive power supply terminal

	<b>PIO-602</b>
Voltage via power contacts	24 VDC (-15 %...+20 %)
Current via power contacts	max. 10 A

### Bus Terminal

PIO-600: A terminal must be set at the end of each fieldbus node. The terminal closes the internal terminal bus and ensures correct data transmission.

# Layout and Configuration Setup

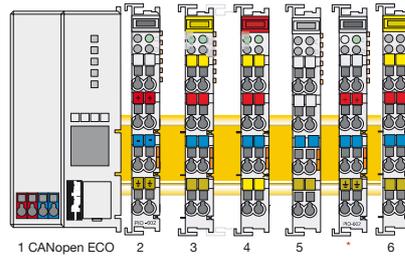

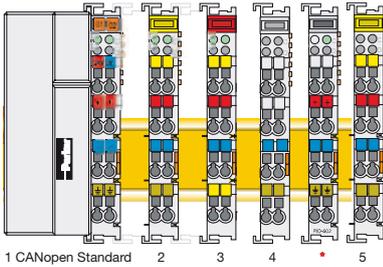

Example of a layout sequence (from left to right):

### with standard coupler

1. Fieldbus coupler
2. Bus terminals with 3 power contacts
3. Bus terminals with 2 power contacts
4. Bus terminals without power contacts
5. \*

### with ECO coupler

1. ECO fieldbus coupler
2. PIO-602
3. Bus terminals with 3 power contacts
4. Bus terminals with 2 power contacts
5. Bus terminals without power contacts
6. \*

\* Expansion on the right side using bus terminals with power contacts requires the use of a PIO-602 potential voltage feed terminal.

### Worked examples

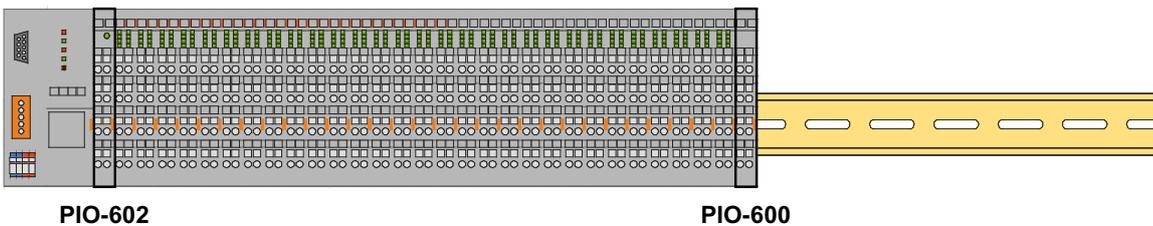

The data for the input currents must be available to calculate the vectorial sum!  
The internal current drain of the bus terminals is specified in the technical data. The values of all PIOs in the node are added together to determine the total requirement.

#### Example 1

The following components are to be used in a node:

- 1 CANopen ECO coupler (PIO-347)
- 16 digital output terminals (PIO-530)
- 14 digital input terminals (PIO-430)

PIO-347 internal current drain	350 mA at 5 V
PIO-347 max. vectorial sum current for bus terminals	650 mA at 5V
<b>Grand total I (5 V):</b>	
	<b>1000 mA at 5 V</b>
PIO-347 fieldbus input process image	max. 32 bytes
PIO-347 fieldbus output process image	max. 32 bytes
PIO-530 internal current drain	16*25 mA = 400 mA
PIO-430 internal current drain	14*17 mA = 238 mA
<b>Total:</b>	
	<b>638 mA</b>
PIO-530 data width of the output process image	16*8 bits = 128 bits (16 bytes)
PIO-430 data width of the input process image	14*8 bits = 112 bits (14 bytes)

The **CANopen ECO coupler (PIO-347)** is capable of providing the required 638 mA (max. 650 mA) for the bus terminals. It is capable of administering a data width of 14 bytes for the input process image (max. 32 bytes) and a data width of 16 bytes for the output process image (max. 32 bytes). (A PIO-602 power supply terminal is required).

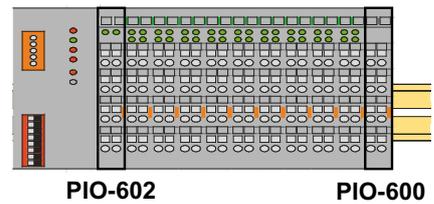

**Example 2**

The following components are to be used in a node:

- 1 CANopen ECO coupler (PIO-347)
- 9 analog input terminals (PIO-468)

PIO-347 internal current drain	350 mA at 5 V
PIO-347 max. vectorial sum current for bus terminals	650 mA at 5V
<b>Grand total I (5 V):</b>	<b>1000 mA at 5 V</b>
PIO-347 fieldbus input process image	max. 32 bytes
PIO-347 fieldbus output process image	max. 32 bytes
PIO-468 internal current drain	9*60 mA = 540 mA
<b>Total:</b>	<b>540 mA</b>
PIO-468 data width of the output process image	9*8 bytes = 72 bytes

The **CANopen ECO coupler** (PIO-347) is capable of providing the required 540 mA (max. 650 mA) for the bus terminals. However, this version requires the use of a **CANopen Standard coupler** (PIO-337), since the required data width of 72 bytes for the input process image cannot be administered by the CANopen ECO coupler (max. 32 bytes). The CANopen standard coupler (PIO-337) is capable of administering an input process image of 512 bytes. (No PIO-602 power supply terminal is required).

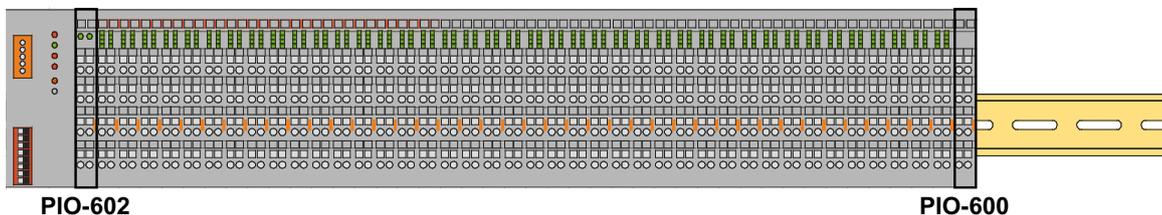

**Example 3:**

The following components are to be used in a node:

- 1 CANopen ECO coupler (PIO-347)
- 16 digital output terminals (PIO-530)
- 24 digital input terminals (PIO-430)

PIO-347 internal current drain	350 mA at 5 V
PIO-347 max. vectorial sum current for bus terminals	650 mA at 5V
<b>Grand total I (5 V):</b>	<b>1000 mA at 5 V</b>
PIO-347 fieldbus input process image	max. 32 bytes
PIO-347 fieldbus output process image	max. 32 bytes
PIO-530 internal current drain	16*25 mA = 400 mA
PIO-430 internal current drain	24*17 mA = 408 mA
<b>Total:</b>	<b>808 mA</b>
PIO-530 data width of the output process image	16*8 bits = 128 bits (16 bytes)
PIO-430 data width of the input process image	14*8 bits = 112 bits (14 bytes)

The **CANopen ECO coupler** (PIO-347) is capable of administering a data width of 14 bytes for the input process image (max. 32 bytes) and a data width of 16 bytes for the output process image (max. 32 bytes). This version requires the use of the **CANopen standard coupler** (PIO-337) since the total of currents is exceeded. The CANopen standard coupler (PIO-337) is capable of providing 1650 mA for bus terminals and can administer an input and output process image of 512 bytes each. (No PIO-602 power supply terminal is required).

# System Solutions from Parker Hannifin

## Integrating Drive Technology into the Automation Environment

- High-performance control systems
- Pneumatic and hydraulic drives
- Sensor systems
- Input/output modules
- Operator panels for control and monitoring
- Technology functions (winders, cams, etc.)
- Vertical integration (connection to company networks, remote maintenance, etc.)
- Handling and precision mechanics

- Implementation of modular machine concepts with electromechanics, pneumatics and hydraulics
- Relieves the logic and motion function load on the main control system (can in some instances remove the need for the main control system)
- Control, NC functionality and monitoring in a single device
- Integration into control systems and remote maintenance via the Internet
- Standard components make it easy to expand the system
- IEC 61131-3
- PLCopen motion components
- Standard fieldbusses

### CANopen (Sync Telegram)

### Features

- 5 programming languages
  - SFC (Sequential function chart)
  - IL (Instruction List)
  - ST (Structured Text)
  - LD (Ladder diagram)
  - FBD (Function block diagram)
  - CFC (Continuous function chart editor)
- Compax3 library
  - IEC - standard components
  - Compax3 - specific components
  - PLCopen Motion control components
  - Technology components
